Supporters of Governor Are Aligned in a Compact Line of Committees and Are Doing All They Can to Elect Governor and Those Whom He Intends to Support.

State Health Officer Hayne Says Disease is Most Serious Menace to Good Health.

Centralization of the anti-administration forces on some one anti-Bleasite candidate for governor has become imperative in order to assure the ultimate election of an anti-Bleasite governor, is the opinion of J. A. Daly, who says a development of last week in the campaign for State offices was contained in statements of several anti-administration candidates regarded as leaders of that faction.

Mr. Pollock would be impossible, said the speaker, and a bunch of about fifty wearers of the red badges standing on the right of the stand again began their howling tactics and Sheriff Owings said to them, "You keep quiet over there. We have our own people to do our hollering."

In his testimony at Washington Monday before the Senate naval affairs committee B. L. Dulaney, one of the best known coal operators in southwest Virginia, told the committee considering the Tillman resolution regarding shipments of coal to South Atlantic cities that the Southern railroad had so manipulated things that it is now impossible for that section to ship coal with a profit to Atlantic cities.

While three thousand persons watched with still breath, expecting to witness a fisticuff, perhaps the shedding of blood, one of the leading bankers of South Carolina, J. Wilkins Norwood, of Greenville, struggled frantically to break away from a number of men holding him and personally resent what he considered an insult offered him by the Governor of the State, Cole L. Blease, during the senatorial campaign meeting Saturday.

After a pitched battle between several hundred coal miners and their sympathizers and one hundred guards at the Prairie Creek mines of the Mammoth Vein Coal company, near Fort Smith, Ark., Friday, which ended in the rout of the guards, tipples of three mines were destroyed by fire and dynamited. The property damage is estimated at \$200,000.

The long continued effort to untangle the New Haven railroad without litigation came to an end Tuesday night, when President Wilson in a letter to Attorney General McReynolds directed the institution of a Sherman law suit to dissolve the system and ordered that the "criminal aspects of the case" be laid before a federal grand jury.

That State Senator W. H. Sharpe of Lexington County is the State chairman of the Bleasite organization, and John A. Aull, private secretary to the Governor, the secretary of the organization, is the information furnished the Bee Dee Daily of Bennettsville by Col. J. P. Gibson of Bennettsville, a member of the staff of Gov. Blease, and secretary of the Bleasite organization in Marlboro county.

Dr. A. J. Hayne, State health officer, had the following to say as to the pellagra situation: "Pellagra is at present the disease that is giving the State board of health more trouble than any other health condition in the State. From the following it may be seen that a pellagra survey of the State is very necessary."

That the man Bleasite has got to beat, he said, was not the man who could stand up and take their medicine. Cheers from a large part of the crowd greeted Mr. Pollock when he quit, while the Bleasite followers made their disapproval known by jeering and shouting for their champion.

Those responsible for this condition, according to Dulaney, are Geo. F. Baker, Geo. F. Baker Jr., Elbert H. Gary, Adrian Iselin, Adrian Ingham Jr., Charles Steaks of J. P. Morgan & Co., E. J. Berwind, president of the Berwind-White Coal company, Henry K. McFarg and Grant C. Schley.

Those responsible for this condition, according to Dulaney, are Geo. F. Baker, Geo. F. Baker Jr., Elbert H. Gary, Adrian Iselin, Adrian Ingham Jr., Charles Steaks of J. P. Morgan & Co., E. J. Berwind, president of the Berwind-White Coal company, Henry K. McFarg and Grant C. Schley.

The trouble started while the governor was speaking, when Mr. Norwood, who was on the stand at the rear, asked, "How about Dr. McIntosh?" The governor replied: "When I get to Columbia I will ask Dr. McIntosh on the stand and then answer the question, not behind his back, like a coward like you."

Friday's rioting was a culmination of a series of minor disturbances which have occurred at intervals since the contract with the United Mine Workers was abrogated last March, and announcement made that the properties owned by the Bache-Denman Coal company, but under lease to the Mammoth Vein company, would be operated on an "open shop" basis.

The president's approval of the course mapped out by the department of justice means that the civil suit will be filed against the New Haven in the United States court at New York at once. The attorney general also immediately will direct United States District Attorney Marshall at New York to summon a grand jury, and the task of laying evidence before the body of whom to ask for criminal indictments against officers and directors of the New Haven under the Mellen management will be begun as soon as possible.

The card of Col. J. Preston Gibson to the Bee Dee Daily says in part: "Mr. Freeman: In your yesterday's (Friday's) Daily you editorially offered to pay a reward of five dollars to any one for the names of the State Bleasite committee and the names of chairman and secretary in Marlboro county and the names of the township committees in this county. We are not afraid or ashamed for names to be published, for we feel that we are as good as any people who walk the earth. We are Democrats and as patriotic as anybody. The following is the information desired:

Dr. J. A. Hayne, State health officer, had the following to say as to the pellagra situation: "Pellagra is at present the disease that is giving the State board of health more trouble than any other health condition in the State. A glance at the report of the inspectors sent out by the State department of agriculture to inspect the cotton mills shows a decrease of 872 white males, while there has been an increase of 23 white females, 376 negro males and 46 negro females. Though there has been an increase of 163,108 spindles and 1,830 looms it is noted that there has been a decrease in the total number of operatives of 427. These figures would indicate that the mills are installing modern labor-saving machinery, and that there is a further tendency to change from coarse to fine goods.

Dr. J. A. Hayne, State health officer, had the following to say as to the pellagra situation: "Pellagra is at present the disease that is giving the State board of health more trouble than any other health condition in the State. A telegram received at Los Angeles purporting to be official message from Carranza says all who took an active part in the assassination of Madero will be dealt with as criminals.

Dr. J. A. Hayne, State health officer, had the following to say as to the pellagra situation: "Pellagra is at present the disease that is giving the State board of health more trouble than any other health condition in the State. From the following it may be seen that a pellagra survey of the State is very necessary."
