## GOOD ROADS

### OPERATION OF ROAD GRADER

Harrow and Packer Can Be Used to Advantage at Finish to Properly Compact the Soil.

When the time comes to grade the road, put a plow team at work the day before, and go down as deep as you can, turning over the breaking of the previous year. Some folks think that the grader was made to plow with, but I never could figure it that way, writes S. R. Crawley in Farm Stock and Farm. Then start moving the earth over the center of the grade. Set the grader blade at a reasonably sharp slant, and begin on the inside of the plowing. Carry your first load well up the center of the new grade from either side before you bite into

Good Road Presser.

### TRAPPING MOTHS AT NIGHT

Effective Means Provided by Ordinary Lantern, Shallow Tub and Very Little Kerosene.

(By W. E. HINDS.)

Many destructive worm moths are readily attracted to lights and may be trapped in large numbers, thus preventing many worms, but of course this cannot be considered as a substitute for poisoning. It will be helpful to test the emergence of the moths in this way and thus to know just when to begin applications of poison.

A lantern or light trap may be easily and cheaply made as follows: Arrange in some way by using a box, barrel or stake with a board on top, to raise the trap a foot or two above the plants you are trying to protect. Place on this a shallow pan or tub containing an inch of water with just enough kerosene oil to form a film over its surface to kill insects that may fall into it. In the middle of the pan set an ordinary lighted lantern. Let this burn brightly through the night, to attract the moths. No one knows how far this will attract them. Doubtless much depends upon the brightness of the light or the darkness of the night. This is a very simple and effective method of exterminating the moths of many injurious insects. Flying against the lantern, the moths simply drop into the oil and water and their career of uselessness is over.

Pan and Lighted Lantern.

We prefer to make a customer rather than just a single sale

When you come here for a suit of clothes or an overcoat our object is to make you a permanent customer of this store.

We know of no better way to do it than by selling you

**Styleplus \$17**  
Clothes

"The same price the world over."

Big economies, caused by buying and manufacturing on a great scale, keep the price down to \$17. The low price causes a large sale. While we make less per suit and overcoat we make more customers.

We have other clothes, too, but we suggest that you begin by looking at STYLEPLUS suits and overcoats—all styles, all fabrics. Come in!

### POLLINATION OF CORN

CONTAMINATION OF SILKS BY FOREIGN POLLEN AVOIDED.

Tassel is Covered While Still Immature and Before Anthers Have Protruded, With Ten-Pound Manila Paper Sack.

(By H. F. ROBERTS.)

In the breeding of corn, some difficulties are encountered in the technique of pollination, in respect to the prevention of contamination of the silks by foreign pollen, carried on the hands or instruments of the operator, as he goes from plant to plant engaged in the work of artificial pollination. To obviate these difficulties the following method has been devised by the writer and has been used with success. The simplicity of the method and its complete effectiveness seem to justify a description.

The tassel is covered while still immature, and before the anthers have protruded, with a ten-pound manila paper sack, such as is commonly used in grocery stores. The mouth of this sack is securely gathered around the stalk beneath the tassel and pinned with a rather stout long pin. Ordinary pins are too small. The ear is likewise covered with a similar sack, which is drawn tightly over the top of the ear, folded around the stalk on the opposite side and the folds pinned. The sacking of the ear must be done before the silks have begun in the least to protrude from the husks. Otherwise pollination of the protruding silks from vagrant pollen is almost certain to occur.

When the silks have grown to a length of five or six inches within the sack, the ear is usually in the best condition for pollination, since by that time most of the silks have grown out. The first silks to appear are those from the basal kernels, and so on progressively outward, the tip silks being the last to develop. In natural wind-pollination of corn, the pollen is blowing about the field for a period of a week or ten days, during which time the drifting pollen falls on the susceptible silks as they appear. In artificial pollination, if but a single application of the pollen is made, nat-

### How To Give Quinine To Children.

FEBRILINE is the trade-mark name given to an improved Quinine. It is a Tasteless Syrup, pleasant to take and does not disturb the stomach. Children take it and never know it is Quinine. It is especially adapted to adults who cannot take ordinary Quinine. Does not nauseate or cause nervousness or ringing in the head. Try it the next time you need Quinine for any purpose. Ask for Quinine original package. The name FEBRILINE is blown in bottle. 25 cents.

### NOTICE.

A special examination for securing teachers' certificates will be conducted at the court house in Manning Friday, January 16th, 1915, beginning at 9 o'clock. This is an opportunity that holders of second and third grade certificates have of properly renewing them, as well as those who have none, to qualify. Let every teacher in the county who has not a valid certificate take due notice of this special examination.

E. J. BROWNE,  
County Supt. of Education.

### Notice to Creditors.

All persons having claims against the estate of E. C. Thames, deceased, will present them duly attested, and those owing said estate will make payment to the undersigned qualified administrator of said estate.

### INCREASE FARM EFFICIENCY

Work Done With Fewer Horses Means Saving of \$100 a Year for Each Animal Not Required.

(By A. H. BENTON.)

One of the most frequent sources of loss on the farm is an insufficient return from work horses.

Have you satisfied yourself on the following points?

1. Do you cost \$100 annually to keep the average horse, but this horse works only a little more than three hours each working day. This makes the horse labor cost approximately ten cents an hour.

2. Do you handle the horse labor on your farm so that the annual cost of keeping your horses is less than the average, so that the number of hours worked is greater? Both methods will reduce the cost of horse labor, but the latter offers by far the greatest opportunity.

Can you revise your cropping system so that fewer work-horses will be needed, or so that the work will be more equally distributed and thus make it possible to employ them more hours each year?

Can you raise colts and thus reduce the cost of keeping your horses?

Can you arrange to use your work horses for outside work when not busy on the farm?

Can you reduce the cost of keeping each horse by feeding less feed or cheaper feed and still give a proper ration?

Farm work done with fewer horses means a saving of \$100 a year for each horse not needed.

### ALFALFA AS A FORAGE CROP

Most Valuable of Deep-Rooted Legumes and is Long Lived Under the Best of Conditions.

Alfalfa is an exceptionally deep-rooted legume, and under the best conditions it is long lived. Like other legumes, it has the capacity, under the right conditions, of assimilating nitrogen from the atmosphere, but until the root system and the nodules which it bears are well developed its growth is greatly promoted by the presence of readily assimilable nitrogen in the soil. It is without doubt one of the most valuable forage plants known to man. It has long been cultivated in various parts of Asia and Europe, whence it was brought to Mexico by the Spaniards, who took it with them to California and the semiarid portions of our southwestern states. During the last fifteen or twenty years its culture has been steadily pushed eastward, and it is now successfully grown in most parts of the United States and in a few parts of Canada. In many essentials and in feeding value alfalfa resembles the clovers; and as these are so generally known its characteristics will be perhaps best brought out by comparison.

Source of Contamination. Milk pails are sometimes made with double bottoms so as to prevent rusting. The inside bottom is made of zinc. This after a time may get a hole in it and then it becomes a veritable hotbed for propagation of germs. When the warm milk comes into the pail the air under the false bottom expands, as will be noticed by the bubbles rising in the milk. When the milk cools the air under the false bottom contracts and draws milk between the bottoms, where it can never be washed out. Here it putrefies and is a constant source of contamination.

Try This for Neuralgia

Thousands of people keep on suffering with Neuralgia because they do not know what to do for it. Neuralgia is a pain in the nerves. What you want to do is to soothe the nerve itself. Apply Sloan's Liniment to the surface over the painful part—do not rub it in. Sloan's Liniment penetrates very quickly to the sore, irritated nerve and allays the inflammation. Get a bottle of Sloan's Liniment for 50c of any druggist and have it in the house—against Colds, Sore and Swollen Joints, Lumbago, Sciatica and like ailments. Your money back if not satisfied, but it does give almost instant relief.—Adv.

In the Gym.

"So you have a gymnasium in your new house?" "Yes," replied Duith Stax. "I spend an hour or two there every day. I have swung up a hammock, and it's a nice place to take a nap in."—Washington Star.

The Quinine That Does Not Affect The Head Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness or ringing in the head. Remember the full name and

## Big Business College of Columbia, Makes Special Announcement to Patrons

Largest and best known institution of kind in State, makes most liberal offer to young people for 1915.

In keeping with the spirit of times, and the College will teach him by MAIL for 3, 4, or 5 months or longer (as long as the student desires) after which the said student goes to Columbia, enters the departments of the college and completes the course thoroughly under the direct supervision and guidance of experienced instructors. Under this plan, the College offers good for instruction both BY MAIL and at COLLEGE, and after studying by mail as long as desired the student enters the institution to complete the work on the same scholarship, without any additional charge whatever. Full information and testimonial letters from those who have actually used this plan will be mailed upon request. Write for them.

The above plan (No. 4) will especially appeal to many young men and young women throughout the State during the coming year, because many can afford to purchase a \$50 scholarship, for cash or with cotton (at ten cents) but do not feel able or willing, under the conditions now existing, to undertake the monthly board and living expenses which attending a college certainly makes necessary. While progress is not so rapid in taking lessons by mail, the saving in board and living expenses means a great deal. After taking the Home Study lessons, a student should be able to go to college, complete the work thoroughly in six to eight weeks and accept a position. In this plan during the past year it has been the best proof that you can use it too. Write for full details.

After the European war has closed and business conditions have adjusted themselves and become normal again, this entire country will experience the greatest and most prolonged period of prosperity and business expansion and development that it has ever known within its history, and opportunities of business, for those young people who have the necessary training and are prepared, will be more plentiful than have ever been the case before. The far-sighted young man is already realizing this and is making plans, if he has not already made them, to secure a thorough and practical business training so as to be ready for the opportunities which every big banker and business man will tell you are sure to be so plentiful.

Parents who are now planning to place son or daughter in Business College, or young men who look forward to preparing themselves for successful business careers, and wish to economize as much as possible, should write for full information concerning one of the above plans. Money saved is money made, and Draughon training (enforced by Bankers and Business men everywhere) and the Draughon Business College (the largest business education training institution in the State) need no introduction to the public, the superiority of the courses of study and the greater facilities for securing positions for students being well known.

Three things that go together—Time, Labor, Money. Save time, Work, Save money and you'll be rich!

A Bank account is the result of prudence. Lots of people who earn less than others have Bank accounts because they are prudent, saving a part of what they earn regularly. It doesn't require much figuring to find the folly of spending all you earn, virtually robbing yourself of future independence and happiness. We will help you save and one dollar will start you.

1. COTTON PLAN—Cotton will be accepted (strictly middle) in payment for scholarships and ten cents per pound will be allowed for it. One 500-pound bale will pay for a \$50 complete scholarship in the Bookkeeping and Banking department of Draughon's College or a complete scholarship in the Short-hand and Typewriting department. Two such bales will be accepted for a Combined Scholarship of both Bookkeeping Short-hand and auxiliary studies.

2. CASH PLAN—Where the student enrolling pays cash for scholarship, a "War Discount" of \$10.00 will be allowed and Railroad fare of the student to Columbia will be paid by the college. This is equal to every way, from an economical standpoint, to the cotton plan offered above, and will only remain in force for such a limited time as in the opinion of the College management present existing conditions may justify.

3. NOTE PLAN—If the student wishes to give a note, payable a year or one year from date, for the full price of the scholarship, allowing full time for the student to complete the course, accept a position and earn the money to pay their notes before they fall due. If you are interested in this plan, write for special note plan blank which gives full information.

4. BY MAIL PLAN—Any young man or young woman can purchase a Draughon Scholarship for the Bookkeeping and Banking, or for the Short-hand and Typewriting course, and pay for this scholarship with cotton on a basis of ten cents per pound, with cash, or with an approved note. The student can then remain AT HOME

Piles Cured in 6 to 14 Days  
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Hemorrhoids, Bleeding or Protruding Piles in 6 to 14 days. The first application gives Ease and Rest. 50c.

Invigorating to the Pale and Sickly  
The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILL TONIC, drives out Malaria, enriches the blood and builds up the system. A true tonic. For adults and children. 50c.

Whenever You Need a General Tonic Take Grove's  
The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.
