Therefore, be it resolved: That in the death of Mrs Stukes, our Sunday school has lost a faithful and conscientious worker, one ready for any service, and who ever responded willingly to the call of duty. That, whether as member of Bible class, or as teacher in the Sunday

That, while submissive to the will of the Heavenly Father, who, we are sure, has for wise purposes called our friend home to a brighter and better world, we lament the death of Mrs full of it too. Now boys you can take the above for what ever value you put on it, you can have it at par if you want it. But weat I want to get before our people now is this, I believe 1916 will be the year to grow bright tobacco in South this method and otherwise they wish arolina. All of you that planted tobacco last year and as many new ones as want to go into it this year, walk right ip, roll up your sleeves and take a shot. I am not a prophet, but balieve this will be a good year to plant obacco in South Carolina. I hope our merchants and business men in general from whom our farmers get their fertizers and supplies will not hesitate to help the boys out. It certainly wil not be wise to go erazy over the production of cotton, no farmer should depend upon any one certain crop when he can grow several. Just let the merchant supply more, get it out of his head at once if he has the idea there thaf everbody should plant all cotton. If you die not get any money much out of his tobacco it wasn't his fault, he did not make any tobacco hardly worth gathering. Did you find cotton profitable the fall of 1914, and the country was est. I am not, I am writing this for the people of our county in general and include myself among them. WHISTLER'S BREAKFASTS.

They Were Famous Functions When

the Artist Was In Funds. An invitation to one of Mr. Whistler's "breakfasts" was prized by many persons almost as much as a royal command, more by some. Mr. Whistler brought together about his dainty, long, narrow breakfast table in its long, narrow room with pale yellow washed walls a symposium of those persons in London most noted for wit or endowed with rare original talent of some kind. Sprinkled here and there for the sake, no doubt, of half tones were others whose chief qualification was the power of chastened and judicious apprecia-

These symposiums were held by Whistler in his splendid studio, 33 Tite street, at present the studio of Sargent. Whistler did not steadily occupy that place, which a depleted treasury sometimes caused him to forsake temporarily. According to the widely known story, when the bailiffs came in to dispossess him for debt he pressed them into service as extra men to help serve one of his famous breakfasts, after which he would retire to a low, rambling workshop up an alleyway off the Fulham road. There in solitary quiet he would bring forth another masterpiece to startle the world and furnish him with the means of re-entering beautiful Tite street and taking up the thread of his more princely existence.
