a dish of clean water are also necessary. Turkeys fatten well in confinement when fed as recommended above for laying hens. They will eat the cowpeas readily and also the dry mash.

MISGRADING CAUSES HEAVY LOSSES IN COTON

Clemson College, Dec. 11.—In a report to the Secretary of Agriculture, made public recently, the Office of Market and Rural Organization stated that the losses to cotton growers in the United States probably reached \$7,500,000 in 1913-1914 because grades were not properly taken into account in the primary sales, and that in spite of a tendency toward improved conditions since the promulgation of the official cotton standards of the United States the losses due to inaccurate grading are still great. The growers are urged to familiarize themselves with grades and to insist that the proper classification be given their bales by buyers. Emphasis is also placed on the economic importance of securing proper ginning, adequate baling and covering, and proper storage. It is shown that great and inconsistent variations in prices are paid

PELLAGRA BEING ERADICATED IN SOUTH CAROLINA

Disease Once Pronounced Incurable Now Being Dislodged by Remedy Which is Already Compounded by Nature.

Pellagra is fast losing its terrors owing to a remarkable remedy which is being put on the market by a Birmingham concern. So far as is known it is the only remedy which goes directly to the seat of trouble in Pellagra cases and now performs its healing work with absolute certainty. Mr. Alex R. Tharin, known for miles around Greenville, S. C., was a victim of this dreaded disease and writes: "I suffered with Pellagra a long time and could find nothing to help me a particle. I was ill at home when a friend advised me to try Sulfero-Sol. Within two days I had improved so much I could go back to work and after taking three bottles I am perfectly well. Seeing the good it did me I made my wife use it for nursing sore mouth. She had been told by the Doctor that it could not be cured but Sulfero-Sol healed it right up, and she has had no further trouble with the disease. We consider Sulfero-Sol the greatest curative remedy ever put on the market and we cannot say half enough for it." Sulfero-Sol can be found at any Drug Store. If your Druggist does not have Sulfero-Sol he will order it for you. The Murray Drug Co., Columbia, State Distributors.—Adv.

for cotton of different grades. The average of prices on observed transactions in Alabama for one month for example, was 13.51 cents for strict good primary and 13.47 cents for strict good middling, the latter being six grades better than the former. The higher grade of cotton thus sold for 20 cents less per bale than that of the lower grade, when on the basis of New Orleans difference it was actually worth \$7.50 per bale more.

Investigation showed that for the same grade the prices paid were on the whole considerably greater in the eastern States than in those west of the Mississippi. These differences are much greater than difference in freight rates to the mills alone would account for. The other factors in favor of the East are believed to have been the direct purchase by mill buyers, the existence of better storage facilities, the availability of relatively cheap money, and the more general knowledge of grading among farmers. Although the grading in the East is a trifle better than that in the West, the eastern growers must nevertheless exert tremendous efforts toward proper grading.

HOW TO MAKE HEAD CHEESE FROM HOGS

Clemson College, S. C., Dec. 11.—In making head cheese, split the head and divide again crosswise. Cut out the eyes, remove the brains, and cut off ears and snout. Soak over night in cold water to draw out blood and dirt, and rinse several times. When thoroughly cleansed cover with hot water and boil until the meat falls from the bones. Pick out all the bones, drain the meat from the soap, and chop up fine. If there is much soup or liquor boil it down, then place the meat in the liquor and season to suit the taste with salt and pepper. The cheese can be flavored by placing some sliced onion and spices in a cloth sack and allowing this to boil with the liquor. Also add a little vinegar to suit the taste. Let boil for about half an hour or until it has cooked down nice and thick, and then pour into small crocks and weight down while cooling. When cold it should be a solid gelatinized mass. Pour melted lard over it, enough to cover it well, as this seals it from the air. Cover and set away. By using small crocks only a portion need be unsealed and the meat will

OF INTEREST TO FARMERS

POULTRY POINTERS.

Clemson College, S. C., Dec. 11.—By adding a bucket of cowpeas to every three buckets of cracked corn, sorghum seed, wheat, or whatever mixture is fed the laying hens, the production of eggs is materially increased.

Sorehead is caused by the chickens coming in contact with mold spores. By keeping them away from moldy litter or moldy grain or other carriers of mold, the disease will not appear in your flock.

To cure sorehead dip the head of each afflicted chicken in a solution of acid iron sulfate or cresol. Full particulars about the treatment of this and other diseases are in the third edition of Bulletin 16, Poul-

try Culture for South Carolina, which has just been published. It is distributed free of charge to anyone in the state.

Pullets hatched in January make excellent summer and fall layers when the mature hens are molting.

The Simplified Clemson Egg Mash is mixed as follows: 15 pounds cottonseed meal, 15 pounds cowpea meal, 30 pounds cornmeal, 20 pounds ground oats, 10 pounds wheat shorts, and one-half pound fine table salt. Unless you can obtain prime, bright cottonseed meal recommended for poultry feeding, reject this product and increase the amount of cowpea meal to 30 pounds.

Keep this mash dry before the layers constantly. Morning and night feed them the mixture of grains and cowpeas in litter to make them exercise. A supply of ground limestone or ground oyster shells and

1ST CAR OF MULES

We have just received a car of Western Mules. You can find just the Mule you want, whether it is a large mule, medium mule or a small mule; a farm mule or a draft mule.

This is an extra fine lot of mules, and you will not be able to do better anywhere.

We also have several fine driving and work Horses.
