

"MAN FROM INDIANA RESPONDS TO THE CALL"

J. C. Millikin, of Hammond, Ind., Relates Interesting Experience.

"This is no time for slackers," writes J. C. Millikin of 1140 Monroe Street, Hammond, Ind.

"A man cannot do his full part in these strenuous times unless he is ready to go at any minute. Out here we're working night and day and I was so overworked I felt certain I would collapse. I needed something to build me up quickly and keep me strong for my work."

"A man who came from Birmingham told me of a natural iron medicine that he said was wonderful in it's work."

"I'll say frankly I never took a tonic before with such astonishing results in so short a time. Sulferro-Sol actually put me on my feet and gave me new life."

"For an energizing tonic that will give added strength with each dose I recommend Sulferro-Sol to every person young or old, who is run down or debilitated."

Ask your Druggist about Sulferro-Sol the remedy that heals and builds as nothing else will.

Sulferro-Sol can be found at any Drug Store. If your Druggist does not have Sulferro-Sol he will order it for you. The Murray Drug Co., Columbia, State Distributors.—adv.

HINTS FOR THE HOME GARDENER

The following cultural suggestions are made for the crops which may yet be planted with fair chances of success throughout most of this region:

Beans.
Plant in rows two and one-half feet apart for either horse or hand cultivation, and three to four inches apart in the rows. A pint of seed is sufficient for a hundred-foot row.

Lima Beans, Pole.
Plant in hills three to four feet apart for horse or hand cultivation. A half pint of seed is sufficient for a hundred-foot row. Bush limas should be planted in rows two and one-half feet apart for hand cultivation, or three feet apart for horse cultivation. Space the seeds six to ten inches apart in the rows.

Cucumber.
Plant 8 to 10 seeds in a hill, spacing the hills 5 feet apart each way, and thin to 2 or 3 plants; or sow the seed in rows four to five feet apart. When planted in rows, the plants should be about fifteen inches apart, but the seed should be sowed much thicker, the plants thinned later. A half ounce of seed is sufficient for a hundred-foot row.

Squash.
The bush varieties should be planted in hills four feet apart each way, and the running varieties eight to ten feet apart each way. One-half ounce of seed is sufficient for a hundred-foot row of either the bush or running varieties.

Muskmelons.
The culture of the muskmelon is the same as the cucumber except that the plants are usually given more space. Plant eight to ten seeds in a hill, spacing the hills six feet apart each way. Another method is to sow in drills six feet apart and thin to single plants eighteen to twenty-four inches apart.

Watermelons.
The culture of the watermelon is the same as the muskmelon except that the plants require more space. Plant watermelon in rows eight to ten feet apart and thin to single plants three feet apart in the rows, or plant in hills eight to ten feet apart each way. An ounce of seed is sufficient for a hundred-foot row or for a dozen hills.

Okra.
The rows should be three to four feet apart for the dwarf varieties and four to five feet apart for the tall kinds. Sow the seed a few inches apart and thin the plants to 18 inches to two feet apart. Seven ounces of seed is sufficient for a hundred-foot row.

Sweet Potatoes.
It is desirable to have a row or two of sweet potatoes in the home garden. Set the plants in ridges 3 to 4 feet apart. Space the plants fourteen to eighteen inches apart. About seventy-five plants will be required for a hundred-foot row.

Brussels Sprouts.
Brussels sprouts may be planted in the garden where they are to grow or in a seed bed for transplanting. They should be grown in rows at least two feet apart and about an equal distance apart in the row. The sprouts will not appear until late fall.

Leeks.
Leek seed are planted like onion seed in drills from fifteen inches to two feet apart for hand cultivation, or two and a half feet apart for horse cultivation. The plants should be thinned to about four inches apart in the rows.

Parsley.
Parsley is sown in drills. A single drill a few feet in length will be sufficient for a family.

Collards.
Sow in drills eighteen inches apart for hand cultivation and thirty inches apart for horse cultivation. Thin to stand fourteen to eighteen inches apart in the row.

EMERGENCY FOOD MEASURES

Clemson College, S. C., May 14.—1. One peck of 100-day velvet beans planted in every acre of South Carolina corn before May 22, would release for human food, the entire corn crop, thus practically doubling in effect, the corn crop of South Carolina.

2. A row of early maturing bunch variety of cow peas planted between each row of corn, even though velvet beans be planted in corn rows, would produce 10,000,000 bushels of peas for human food and greatly cut down the necessity for costly meat diets.

3. Lima beans planted beside all fences and in fence corners, would yield in dry beans enough to largely eliminate our importation of such products.

4. Corn field beans planted between the hills of corn on the richest lands would yield in dry beans for winter use, thousands of bushels in each county.

5. Stubble lands may be planted, or sown to cow peas of the Iron or Brabham variety, the first maturing peas picked and threshed and the vines mowed at once for hay.

6. A few extra rows in snap beans will produce green beans enough to supply a family through the winter. They may be kept in earthen jars by covering with a brine made in the proportions of 1 pound, 9 ounces salt to one gallon of water. Cucumbers may be kept in the same way.

7. Any backyard may produce vegetables sufficient to supply the needs

VICTROLA!

The chosen Instrument of the World's greatest Artists

The Instrument which plays the greatest music is the Instrument of the Music which an Instrument brings. You have applied to it the vital tests.

The Victrola is supreme. Its supremacy is founded on other Bases of great things actually accomplished. It is millions of homes the world over, because it takes into these homes all that is best in every branch of music and entertainment.

The artist who makes records exclusively for victor are the greatest artists in the world. The Victrola tone is the true and faithful tone of the singer's voice and master's instrument. It is for this reason that Victrola is the chosen Instrument of practically every famous artist in the world of Opera, Instrumental Music, Sacred Music, Band Music, Dance Music, Vaudeville Entertainment.

Victrola \$15, \$25, \$40, \$50, \$75, \$100, \$150, \$200, \$300, in stock. The greatest values for your money is the \$50 75, 100 machines. Any of these Machines are sold on easy payment plan to suit the buyer.

We carry thousands of Records. Send for a catalogue, and order your records by mail. We send by mail any records in Cal with money enclosed and we prepay records to your home.

Here is something for you if you do not want to put much money in machines.

ONE MILLER TALKING MACHINE and Six Victor Selections, with 300 Needles, sent to any home for \$12.50.

This is a good Machine as many Talking Machine Dealers sell for 25.00. Examine it and if not satisfactory at end of three days return to us and get your money back.

SUMTER TALKING MACHINE CO.,
No. 28 North Main St., SUMTER, S. C.

of a family with lettuce, radishes, onions and rape for salad.

8. A few old flour or lime barrels with holes bored in the bottom and sunk in a backyard, may be filled with rich earth and compost or high-grade fertilizers, planted to cucumbers or Irish potatoes, and a tub of water set near with an old piece of rope with one end in the water and the other end at the root of plants, can be made to resist any drought and produce a wonderful supply of vegetables.

Plant the potatoes in the bottom of the barrel in soil 6 inches deep. When potatoes are 6 inches high, cover with rich soil to within one inch of top of plants. Repeat this until barrel is full of soil.

BAGGING GRAPES

Clemson College, S. C., May 14.—While it is not profitable to bag in a commercial vineyard, it will always prove successful in a home vineyard. By bagging the ripening period can be held back for two weeks. Besides, when grapes are thoroughly sprayed and bags put on immediately, there is not so much danger of rotting. Bagging keeps birds and bees from injuring the grapes. Therefore, more perfect bunches are produced.

COMING AGAIN!

DR. I. W. ISRAELSON,

of Sumter, will be in Manning at Dr. Huggin's Pharmacy, in the near future.

Half the ills that women is heir to are caused by eyestrain; and the trouble is that they do not know it.

How often, after reading or sewing do you say "my eyes are so tired?" This would never happen if you wore properly fitted glasses.

I have the ability, experience and equipment to examine eyes and make glasses that will give you the maximum of comfort.

Let me tell you whether glasses will help your sight.

Ask to see the famous KRYPTOK GLASSES. Invisible bifocals.

IF YOU NEED GLASSES, YOU NEED ME.

Office in Sumter National Bank of Sumter Building.

MUSCLE SORENESS RELIEVED

Unusual work, bending and lifting or strenuous exercise is a strain on the muscles, they become sore and stiff, you are crippled and in pain. Sloan's Liniment brings you quick relief, easy to apply, it penetrates without rubbing and drives out the soreness. A clear liquid, cleaner than musky plasters or ointments, it does not stain the skin or clog the pores. Always have a bottle handy for the pains aches or rheumatism, gout, lumbago, grippe, bruises, stiffness, backache and all external pain. At your druggist, 25c.—adv.

Method of Bagging.

Place the bunch in a strong three-pound paper bag, such as is used in a grocery store. Fold the corners and pin securely around the stem just above the grapes. A small hole about one-half inch in diameter should be cut in one corner of the bag at the bottom to allow water to run out. The bags are not costly but it takes some time to put them on. In the home vineyard it is a very paying proposition as it gives you a longer ripening period and more perfect bunches.

HOG CHOLERA

Every Farmer Should know How to Inject Cholera Serum.

Clemson College, S. C., May 14.—Write to Dr. R. O. Feeley, Clemson College, S. C., and request a free bulletin on hog cholera symptoms, and post yourself. When your hogs show these symptoms, phone or wire your county demonstration agent at once for aid, unless you have already had his services, in which case you ought to know how to proceed without his help. It is impossible for him to see every man's hogs, so it will be necessary for you to learn to treat them yourself after one demonstration. "Prevention is worth more than cure" is an old adage which applies especially to this malady.

Dairy Sanitation Suggestions.

Clemson College, S. C., May 14.—1. Have the herd examined at least once a year by a competent veterinarian. Promptly remove animals suspected of being in bad health. Never add an animal to the herd until certain it is free from disease, particularly tuberculosis.

2. Never allow a cow to be excited by fast driving, abuse or unnecessary disturbance.

3. Clean the entire body of the cow daily. Hair in the region of the udder should be kept short by clipping.

4. Do not allow strong-flavored food, like cabbage or turnips, to be eaten except immediately after milking. Changes in feed should be made gradually.

5. Provide fresh, pure drinking water in abundance.

DOES THE COUNTRY BABY DRINK CLEAN MILK?

Clemson College, S. C., May 14.—No town of any size allows milk to be sold in its limits that has not been produced under certain prescribed sanitary conditions. To sell milk in the city means that every precaution is taken to see that the milk is produced in a sanitary way; that the cows are free of any disease, and that the barn, milkers, and utensils are clean. In most cases men do the milking. On the farm under average conditions a small boy or some one

else who wants to get out of the job does the milking. In too many cases no care is used to produce clean milk, the object being to get the milking done in the quickest and not in the best way. The result is that often milk that is very dirty is brought into the house. Then no matter how clean the milk is handled thereafter it gets bad very fast. To get clean milk, begin with the cow and the milker. A simple test to see whether the milk is clean is as follows: Wash a quart bottle clean, fill it with fresh milk and place in a warm place. If the clabber when formed is solid and later sinks to the bottom with the whey on top, the milk is clean. If the clabber is full of holes like yeast bread and soon rises to the top with the whey on the bottom, the milk is dirty. Care should be taken to produce clean milk on the farm. Is it not just as important of the country baby to drink clear milk as it is for the city baby?

VERY IMPORTANT.

The available supplies of foodstuffs are the lowest in all food-producing countries that they have been for over fifty years.

Prices of most foodstuffs have about doubled during the past two or three years.

The government crop report forecasts a wheat crop which will be short of American consumption.

The reserve supplies of meats are far below normal.

A nation at war requires more food than a nation at peace.

France, England, Belgium and Italy are short of food and are largely dependent on American imports, and, unless some means is found of supplying them, they can not continue to fight effectively.

The South is importing from the West and North \$600,000,000 to \$700,000,000 worth of foodstuffs annually and is thus a tremendous drain on the nation's food resources and, consequently, is now a menace to the nation's safety.

A pound of cotton at 20c will actually buy less foodstuffs now than normally.

We must raise what we eat.

THE HOME BANK AND TRUST COMPANY

For the Housekeeper!

The best line Ranges, Oil and Gasoline Cook Stoves ever shown in Manning.

For the Farmer

The best Corn and Cotton Planters, Guano Distributors, Harrows and all Farm Tools. One or two of those splendid two-horse Disc Harrows left at less than cost. Come and see.

We Handle Dental Creams and Tooth Brushes that Encourage Healthful Habits

Don't Neglect Your Teeth a Day

Every person—young and old—should acquire the habit of brushing the teeth daily.

Parents can do their children a lifetime favor by encouraging the proper use of the tooth brush until it becomes a regular habit.

The best and easiest way to acquire this habit—for both parent and child—is to use a tasty dentifrice.

We can furnish you with any of the best dental creams, powders or liquids. Also tooth brushes in all styles and prices.

DICKSON'S DRUG STORE

PLANT A PATCH OF Soy Beans

this year and commence getting ready for the boll weevil. We have a supply of seed on hand that we will sell at \$2.50 a bushel of one or more bushels.

75 cents a peck in quantities less than one bushel.

\$2.40 a bushel in original bags 2 and one-half bushels each.

One-half bushel will plant one acre in three foot rows. Yields from 16 to 40 bushels an acre.

We guarantee a cash market for all that is raised.

This is the most promising new crop that has ever been introduced in this section.

MANNING OIL MILL
