

Your Salary Needs a Bank!

You need the benefit of an account.

The bank needs co-operation for the welfare of the community and obviously for yourself.

Old age needs ready money.

Sickness needs a doctor, and the doctor needs his fee.

Earning power needs saving power.

A bank-account-man needs to ask nothing from anyone.

Farm Machinery!

We are agents in this county for one of the very best lines of Farm Machinery in the United States,

THE AVERY LINE!

We Have All Kinds of

- PLOWS,
- CULTIVATORS,
- STALK CUTTERS,
- COTTON PLANTERS,
- GRAIN DRILLS, Etc.

In fact, almost anything in the Farm Machine line.

See us first.

KEROSENE IS SAID TO BE GROWING SCARCER

Forward Lockers Worried Over The Future Supply.

Why are we worried about oil? Our future oil supply is a question which is troubling captains of industry and scientists, yet the reasons for this concern are generally understood by the average citizen. George Otis Smith, director of the U. S. Geological Survey, explains in a communication to the National Geographic Society: "In the course of the centuries the raw-material issue changes. In the long-bow epoch of England's military strength the conservationist feared a depletion of the yew wood which might give the Teuton, backed by his larger forests, an obvious advantage in light ordnance. Later, when Great Britain's naval power depended upon her wooden ships of war, the anxious naval chief foresaw a possible shortage of the oak which made the walls that stood between England and her enemies.

"Today those who plan for the future prosperity of their nation realize the extent to which other raw materials are essential to the general well-being and for some of these we can see no adequate substitutes.

"Foremost among these useful and least abundant, if not, indeed, irreplaceable commodities, stands mineral oil, or petroleum, and not only the conservative Briton, but the most optimistic American, may well ask himself, 'Where will my children and children's children get the oil that they may need in ever-increasing amounts?'

"But while the United States has contributed far more than half (61 per cent.) of the oil that the world has used for nearly 60 years, we have already reached the point where we are consuming more oil than we produce. Is this position of the world's greatest user of petroleum as safe as it is spectacular?

"We are the world's greatest consumers of petroleum; but, impressive as are the 1918 figures of consumption—413,077,133 barrels—no mind can easily grasp the idea of that quantity. Truly it is a flood of oil; for, if spread over the 60 square miles of the District of Columbia, these 413 million barrels would cover the area to a depth of nearly a foot and a half.

"Beginning with four miles of iron pipe laid down in western Pennsylvania at the close of the Civil War, this system now embraces a huge network of buried pipes from four to eight inches in diameter, trunk lines and laterals, aggregating nearly 30,000 miles.

"When most of us were in school, 'oil' meant kerosene, and gasoline or benzine was something to be bought in a bottle at the drug store or the paint shop.

"Today oil has become the premier motive power, not only on land and sea, but even in the heavens above and the depth below—truly the best servant of Mars and Mercury.

"Marshal Foch is quoted as saying that 'a drop of gasoline was worth a drop of blood.'

"The number and variety of uses of petroleum and its products are continually increasing, but even more striking is our increased dependence upon a few of the products of the oil refinery, notably gasoline, kerosene, the many types of lubricating oils, and fuel oil.

"There are said to be 300 or more products of petroleum, each with its own use. Some of these products serve merely our convenience, such as the artificial 'vanilla' flavoring or the cover of paraffine on the jar of jelly or marmalade; others were found during the war period to be absolutely essential to industry on a large scale—for example, the heavy oil used in tempering steel plates.

"It is when we think of the marvelous growth of the automotive industry that we realize a future demand for lubrication that staggers even the prophetic statistician. With more than six million pleasure automobiles operated in the United States alone, we have an annual consumption estimated, by the officials of the foremost company manufacturing high-grade lubricating oil, where twenty years ago the demand for this purpose was practically nothing.

ADVERTISE IN THE TIMES

CLOSE CALL FOR OFFICER

Highwayman's Gun Emptied, But Something Happened.

Newport News, Va., March 19—Officer Benjamin Bradford, a Newport News policeman, is thanking a small metal cartridge case, the splinters of his revolver stock and a handcuff key for his life. While attempting to arrest a negro highwayman near the city early today, Officer Bradford had the gunman's weapon emptied full into his body. One bullet stopped af-

ter tearing the cartridge case from the policeman's side. A second smashed Bradford's pistol stock into bits, while a third struck his handcuff key which he wore on the front of his belt, and was deflected so as to leave only a skin wound. As the police-

men wrenched the highwayman's upward two remaining bullets ripped the negro's hat brim away. Officer Bradford sent six shots from his broken weapon after the hastily retiring desperado, but his aim was ineffective and the man escaped.

Why Brunswick Tires Win Preference

There are two main reasons—one, the name itself, which certifies superfine value—the other, that time tells the same story.

Thus reputation and performance unite in giving you all you expect—and more.

Yet Brunswicks cost no more than like-type tires. Many motorists would pay more readily, but the Brunswick idea is to GIVE the utmost, rather than to GET the utmost. And this has been true since 1845. You can appreciate what Brunswick Standards mean by trying ONE Brunswick Tire. It will be a revelation. You'll agree that you could not buy a better, regardless of price.

And, like other motorists, you'll decide to have ALL Brunswicks. Then you'll know supreme satisfaction from your tires—longer life, minimum trouble, lower cost.

The Itching and Sting of Blazing, Fiery Eczema

Seems Like the Skin Is on Fire.

There is a harassing discomfort caused by Eczema that becomes a torture. The itching is almost unbearable, and the skin seems on fire with the burning irritation. A cure from local applications of salves and ointments is impossible, because such treatment can only allay the pain temporarily. The disease can only be reached by going deep down to its source.

The source of Eczema is in the blood, the disease being caused by an infection which breaks out through the skin. That is why the most satisfactory treatment for all so-called skin diseases is S. S. S., for this remedy so thoroughly cleanses the blood that no impurities can remain. Get a bottle today, and you will see results from the right treatment. Write for advice. Address Medical Director, 110 Swift Laboratory, Atlanta, Ga.

OUR BANK and THEY ARE INSEPARABLE Your Future

A good future without saving is something that doesn't often happen, you know.

Our institution is a progressive money saving and investing bank.

We solicit the patronage of those whose personal attributes are likewise—and those who earnestly desire to become such.

You never regret money saved. There is no use to regret when it is gone.
