Unusual Value—In Tires for the Smaller Cars

Not only is characteristic Goodyear merit conspicuous in Goodyear Tires for the smaller cars, but, ordinarily the first cost is found to be not greater than that of other tires; often it is actually less.

The combination of unusual value in first cost and very low final cost, of course, is a result of Goodyear experience, expertness and care employed as insistently in the making of 30x3-, 30x3½- and 31x4-inch tires as it is in the construction of the famous Goodyear Cord Tires used on the highest-priced automobiles.

For this reason more cars using these sizes were factory-equipped last year with Goodyear Tires than with any other kind.

Get this unusual tire value to enjoy on your Ford, Chevrolet, Dort, Maxwell, or other car using one of these sizes, at the nearest Goodyear Service Station. Get these tires and Goodyear Heavy Tourist Tubes at this station.

30x3½ Goodyear Double-Cure Fabric, All-Weather Tread \$23.50
30x3½ Goodyear Single-Cure Fabric, Anti-Skid Tread \$21.50

Goodyear Heavy Tourist Tubes are thick, strong tubes that reinforce casings properly. Why risk a good casing with a cheap tube? Goodyear Heavy Tourist Tubes cost little more than tubes of less merit. 30x3½ size in water-proof bag \$4.50

USE OF HOME-MADE DEVICES SWELLS POULTRY PROFITS

The More Capital Tied Up in Expensive Equipment, the Smaller the Net Profit From Flock—Home-made Devices Serve Their Purpose Well.

In a certain small town which needs no name, live William Black and John Smith. They are next-door neighbors and good friends, although totally unlike in temperament and disposition. Last year both of them became convinced of the value of a back-yard poultry flock and each decided to install chickens in his own spacious back yard to supply his family with eggs and broilers.

Mr. Black is the type of man who always quotes when anyone lifts an eye-brow at some of his extravagant purchases, "that the best is always the cheapest in the end." Mr. Smith, on the other hand, believes that often a cheaper article will serve the purpose equally well and that the difference in cost looks well in his savings account book.

Standardbred Fowls Selected. When it came to selecting a flock Mr. Smith and Mr. Black were agreed that standardbred fowls would more than pay for their increased initial expense by producing more eggs than would mongrels, so they arranged with a local chicken breeder for flocks of a good egg-producing strain. He was to deliver the birds as soon as accommodations were ready for them. On the matter of housing, the prospective poultry keepers held widely divergent views. Mr. Black hired a carpenter at \$6 a day to erect for him a good-looking, nicely finished poultry

house. When the last coat of paint was on it truly was, as his high-school son declared it to be, "a work of art."

A house so perfectly finished demanded the best of equipment and Mr. Black bought it. The number of things which he discovered, with the aid of a salesman, that a properly brought up flock of chickens should have was amazing to his family and depleting to his purse.

Mr. Smith, on the other hand, decided that he could build his own poultry house with the aid of his son. He procured two piano boxes and some smaller packing cases and they set to work. Both were handy with tools and in a short time the piano boxes had been converted into a comfortable, sanitary domicile for the chickens.

The piano-box house had been located in a corner of the yard where the fence which was already there would serve for two sides of the yard. A few posts and some chicken netting completed the inclosure. Quick-growing vines were planted and soon screened the yard and poultry house from view and the little shed served its purpose well. All the equipment for house and yard was made also from the useful packing box.

Both flocks were given good care and did well and the Black and Smith families enjoyed the strictly fresh poultry products. At the end of the year, however, Mr. Black declared that only a rich man could afford to keep poultry in the city. He was discussing the subject with Mr. Smith: "Of course, strictly fresh eggs taste better than any you can buy, but heavens, man, their cost! All we had cost me about \$2 a dozen, not to mention my work in caring for the flock. No, sir, no more back-yard poultry

keeping for me. I can't afford it." Then Mr. Smith spoke up: "Your trouble is that of many others who go into poultry raising. You spent too much on the house and equipment. Nests made out of orange boxes or coops made out of barrels may not look as elegant as those you can buy but they serve their purpose and cost almost nothing. My accounts show that the eggs my flock produced cost us much less than we could have bought them on the market, for aside from the flock itself, you see I had little capital invested in the project."

"I guess you are about right," said Mr. Black, "but I do like everything around my place to be well built." "So do I," retorted Mr. Smith, "but until I have a larger income I fear I can't have everything I want. When I built that shack over there for my chickens," he continued, "I didn't have any guide to go by, but the other day I picked up a United States Department of Agriculture farmers' bulletin that tells all about back-yard poultry keeping, and it gives instructions making just such a house as I made. I see they recommend inexpensive housing for back-yard flocks. It is Bulletin No. 889 and anyone can get it without cost by writing for it. Wish I had had a copy when I built, for it would have proven mighty helpful."

HUGH McCUTCHEEN
DIES AT KINGSTREE
One of Most Prominent Citizens of Williamsburg County Passes Away.

Kingstree, April 30.—Senator Hugh McCutchen died at his home in Kingstree this morning at 6 o'clock after an illness of three months. In his death Williamsburg county loses one of its best and most universally beloved and respected citizens.

He possessed a general and social disposition which made him a general favorite with old and young and his Christian character won for him a high place in the estimation of his fellowmen.

Mr. McCutchen was born in the old Indiantown section of Williamsburg county on December 11, 1859 and was

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL HARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1696. Guaranteed. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation.

the son of Col. and Mrs. James McCutchen, the latter of whom was prior to her marriage, Miss Mary Jane Gilland.

In 1886 he was married at the Indiantown Presbyterian church to Miss Louisa Dobbin of Fayetteville, N. C.

He succeeded his father as superintendent of the Indiantown Sunday School and at the time of his death was an elder in the Indiantown Presbyterian church, which position he held for more than twenty years.

Moves to Kingstree. For about fifteen years after his marriage, Mr. McCutchen had his home on his plantation in the Indiantown neighborhood, and he moved to Kingstree about twenty years ago. He continued his farming operations and always took a keen interest in the agriculture enterprises of his county. At the time of his death he was State Senator for Williamsburg county, and held the office of president in the following local concerns: Wee Nee Bank, Williamsburg Live Stock Company, Farmers' Supply Company, Fidelity Development Company and Canal Ginney Company.

Besides his widow he is survived by the following brothers and sisters: J. G. McCutchen and Thomas McCutchen, of Kingstree; Mrs. J. P. Russell of Lumberton, N. C.; Mrs. J. F. Cooper of Fowler; Mrs. L. Cottingham, of Dillon; D. E. McCutchen, of

Indiantown; Prof. George McCutchen, of the University of South Carolina and Dr. W. L. McCutchen of Sumter.

The funeral services will be conducted by Mr. Pritchett of the Indiantown Presbyterian church, assisted by Dr. J. O. Reavis, of the Columbia Theological Seminary. They will be held at the Williamsburg Presbyterian church at 12 o'clock Saturday and interment will be held at the Williamsburg cemetery.

SALT THE FLEAS TO DEATH

Last year was an unusually bad year for fleas about houses. The time is again at hand when, though the voice of the flea may not be heard in the land, his tickling will be felt in the flesh—unless the simple preventive is applied. Fleas usually get into the house from the basement or some place where dogs or other animals have slept. Make a thorough clean-up. Then sprinkle the floor well with salt and wet it down—not wet enough to cause it to run. It may be necessary to repeat this treatment two or three times at intervals of about three days.

Sanisep adds to home comfort

A SANISEP System settles permanently the question of sanitation. Quickly installed, out of sight below ground, your Sanisep System will take care of sewage forever. It is just as effective as a connection with city sewers.

The type we recommend connects with running water. Using the system, you can have a fully modern bathroom and kitchen drainage. The cost is moderate.

The Sanisep method is recommended by leading health authorities. It complies with strictest regulations. No chemicals—no cleaning—takes care of itself. A booklet describing Sanisep Systems for homes, schools, mines, mills and industrial villages will be sent on request. Inquiries are invited.
