## AMERICA HANDS OFF

### IN MCSWINNEY AFFAIR

Refuses to Interfere With Great Britain's Business

IS NOT AMERICAN CITIZEN

Not in Position to Make Protests; Says State Department.

New York, Sept. 6.—Peter J. MacSwiney, brother of the lord mayor of Cork, who is reported dying as the result of a hunger strike in Brixton prison, London, has made public a copy of a letter which he said he had received from the State Department in Washington, setting forth that it was "not in a position to make protests against the British authority" against the lord mayor's arrest. Mr. MacSwiney had requested the State Department to intervene in his brother's behalf.

The letter dated August 24 said: "The receipt of your letter of August 18, 1920, and your telegram of August 21, 1920, is acknowledged calling the department's attention to the alleged arrest and imprisonment of your brother, Terence MacSwiney, by the British authorities.

"In reply beg to inform you that, from precedent established in cases of this kind, the department finds it is not in a position to make protests to the British authorities against the arrest and imprisonment of one who, like your brother, is not a citizen of the United States."

### Report Weakness Increases.

London, Sept. 6.—At 9 o'clock tonight Lord Mayor MacSwiney was still living, but his weakness was increasing and the prison doctor suggested to his relatives that he be not allowed to converse because of the waste of his strength. His wife and sisters spent several hours in the prison today. On leaving this evening, his wife said:

"You can hardly imagine that he could be so bad and still survive. Our only hope now is in America and for American financiers to withdraw their money from English securities. Apparently labor in England can do nothing for us."

### Would Release on Conditions.

London, Sept. 7.—A dispatch to the London Times from Liege, Belgium, quotes David Lloyd George, the British prime minister, as saying that if guarantees are given that the murder of policemen in Ireland will cease the premier is convinced that Lord Mayor MacSwiney and the other hunger strikers will be released from prison. Other special dispatches tend to confirm the interview printed in the Times.

## USE OF TELEPHONE IN SOUTH AMERICA

Net Work About 100 Times More Dense in U. S. Other Figures Cited.

New York, Sept. 6.—There is only one telephone for every 300 population in Central and South America according to figures made public after a survey by the American Telephone and Telegraph Company. In the other American republics the telephone is far from being the universal means of communication that it is in this country and the main development there is in the big cities, the other areas being very poorly served. The telephone network is about a hundred times as dense in this country as a whole, as it is there. In point of the number of telephones per hundred of population, the service here is more than thirty times as good.

The total of 25,403 telephones in all the South and Central American countries, including Cuba and Haiti, should be compared with the twelve million in the United States, which have about the same total population. Argentine leads with 105,205 telephones, or nearly a third of the total. The other countries having more than

10,000 telephones are: Brazil 67,366; Mexico, 440,211; Cuba, 28,152; Chile 23,670 and Uruguay, 19,486 Haiti with a total of 2500,000 people, has eighty-two telephones.

### Telephones Scarce.

Only one telephone for about every 300 population is found in the whole area, as compared with 11,39 for every hundred of population in the United States at the same date, or about thirty-four for every 300 population. Uruguay leads the Latin-American countries in point of telephone density with 1.34 telephones per hundred people. The only other countries having as much as one telephone per hundred population are Argentine, Cuba and Panama. In the three countries having the highest telephone development, the systems are almost wholly under private ownership.

The total telephone wire mileage is 905,587 compared with 29,800,000 in this country. Taking into consideration the fact that the total area of the South and Central American countries is 8,476,600 square miles, compared with the 3,027,000 square miles of the United States there is only about one tenth of a mile of wire for every square mile in the Latin countries, while there is nearly ten miles for every square mile here. This means that the telephone network is nearly a hundred times as highly developed here as down there.

### Extent of Service.

The extent to which the countries are served by their systems is indicated by the figures showing the telephone development in the largest city in each country. Havana, Cuba, is the most highly developed with 5.5 telephones per hundred population. Taking in all of Cuba, however, there is only one telephone per hundred people. Mexico City has 3.9 per hundred. Mexico as a whole has only 0.25 tele-

phones per hundred population. Figures show 1 countries the in the large areas are in condition is the United States New York City hundred a whole Here is a smallest fa.

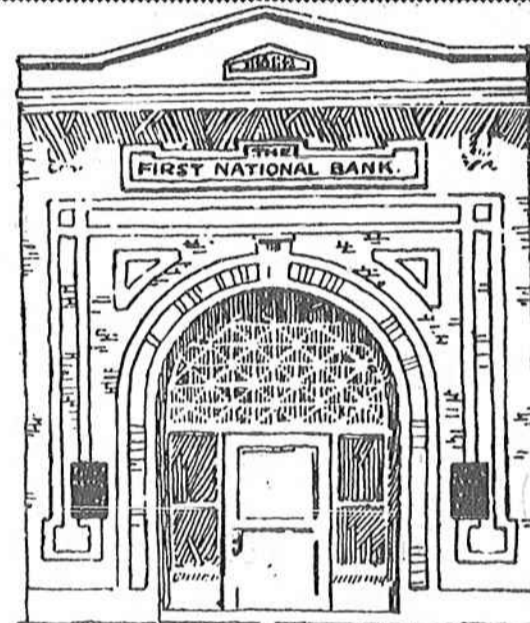

## BITTER CA.

Concord, N. H., Sept. 7.—Shire men and women the first time, will vote maries tomorrow for Repub. Democratic candidates for States Senator, Congress an error. Chief interest in the I can fight has been aroused by fort of Huntley H. Spaulding State food administrator, to Senator George H. Moses for a nation.

The contest has been wage much bitterness. The Sp forces have made much of Most sistent opposition to woman s in an effort to swing the w vote to their candidate, whi State Anti-Suffrage Associa' published appeals to women opposed suffrage to rep' primaries and vote for a.

## DIE FROM POISONOUS

Baltimore, Sept. 7.—employees of Edgewood this city, are dead an perately ill as a resul some from of poisonous a ary authorities said they did no whether the men brought their in with them or drank some alcohol kept on the post for ni purposes.
