

## An Additional Money Crop!

(This drawing is from a photo of a thoroughbred Angora Goat with wool 36 inches long.)

Farmers always have been permitting weeds and small undergrowths to be a source of expense and annoyance to them when by the use of a few goats they can be turned into real money. The U. S. Department of Agriculture says goats do best in weeds and underbrush. There is a great deal of land of that description in this section.

In 1915 the U. S. imported 432,000 goat skins and over 10,000,000 pounds of Mohair—goat's wool. Goat meat sells in retail stores at the same price as mutton and grade Angoras yield about 5 pounds of wool per year, worth 80 cents per pound.

Bucks like the above can be secured to grade up the common or garden variety in a short time to a high profitable basis. This bank believes that a few high-bred goats will add materially to the wealth of this community. Let's co-operate.

The Bank That Serves

### Agricultural Department

On account of my health the Bank has given me an extended leave, and I will be away from the Bank for sometime, this being the case we will be compelled to discontinue this column until my return, which I hope to be not later than September 1st, at which time we expect to again offer this column to the Farmers and others as a medium of exchange.

Until Mr. Musser's return the Bank will be glad to take all calls for Hog Cholera work and turn them over to Dr. Wood who is doing this work and is occupying my office.

It has been a pleasure for both the Bank and myself to serve you, which we hope and expect to continue to do.

Yours Respectfully,

C. A. McFADDIN,

Agricultural Agent, Home Bank and Trust Company.

J. I. Morris, Gable, Route 1, has a fine Milch Cow for sale. Will be milking in three weeks. Price \$100.

### LONDON TIMES ASKING WHO IS FEEDING McSWINNEY

"It is suggested that his visitors, Priests and Relatives are giving him sufficient food to keep him alive."

London, Sept. 19.—The condition of Terence MacSwiney, Lord Mayor of Cork, was reported unchanged in three bulletins issued today by the Irish Self Determination League, although he appeared somewhat refreshed by two hours' sleep during the night. This evening's bulletin, given out after Mrs. MacSwiney's daily visit to her husband, said:

"He is extremely weak, but still conscious."

Considerable talk was occasioned today by a paragraph appearing in the Sunday Times under the head "Who is feeding MacSwiney?"

It says: "Everybody is asking who is feeding him. There is no doubt at all that the government is not giving him food or any of the prison officials. It is suggested that his visitors, priests and relatives, are giving him sufficient food to keep him alive."

Pointing out that Mr. MacSwiney and the Cork hunger strikers have virtually equalled Dr. Tanner's forty-day fast, the newspaper asks now the first twelve men to be found—Mayor MacSwiney and the eleven in Cork—when they tried to go without food could equal Dr. Tanner's record which excited the wonder of the world. In reply to this O'Brien, of the Irish Self-Determination League, said:

"Nourishment or food of any kind is not being given to the Lord Mayor."

The fast of Dr. Henry S. Tanner which lasted forty days was carried out under supervision of a New York medical college in the summer of 1880. Dr. Tanner had previously abstained from food from periods of many days one of his efforts, unofficially reported, covering a period of 42 days. It was the doubt expressed regarding this achievement that impelled him to undergo his world famous 40 day fast. He was then 49 years of age and he lived to be 87.

#### Report McSwiney Better

London, Sept. 19.—Terence MacSwiney, lord mayor of Cork, passed a somewhat better night in Brixton prison having two hours' sleep, which seemed to have refreshed him slightly says a bulletin issued by the Irish Self Determination League at noon today, the thirty-eighth day of the lord mayor's hunger strike.

Otherwise, the bulletin adds, MacSwiney's condition is much the same today as yesterday. He is extremely weak, but not quite so exhausted, and still is conscious.

#### Believes Government Firm.

Belfast, Sept. 19.—Sir Hamar Greenwood, chief secretary for Ireland, has informed the magistrates of County Louth that he can hold out no hope that the British government will reverse its decision in the case of lord Mayor MacSwiney of Cork on hunger strike in Brixton jail. The magistrates recently sent a communication to Sir Hamar demanding full self-government for Ireland, with powers not less comprehensive than this enjoyed by any dominion and calling for the immediate release of MacSwiney. The chief secretary's reply to the magistrates says:

"I can hold out no hope of reversal of the decision of the government in the case of the Lord Mayor of Cork. I can assure you the government is desirous granting the fullest possible measure of self-government to the Irish people and would welcome an expression of moderate opinions directed to the unfortunate state of affairs."

Belfast, Sept. 19.—Soldiers who had been in ambush since early morning surprised a body of Sinn Feiners at bombing practice in the hills today. One Republican was killed; two were wounded and thirty-five captured.

#### BOLL WEEVIL POISONING

Clemson College, September 19.—A good example of the effectiveness of the use of cal-arsenate in boll weevil control is given in a recent report from Willard T. Kyzer, County Agent of Orangeburg County, who writes as follows:

"The farms of Anthony Fogle and

Fogle Brothers near Norway were visited on Monday to ascertain the results of applying cal-arsenate to cotton in boll weevil control. I visited this farm July 9th and advised that this poison be tried, as the infestation had at that time reached 20 per cent. A week later poisoning was started and applied every four days as directed, for four applications.

"At the time this poisoning was begun, very few grown bolls were to be found, but when visited last, August 9th, the plants had matured bolls within 4 to 6 inches of the top. Weevils were in abundance however, but it had been about four weeks since the last application of poison. This seems to show that there is merit in the poisoning here under South Carolina conditions.

"These parties were very much pleased with the results gotten, and felt that they had been more than doubly repaid for the expense incurred. Only eight acres were poisoned, and the squares were picked up twice each week."
