

TUESDAY, DEC. 28

At 12 O'clock

BARBECUE

to out-of-town people, and at 1 O'clock

Sale of 42 Head

of Bred Sows and Gilts of the best blood

Every sow has been double treated against cholera. We hold this sale rain or shine in heated barn on farm, half mile of Manning.

On account of the scarcity of cash we are going to sell these sows at auction on the following terms: 10 per cent cash and note for balance due Oct. 1st, 1921. We will give 7 per cent discount to any who pay all cash. The note we will use will read as follows:

\$_____ MANNING, S. C., _____ 192____
 _____ next after date _____ promise to pay to
 Bradham Duroc Farm or Order at any Bank in Manning, S. C.
 _____ Dollars,
 value received.

This obligation to bear interest from date until paid, at the rate of eight per cent per annum. NOW, to secure the payment of this obligation, and in consideration of One Dollar paid to me by the said Bradham Duroc Farm, I have bargained and sold and do hereby bargain and sell unto Bradham Duroc Farm the following chattels, to wit:

Sow _____ name _____, No. _____
 Sow _____ name _____, No. _____
 Sow _____ name _____, No. _____
 Sdw _____ name _____, No. _____

And all future increase of the said sows.

TO HAVE AND TO HOLD all and singular the said goods and chattels unto the said Bradham Duroc Farm, their heirs or assigns, forever. And should the said mortgagor default in the payment of the sum of money at the time stated then the said Bradham Duroc Farm or their assigns may enter and seize and sell the same, with or without notice, to satisfy the debt and expenses of seizure and sale.

Signed, Sealed and Delivered in the presence of _____ (L. S.)

We heartily favor the plan of the Bradham Duroc Farm to assist the farmers of this county to turn some of their attention away from cotton and to live stock raising and urge our farmers to accept the liberal terms offered.

FIRST NATIONAL BANK, THE BANK OF MANNING,
 By W. C. Davis, President. By Joseph Sprott, President.
 HOME BANK & TRUST CO.,
 By Charlton DuRant, President.

We expect these sows to sell cheaper than in our July sale, and this will give you an opportunity of buying seed stock, bred in the purpose, for a minimum price.

BRADHAM DUROC FARM.

REPORT OF BOARD OF VISITORS

Clemson College, December 22.—The report of the Board of Visitors, which made the annual inspection of Clemson College last May, was received and read by the Board of Trustees at its regular annual meeting on December 1st. The Board of Visitors is made up of one prominent citizen from each district, elected by the Board of Trustees at its April meeting.

For 1920 the following constituted the Board: first district, Mr. W. W. Smoak, Walterboro; second district, Mr. H. M. Cassels, Ellenton; third district, Sen. T. F. Watkins, Anderson; fourth district, Prof. G. A. Buist, Greenville; fifth district, Mr. Mendel L. Smith, Camden; sixth district, Mr. E. P. Miller, Bennettsville; seventh district, Judge B. Hart Moss, Orangeburg.

This Board visited the college on May 5th and 6th, and made a thorough and systematic inspection of all phases of the college life and operation, giving special attention to the cadet barracks, the mess, and other phases of student life. The following is the report submitted.

The Report
 To the Honorable Board of Trustees, of Clemson Agricultural College, Clemson College, S. C.
 Gentlemen:

The Board of Visitors, in accordance with the law of this State, after due notice, visited Clemson College on May 5th and 6th, 1920, and on that date and the day following made a thorough and systematic inspection and investigation of practically all phases of the college operation and life. Some of the Board of Visitors were detained by sickness or other causes, and those making the inspection were Messrs B. H. Moss, G. A. Buist, H. M. Cassels and T. F. Watkins.

Our inspection was much facilitated by the arrangement made for our accommodation and by the courtesies and assistance rendered to us by the President, several members of the faculty, and several representatives of the student body.

We had the opportunity of seeing the cadet corps in military drill, made a thorough inspection of the hog barns and farm, the dairy barns and dairy cattle, the veterinary hospital, the Y. M. C. A. building and its appliances, the central power station, the John C. Calhoun mansion, fortunately reserved as a shrine for patriotic South Carolinians, and the main college building, all on the first day. That evening we had a very interesting and instructive meeting with a number of the members of the faculty and with representatives of the college press, these three students being representative men elected by the student body and men who from their student officers were in touch with student sentiment. At this meeting we were given a thorough insight into the administrative and accounting systems in use at the college and had also a free round-table discussion of all phases of college student life. On the second day, after attendance at chapel service, we inspected the Agricultural Department, Chemistry Department, including the fertilizer inspection and analysis division. We inspected carefully the student rooms, toilets and baths, the water supply, the kitchen and store rooms, or commissary, dining hall, the refrigerating plant and the abbatoire. After dinner with the cadets, at which we were assured by them only a typical menu was served, we inspected the Textile Department, Engineering Department and site for the proposed hospital.

In the first place, we wish to report that the splendid physical condition of the cadet corps was so obvious from their appearance that our subsequent investigation of the records on this matter was hardly necessary, and but merely verified

WELDING

Is an Art or Not

According to the ability of the operator. We employ only the best welders that money and equipment can secure. Don't be discouraged by your experience with makeshift welders. Ship your work to us and get it off your mind.

In addition we operate a first class automobile machine and repair shop and can make axles, gears other parts, etc., on short notice.

Gas engines are another of our specialties.

what we were sure was the case, that the health of the students is as fine as could be in so large a body. This is not surprising in view of the setting-up exercises, regular life and other benefits of your military discipline and drill, when coupled with the sanitary conditions, water supply and supply and preparation of food. We were satisfied and cheerfully report that we do not see how the quality and preparation of the food could be better except at enormously greater and unreasonable expense. In our opinion there is no necessity or reason for serving better or more food than was being served at the time of our inspection. Our inquiries at random among the student body and directly with the representatives that we talked freely with on several occasions convinced us that the food then being served was typical of the food that had been served all spring.

We further report that in our opinion the plant is being run at as high a degree of efficiency as is obtained in any business or other organization that we are acquainted with, and that the State is getting the maximum amount of results for every dollar invested in this great plant. We congratulate the State of South Carolina on the great asset it has in Clemson College and the educators connected with it, and only wish that the State and the taxpayers of the State were more fully informed of the character and extent of the facilities it offers to the students and to the people of the State, and took even greater advantage than is being taken of these splendid facilities and the services rendered by those entrusted with the administration of the college teaching and college work.

Recommendations

Our specific recommendations are:
 1st. That provision be made by the Legislature for the building of the infirmary or hospital which was planned before the war.

2nd. That the long distance telephone and telegraph service connecting the college with the rest of the State be improved and made available at a greater number of hours of the day and night than has been the case in the past.

3rd. That suggestions 1 and 2 submitted to the Committee on revision of the cadet regulations by the President in his letter of April 2nd, 1920, appended hereto as an exhibit, be put into effect, if this has not already been done.

Respectfully submitted,
 (Signed) T. Frank Watkins,
 Chairman, Board of Visitors.
 *Has already been done.—W. M. R.

DESTROY THE BOLL WEEVIL

Clemson College, December 22.—To make the Cotton Crop more certain and to make the weevil crop less certain for 1921, cotton growers should exert every effort, even if other work must be suspended to give right of way, to destroy millions of weevils just as soon as possible after picking is finished by cleaning up the old 1920 cotton stalks and other trash around in the fields. This is the advice of the entomologists of Clemson College.

Weevils are almost entirely dependent upon cotton for feeding and breeding. After the crop has matured, the late growth of squares (forms), blooms and young bolls makes a breeding place for the weevil. In old infested fields it is a common sight to find from one to six weevils on each growing plant in the field. This means that from 5,000 to 25,000 weevils per acre may be found at the time of the first killing frost. It is a well established fact that weevils developing late in fall are those which are most likely to pass the winter safely. It is therefore extremely important that this late weevil development be prevented as far as possible. Most of the weevils continue to feed and breed as long as green

cotton is to be found in fields. When the first killing frost occurs, most weevils seek protection from the cold by finding shelter in any kind of rubbish in or around the cotton fields as a place in which to pass the winter in the dormant state. This dormant condition is spoken of as hibernation. Normally, the weevils do not fly very far from the cotton fields for hibernation. The most favorable conditions for the weevil to pass the winter successfully are found in those fields in which the cotton stalks, dead grass, weeds, fallen leaves and other rubbish, commonly found in fields where no cleaning up is done until spring planting time, are allowed to remain.

Experiments have shown that when conditions have been made unfavorable by cleaning up the fields for the hibernation, as low as a fraction of one percent of weevils succeeded in passing the winter, while on the other hand, where fields have been left undisturbed during fall and winter, as high as 40 to 50 percent of weevils passed the winter successfully.

The earlier the stalks are destroyed and the fields cleaned by burning or turning under all rubbish cleaning ditch banks and fence corners, dirty orchards and pasture lots and waste lands adjoining the cotton field, the smaller the damage will be to the next year's crop.

Will you choose to destroy the weevils in the fall or have them destroy your crop next season?

INVESTIGATION REQUESTED

New York, Dec. 17.—A Congressional investigation of the textile industry was asked in a resolution adopted today by the executive council of the United Textile Workers of America which assembled here to consider the action of manufacturers in announcing wage cuts, effective this month.

The resolution, which requested that special attention be given the action of the manufacturers, urged members of the union not to strike at this time, because a strike would be "very satisfactory to the employers and would greatly assist them in the establishment of their so-called open shop propaganda."

CITATION NOTICE

STATE OF SOUTH CAROLINA, County of Clarendon
 By J. M. Windham, Probate Judge:
 Whereas, Ellison C. Asbell made suit to me to grant him Letters of Administration of the Estate and effects of Lawrence B. Asbell.

These are, therefore, to cite and admonish all and singular the Kindred and Creditors of the said Lawrence B. Asbell deceased, that they be and appear before me, in the Court of Probate, to be held at Manning on the 6th day of January next, after publication hereof, at 11 o'clock in the forenoon, to show cause, if any they have, why the said Administration should not be granted.

Given under my hand this 18th day of December, Anno Domini, 1920.
 J. M. Windham,
 Judge of Probate.

16799 DIED

in New York City alone from kidney trouble last year. Don't allow yourself to become a victim by neglecting pains and aches. Guard against this trouble by taking

GOLD MEDAL HAARLEM OIL (CAPSULES)

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Holland's national remedy since 1696. All druggists, three sizes. Guaranteed. Look for the name Gold Medal on every box and accept no imitation.

IT'S EASY TO PREVENT COLDS
 Keep the liver and kidneys in perfect condition. They throw off the germs and make colds impossible—if in perfect condition. A correct regulator will be found in
DR. HILTON'S LIFE
 for the liver and kidneys. Immediate relief is given in cases of constipation, indigestion and biliousness. It is pleasant to take, excites a pleasant sense of warmth in the stomach, diffusing itself through the system. Your druggist sells Dr. Hilton's Life with a "satisfaction or money refunded" guarantee. Colds and influenza are successfully treated by using Murray's Horchound Mullein and Tar, in conjunction with Dr. Hilton's Life. Manufactured by
