AMERICAN LEGION AFFAIRS IN SOUTH CAROLINA

(By B. E. Adams)

Col. Henry T. Thompson, former commander of the Fred H. Sexton Post at Florence, is engaged in bringing the legion rifle squad up to a high pitch of efficiency for the State convention August 23 and 24. The squad is drilling several times weekly and is expected to be in fine shape to lead the big parade which will likely be held in connection with the State legion meeting.

Mr. Jim Haines, of Walhalla, has addressed a letter to the World War veterans of Oconee county urging them to join the legion, as the "country looks to you and to me to set the example to the rest of the world in time to come." Mr. Haines is doing a good piece of work and deserves success. Other men in all sections of the State ought to devote some of their time to building up the great veterans' organization.

Richland county Post, at Columbia staged a campaign for new members the week of July 24 to 29. The Columbia veterans are making an effort to build up a good post at the capital city. Here is wishing them the greatest success in this worthy undertaking. The post has reduced its feet to $2.50 for the balance of 1922 and on thi basis is making a drive for 500 members.

Spartanburg Post has elected the following members as delegates to the State convention: J. M. Wallace, Miller C. Foster, John D. Hamer, G. C. Greene, W. Y. Dillard, M. S. Christman, Bernard Manning, Romaine Dreyer, R. C. Cline, Thomas Sykes, Bobo Burnett, William Bomar, Le-Roy Moore, Lem Grier, G. C. Brown, James A. Schwing, Howard McCravy, R. L. Hollman and Gregg Galbraith.

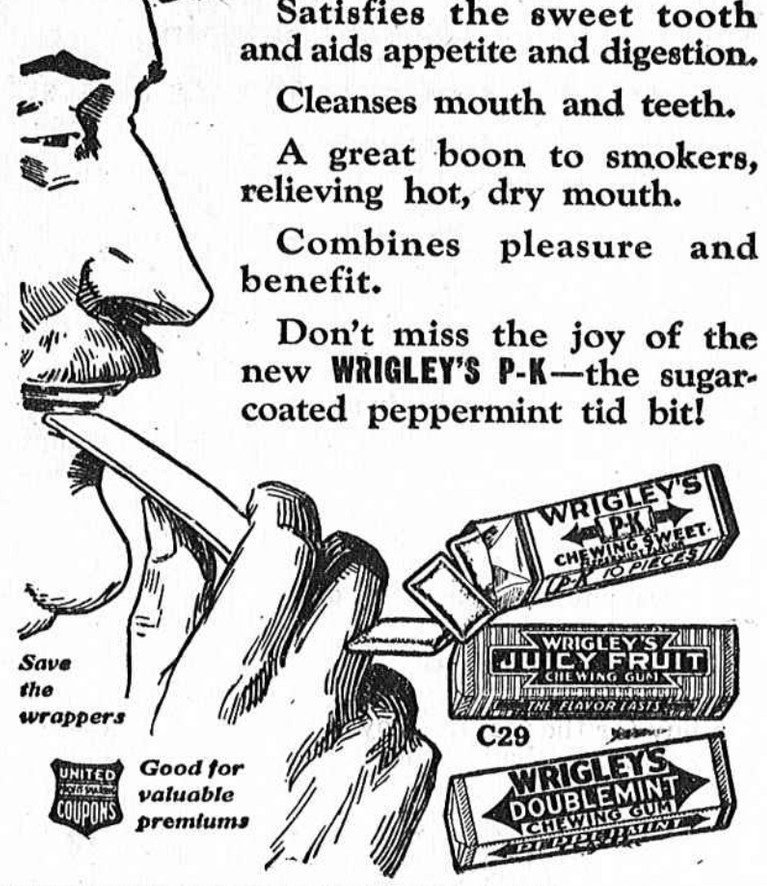
Mr. Andrew Manning has been appointed special representative to the convention to appear before the legislative committee to look after the interest of the Spartanburg Post. Mr. Jim Shepard, of Edgeleld, is chairman of the legislative committee.

The Summerville Post is workin gon plans for the erection of a club house. The house will probably be erected of logs and nicely finished inside, making a very attractive home. The Summerville Post has some hard workers on its rolls and no doubt its undertaking will be carried through. It is expected that the house will be located on a large lot where tennis courts and other attractions may be made available for the members.

AFTER EVERY MEAL

WRIGLEY'S

WRIGLEY'S SPEARMINT THE PERFECT GUM MINT LEAF FLAVOR THE FLAVOR LASTS



Satisfies the sweet tooth and aids appetite and digestion.

Cleanses mouth and teeth.

A great boon to smokers, relieving hot, dry mouth.

Combines pleasure and benefit.

Don't miss the joy of the new WRIGLEY'S P-K—the sugar-coated peppermint tid bit!

AUGUST FARM CALENDAR

Agronomy

Harrow frequently during August land that is to be planted in alfalfa in September to secure a firm smooth seed bed.

Make arrangements now for cover crop seed which are to be planted in September and October.

If you are unfortunate enough to have weedy terraces, clean them up thoroughly during this month.

Instead of pulling fodder for hay, plant a late crop of German millet or Sudan grass and get more hay with less labor and save the corn crop.

Horticulture

Plant rutabagas, snap beans, and Irish potatoes. Transplant cabbage.

Keep all vegetables gathered to encourage fruiting.

Cultivate old and young orchards and fertilize weak trees with stable manure or 8-4-4 fertilizer.

Watch the pecans and remove caterpillar worms.

Remove decayed grapes and when the harvest is over, give clean shallow cultivation.

Beans planted in late August usually bring a good price. Plant the Late Refugee variety.

Clean up the yard and fertilize the shrubbery that is not making good growth.

Animal Husbandry

Breed al lsows not previously settled for fall litters.

Breed all beef cows not previously bred for spring calves.

If convenient change livestock from one pasture to another, thus allowing fresh grass and control of parasites.

See that livestock has plenty of shade and pasture.

Destroy all stagnant pools now used as mud wallows.

Make use of pasture for idle horses and mules.

Get together as much hay for winter as possible.

Separate the pork hogs from the breeding stock and give the breeding stock especial attention.

Do not arrange to keep more livestock than you have feed for.

Fix up the weak links in the fence, and if possible get more of your land under fence.

Dairying

Heat and dirt are the causes of sour milk. Exercise great care to keep the milk clean and cool at all times.

Provide cows with shade during the hot days.

Plan now to show animals at community, county, or state fairs.

Corn, sorghum, Sudan grass, etc., pay well when fed green as soiling crops. Feed 20 to 30 pounds per day per cow.

Ask the dairy specialists for help with plans to remodel the old or build new dairy barns, silos, milk houses, etc.

Plant Pathology

Clean up the orchard after the crop is harvested. Burn, bury deeply, or feed to the hogs all diseased fruit and debris from under the trees. Trim out and burn all cankered or dead twigs.

Notify your seed dealer that you are going to require certified seed Irisr potatoes for next spring.

Tired

"I was weak and run-down," relates Mrs. Eula Burnett, of Dalton, Ga. "I was thin and just felt tired, all the time. I didn't rest well. I wasn't ever hungry. I knew, by this, I needed a tonic, and as there is none better than—

CARDUI

The Woman's Tonic

. . . I began using Cardui," continues Mrs. Burnett. "After my first bottle, I slept better and ate better. I took four bottles. Now I'm well, feel just fine, eat and sleep, my skin is clear and I have gained and sure feel that Cardui is the best tonic ever made."

Thousands of other women have found Cardui just as Mrs. Burnett did. It should help you.

At all druggists.

POISONING HINTS

Clemson College, July 31.—Farmers who are poisoning or who are about to poison for boll weevil control should remember the following suggestions by Prof. A. F. Conradi, Entomologist.

1. Unless the farmer is willing and is prepared and determined top oi son right, he had better not poison at all.

2. A farmer attempting to poison cotton on poor land may expect to fail.

3. Unless the picking of infested squares from the plants and from the ground is most thorough, no benefit may be expected. Squares collecting should be done thoroughly, under effective supervision, with labor that costs nothing or practically nothing in cash.

4. For the mule-drawn and mule-back-dusters, use gentle mules to avoid accident.

5. If the poison is of incorrect specifications, it may cause burning of the plants or it may fail to do any good. Both the U. S. Delta Laboratory and Clemson College have offered all spring, and are offering now, to examine the calcium arsenate samples free of charge, and will furnish upon request directions for sending samples.

6. Extension Service Information Card No. 22 contains specific recommendations on poisoning and is sent upon request.

7. Ask your county agent.

GASOLINE TAX URGED TO AID ROAD BUILDING AND UPKEEP

"Forty mililon dollars annually can be raised for road building and maintenane by a tax of 1 cent a gallon on gasoline." This statement was made recently by Thomas H. MacDonald, Chief of the Bureau of Public Roads, United States Department of Agriculture, in urging a readjustment of sources of revenue so that a larger proportion would be paid by the road user and a lesser percentage from State or local taxes.

"This method of raising funds," declared Mr. MacDonald, "is rapidly growing in favor and has been adopted in Arizona, Arkansas, Colorado, Connecticut, Georgia Kentucky, Louisiana, Maryland, Mississippi, Montana, New Mexico, North Carolina, Oregon, Pensylvania, South Carolina, South Dakota, and Washington. Of these States, only Oregon, New Mexico, Colorado, and Kentucky had such a tax prior to January 1, 1921. The tax in Maryland, Mississippi, and South Carolina has been adopted during the present year and several other States are considering such a tax."
