Freezers

Ice Cream Season Is Here

Here are some reasons we are selling the ALASKA freezer and why you should buy one:

The ALASKA DASHER with its open spoon floats whips the air into the cream, making it light, smooth and fluffy and imparting to the cream a delicacy not equaled by the common freezer.

The can is made of heavy American char-coal tinplate, high and narrow, exposing more of the cream to the chill of the ice and salt than in the old makes and insuring quickest freezing.

The can turns in one direction and the dasher in the opposite. Gears are covered-no chance of pinching the fingers. All metal parts in contact with the cream are heavily tinned. Outside metal parts are galvanized to prevent rust. A novel ice guard keeps all ice and salt from inside the can.
