American Bankers Association In

NEW YORK.—Active operations in many cities of mail box thieves, who open bank communications to customers, containing details of their accounts and cancelled checks showing their banking signatures, and use this material in perpetrating chack for geries, have led the American Bankers Association to issue a nation-wide warning to its members with instructions for combating this form of crime. The warning as sent out by James E. Baum in charge of the association's

Protective Department says:

Nationwide Warning Exposes

Methods and Gives Rules

to Combat Them.

"Heavy losses are being sustained hrough cancelled vouchers and state Big Fashion Show ments stolen from the mail boxes of bank depositors in apartment and of fice buildings, thus divulging the depositors' balances and supplying models for forged checks. As a step to put customers on guard against these methods, banks are urged to instruct every depositor to whom they mail statements of deposit accounts on the last business day of each month to the next day.

cancelled vouchers as they would blage of new styles. money. Such paper stolen by forgers soon puts real money in their hands. If all blank checks and cancelled vouchers were securely kept in safes instead of filing cabinets or desks, the check crooks would be denied their chief stock in trade, namely, genuine blank checks and signatures. Warnings to depositors against leaving blank or cancelled checks accessible to sneak thieves or burglars should be sent out at once.

"Estimates broadcast by surety companies indicate that individuals, merchants, hotels and others outside of banking are shouldering more than 99 per cent of the total amount of forgery losses. The bulk of forgery loss on checks is sustained by those who are willing to risk accepting them without reliable proof of identity or title of the presenter.

"Years ago the Protective Department of the American Bankers Association adopted the slogan, 'Strangers are not always crooks, but crooks are usually strangers.' If those outside of banking could be prevailed upon to observe this rule and think about it when considering accepting a check for their merchandise or services, for which they are also asked to give a substantial sum in cash in change, one of the biggest aids to the forgery business would be denied the crooks."

SCRUB BULL IS HALED TO COURT

Placed on Trial for Hindering **Development and Prosperity** of Dairy Industry.

Indicted for robbery, larceny, and a few other such charges, Scrub Bull went on trial for his life at Laurel, Mississippi, recently. It seems that for some time people had suspicions that Mr. Bull was hindering the right and lawful development of the dairy industry, thereby "maliciously and wilfully lowering production and decreasing profits in the dairy business," says the Bulletin of the American Bankers Association Agricultural Commission in commenting on the

This, it says, was the first trial of its kind ever held in that section and was attended by several hundred people. The jury, representing every vocation within the boundaries of the Laurel trade territory, rendered a unanimous verdict of "guilty." The death sentence was pronounced, "but during the night, before the sentence could be carried out, friends of the convict secretly spirited him away and he has not been seen since."

The arraignment came during the Milk Products Show sponsored by the banks of Laurel. People attending the show had the opportunity of also attending the bull's "trial" and went away firmly convinced of the seriousness of lax and out-of-date methods in the pursuit of dairying. The purposes of both the Milk Products Show and the trial were threefold, namely: to develop public sentiment for more and better Jerseys; to foster a more cooperative spirit for dairying and livestock growing, and to promote tick

The panks of Laurel entered into a cooperative arrangement in their efforts for fostering agricultural development and successful farming in the community, offering \$2,165 as premiums to the outstanding farm workers throughout the territory during 1929. An instructive booklet has been issued, showing the agricultural activity of the banks, together with announcements of contests for farmers, exhibits in the bank lobbies and prizes offered.

BANKERS DEVELOP HELP FORGERS NOVEL INSTITUTE

cooperation with the State College of Agriculture has sponsored a series of farmers' institutes in various parts of the State of an entirely new character. The principle feature is a large and comprehensive exhibit transported in four large trucks and set up at each stop. When set up it fills a space 40 by 60 feet and consists of panels, charts, and models on practically every phase of agriculture, including agronomy, horticulture, agricultural engineering, poultry, animal husbandry, soils and fertilizers, home economics and marketing. A large electrified farm model, showing the uses of electricity on the farm, model farm buildings and the ideal layout and landscaping of the farmstead. is one of the most elaborate and attrac tive exhibits.
