All except \$1.10 of the amount was expended for moving structures, with the remainder going to expenses of right-of-way agents.

In the state as a whole, the highway department spent \$41,985 last month on right-of-way expenses. The largest portion, \$26,833, was used to buy land. Also, \$11,329 was spent for moving structures, \$1,994 for salary and expenses of right-of-way agents, \$1,100 to pay for property and crop damage, \$716 for condemnation expense, and \$12 for legal expense.

Economist Discusses Wall Street and Its Newly-Found Religion

(By ROGER W. BABSON)

New York City, May 22.—Wall Street is getting religion! This does not mean that they are becoming interested in any form of theology or some special church denomination. But Wall Street certainly is awakening to Jesus' basic teaching—namely, helping our brother men.

For over 40 years, I have spent much time on Wall Street. I worked there in 1900 and have had an office there or close by ever since. Certainly, the Wall Streeters have been a self-satisfied group of people living largely—either directly or indirectly—on inherited money. These men felt perfectly safe whatever might happen believing that New York City with its wealth was fast becoming the financial and ruling center of the world.

Frankly, the game of old Wall Street was to sell out to the public when prices were high, letting the market drop to low levels until the public was forced to lose their stocks and then re-buy them and make millions. Until the Securities and Exchange commission came into being Wall Street could lie, browbeat, steal and get away with it. In short, Wall Street lived on exploiting others whether Americans, Europeans or Chinese.

This old complacency has completely gone. Wall Street is now definitely scared. It is scared of the U. S. department of justice, it is scared of congress and it is especially scared of Russian bombs. Wall Street really believes that if there should be a war with Russia the chances are 50-50 that New York City would be wiped out. This means that their business would be ruined and they would be lucky not to lose their lives by the bombing. The preaching of the atomic bomb by scientists is putting the "Fear of God" into Wall Streeters as the preaching of hell-fire by the churches put religion into their rural ancestors.

The new Wall Street is beginning to think about the old Golden Rule. It has already lost faith in armies and battleships; it is not sure that a big air force will save it. Wall Streeters are beginning to believe that Communism can be headed off by making the peoples of the world healthier, happier and more prosperous. They see that the real fight between Russia and America will consist of proving which system will make the people of Western Europe and Asia better fed, better clothed and better educated. Instead of longer trying to exploit people, they have at last concluded that they had better help people. This, of course, includes the people of the United States as well as those of England and of Western Europe.

If Wall Street sticks to this policy it should greatly lessen the "boom and bust" history of our country, should tend to stabilize business, prices and wages. Instead of looking for bigger business, more wages and higher prices, this new policy should tend to flatten out the curves. Any recession should be gradual. The old Area Theory which I have preached for 30 years, which was temporarily suspended by President Roosevelt, should again come into force.

This doesn't mean that the present good times will continue indefinitely. There are many other "streets" in this country which need more religion besides Wall Street. Stockholders, manufacturers, and shopkeepers must be content with smaller profits. Wagerworkers must do more work for their present wages. (This especially applies to the bricklayers who are a disgrace to the entire labor movement.) Politicians must use the same care about spending the taxpayers' money as they do about spending their own. We all need to observe the Golden Rule.

Usually when I come home from New York City, I am rather blue and pessimistic. The selfish, wasteful and unpatriotic atmosphere found there, not only on Wall Street but along the entire length of Broadway, has made me sad. For the first time in some years I have come back truly optimistic. Why? Because there are real signs of Wall Street getting religion. All we need now is to have this new spirit spread throughout the country to every city, town or farm.
