SHEDS DIRT... STAYS WHITE

DU PONT HOUSE PAINT
CLEANS ITSELF

Magnified Cross-Section shows Self-Cleaning Process

DIRTY PARTICLES
FINE WHITE POWDER

All paints collect dust and dirt during the first few months.

With Du Pont House Paint, a fine white powder forms on the surface after a few months.

Raise wash off this powder—and with it, much of the accumulated dirt and grime.

Self-Cleaning leaves surface clean and white... keeps it sparkling white for years. This cleaning process is gradual and does not adversely affect the long life of the paint.

DU PONT has never offered a finer product for protecting and beautifying the home! Du Pont House Paint protects against rust, rot, and decay... gives lasting beauty and protection. It is "Self-Cleaning"... starts white, stays white, as explained, at right. While this "Self-Cleaning" process starts within a few months on most surfaces, excessive soot or heavy shade... or stains from metal surfaces such as screens... may interfere with or delay this process.

"Self-Cleaning" Du Pont House Paint is also available in a variety of popular tints. It saves repainting bills. Call on a reliable painter for your painting jobs... ask him to use Du Pont House Paint.

NEW! DU PONT HOUSE PAINT PRIMER.
Especially formulated first-coater for bare wood and badly weathered painted surfaces. Provides excellent hiding and adhesion. Saves time and material.
