It happens at midnight

NORGE
with the new
Self-D-Froster

It's new . . . it's modern . . . it's exclusive . . . it's the new Norge Self-D-Froster — the refrigerator that DEFROSTS ITSELF! Just think of it . . . no more fuss and muss of manual defrosting . . . no button or dial controls. No melting of ice cubes . . . no exposure of food to outside air. Norge . . . and only Norge . . . eliminates these worries. Every night at midnight, while you sleep, the Self-D-Froster takes over.

Here's how the Self-D-Froster works!

This handsome electric clock, mounted on the refrigerator door, turns the mechanism off at midnight, switches it on after the coating of frost has melted.

Defrost water is carried away into the non-spill Handdefroster container, conveniently located and easily removable for emptying at your convenience.

Defrost water never collects in the Cold-pack . . . so there's no need to remove your meats. Sealed Giant Side Freezer keeps ice cubes frozen.
