If you're going to buy a low price car...be sure you get the better one!

Many people figure that since the car they are considering has historically had a "low-price" name it must be, in fact, a low-price car.

This, at one time, was true. But today the names of cars, as you may know, have very little to do with their prices. Many cars with traditional low-price names cost more than Mercury—a name you have always associated with higher price cars. Our point is this:

A Mercury Monterey, with deluxe appointments, is now priced \$31 to \$66 less* than any of the best selling Fords, Chevrolets, and Plymouths (the V-8 powered Galaxies, Impalas, and Furs). Yet Mercury offers you far more of everything you want in a car.

Some new-car buyers are skeptical when we tell them this price story. Here are some of the questions they ask—and our answers:

Q. "Do you mean Mercury is now a low-price car? Did you reduce prices?"
A. "Yes. Monterey prices are now \$174 lower, and include many extras that are now standard equipment."

Q. "But in your price comparison, aren't you talking about a 'stripped' Mercury—with rubber mats, plain interiors, no equipment, no glamour?"
A. "No, we're talking about a deluxe-appointed Monterey with beautiful nylon interior and deep, thick carpeting. The comparison is fair."

Q. "Do all Monterey models have as good a price story?"
A. "Yes, within a few dollars. It's the most amazing value story ever offered. Just read below."

*Based on comparison of manufacturers' suggested 1960 retail base prices for lowest-priced V-8 powered models.

MERCURY ADDS UP TO A BETTER LOW-PRICE CAR—Mercury has a 7 to 8 inch longer wheelbase than Galaxy, Impala, and Fury + 289 to 494 pounds more weight + up to 23% more insulation + more spacious passenger compartment + self-adjusting brakes + up to 28% more visibility + more luxurious interior + finer quality (every Mercury is road-tested before it is shipped, not just spot-checked as all other low-price cars) = Smoother ride, extra satisfaction.
