COLD FEET . . . ?

A generation ago some people thought rubbing the soles of the feet with grease would ward off a head cold. Today, we know better. Adequate rest and a well-balanced diet go a long way toward preventing colds. But, sometimes even the best precautions aren't good enough. When you are ill—whether you have a cold or something more serious—effective medications are important. They can be the difference between pain or comfort . . . slow or fast recovery. Let your physician decide the remedies you need. Then come to us for the prescribed medication.
