minated select company of peoples are great believers in Christian education; so I especially enjoyed the whole-hearted hospitality of the fine fellowship of the Presbyterian College campus.
The Thornwell home of the home-

less, both boys and girls, has long been a familiar name to me and I found it as fine a place as my friends in Georgia had told me it was.
It would exhaust the alphabet to try and describe the substantial

and beautiful architecture of the First Presbyterian Sanctuary and its kindred rooms of teaching.
The above is poorly said, but I was impressed beyond words with the Christian unity of your whole little city. There are countless larg-

er one on God's good earth, but I doubt if there is one better in the whole wide world.
NATH THOMPSON
P. S.: When I read this to the Camps they said, "Please sign our name, too."

ADVICE AND CONSENT
One of the important responsibilities placed upon the United States Senate by the Founding Fathers is found in Article II, Section 2, of the Constitution. This is the section which gives the president power to enter into treaties with foreign countries, "by and with the advice and consent of the Senate, provided two-thirds of the senators present concur." This is a very important responsibility because treaties, when ratified by the Senate, become just as much a part of the "supreme law of the land" as is the Constitution and the laws made in pursuance thereof.

During the past week, the Congress was called to ratify the new treaty between the United States and Japan. This treaty, as proposed, caused me much grave concern. I had certain reservations about some of its provisions, but I felt that in view of the serious world conditions we are facing today it was imperative that the Senate ratify this treaty and do so by an overwhelming vote. This the Senate did, by a vote of 80-2.

There were two compelling reasons in favor of ratification. First, the Communists in Japan have been leading riots against ratification of the treaty by the Japanese government, evidently because of the feeling that ratification would be in the best interest of their goal of communization of the world. If the U. S. Senate had refused to ratify the treaty at this critical time, such action would have played directly into the hands of the Communists, by insuring without question not only the downfall of Mr. Kishi but of the entire Japanese government, which is friendly to us. This would result in increased strength and prestige for the radical and riotous elements in Japan to the detriment of the overwhelming majority of the Japanese people, our own country, and the rest of the people in the free world.

Second, this treaty serves notice on Mr. Khrushchev and his Communist cohorts that the armed might of the United States stands firmly behind the Japanese people against Communist attack. The Senator's refusal to ratify the treaty would have been an open invitation to the Soviets to gobble up Japan, as they have so many other countries before and since World War II. Japan is without question the key to the Far East. Should it fall to Communist

VIEWS OF OUR READERS

To The Clinton Chronicle, Clinton, S. C.
I have recently had the privilege of being a guest of your city for a few days—may I expose my ignorance and express my appreciation of your Christian hospitality.
Being a "Georgia Cracker" and a Methodist preacher, my knowledge of the world was limited. Until I moved to your fair state I had never had the privilege of visiting Clinton. Now I know that it is a beautiful little city, as Mr. Oeland drove me around to see it for myself. I first wondered at his enthusiasm. When I saw it, I caught his joy!
Like my grandson, Ed Camp, I married a Presbyterian and I know that he made a good choice, because I did the same. In my "knocking about" I found that these pre-

IT ONLY **FEELS** LIKE POWER STEERING (Corvair doesn't need it)

Corvair's ingenious design simply places the engine in the rear. That means less weight on the front wheels and a lighter, happier feel in the curve of your hands. No power assist is needed in a car that's naturally nimble. See what a fresh engineering approach can do? From handling and parking ease right on, there just isn't anything ordinary or conventional about Corvair. Look at its practically flat floor, four-wheel independent suspension, fold-down rear seat. Its air-cooled rear engine that never needs water or antifreeze or radiator repairs... and leaves engine heat and noise back where you've been. All these special advantages are standard in every Corvair. Just wait till you see how much they add to your driving pleasure. But why wait?
