Sanitary Walls and Ceilings. O. Does the Bible have anything to say regarding sanitary walls? ... A. Read Leviticus, 14th Chapter, 38-41 O. What do modern sanitarians say.

A. That wall paper and glue halsomines are directly responsible for much of the sickare directly responsible for such of the sick-ness, ignorantly attributed to other causes. The Chicago Inter-Ocean, in an article on papering walls, under the caption of "Nasty Practice," has this to say.
"Our Health Officer, Dr. DeWolfe, says the free passage of air through walls of living rooms is an important element in proper ventilation. The practice of repapering rooms by layer upon layer of wall paper, made adhesive by glue or paste, which adds a decomposing material to the nasty practice can receive nothing but condemnation from the sanitarian. The perfect wall for domestic habitation is of material which resists decomposition in every form, and which its the free passage of air. It seems to The Doctor agrees with the Inter-Ocean,

that a special law should be passed to prevent the practice of pasting repeated layers of paper on the walls. Write the Alabastine Co., Grand Rapids. Mich., for supplement from the report of the Michigan State Board of Health, entitle I "Sanitary Walls and Ceilings"
Remember the name, Alabastine, made

from alabaster rock. A Blind Black Eel.

Mr. V. N. Edwards of the United States Fish Commission, has obtained from Cuttyhunk Pond a very singular eel. The eyes are entirely concealed under the skin and the color is uniformly darks almost black. In form and proportions it is like the common eel, and may prove to be merely a dark-colored, blind example of this species. Trout and other fish become dark in color as a result of blindness; and this may be ists, The length of the specimen is about thirteen inches.

REV. DR. TALMAGE

THE BROOKLYN DIVINE'S SUN DAY SERMON.

TRXT: "They took branches of palm trees and went forth to meet Him."—John xii., 18. How was that possible? How could palm branches be cast in the way of Christ as He approached Jerusalem? There are scarcely any palm trees in Central Palestine. Even the one that was carefully guarded for many years at Jericho has gone. I went over the very road by which Christ appedached Jernsalem, and there are planty of olive trees and fig trees, but no palm trees that I could see. You must remember that the climate has canagad. The palm tree likes water, but by the cutting down of the forest, which are leafly prayers for rain, the land has become unfriendly to the palm tree. Jericho once stood in seven miles of palm grove. Olivet was crowned with palms. The Dead Sea has on its banks the trunks of palm trees that floated down from some oldtime palm grove and are preserved from decay by the salt which they received from the Dead Sea. ne that was carefully guarded for many

Let woodmen spare the trees of America, if they would not ruinously change the cli-mate and bring to the soil barreuness instead of fertility. Thanks to God and the legislatures for Arbor Day, which plants trees try-ing to atone for the ruthlessness which has destroyed them. Yes, my text is in har-mony with the condition of that country on the morning of Palm Sunday. About three million people have come to Jerusalem to attend the religious festivities. Great news! Jesus will enter Jerusalem to-day. The sky is red with the morning, and the people are flocking out to the foot of Olivet, and hip and on over the southern shoulder of the mountain, and the procession coming out from the city meets the procession escorting Christ, as He comes toward the city. There

is a turn in the road waere Jerusalem sud-

denly bursts upon the vision.

We had ridden that day all the way from Jericho, and had visited the ruins of the house of Mary and Martha and Lazarus, and were somewhat weary of sight steing, when there suddenly arose before our vision Jerusalem, the religious capital of all Christian ages. That was the point of observation where my text comes in. Alexander rode Bucephalus, Duke Elie rode his famous Merchegay, Sir Henry Lawrence rode the high mettle! Conrai, Wellington rode his proud Copenhagen, but the conqueror of earth and heaven rides a colt, one that had been tied at the roadside. it was unbroken, and I have no doubt fractious at the vociferation of the populace. An extemporized saddle made out of the garments of the people was put on the beast.
While some people gripe i the bridle of the colt, others reverently waited upon Christ at the mountain.

The two processions of people now become ne-those who came out of the city and those who came over the hill. The orientals are more demonstrative than we of the western world, their voices louder, their gesticulations more violent and the symbols by which they express their emotions more significant. The people who left Phocea, in the far east, wishing to make impressive that they would never return, took a red hot ball of iron and threw it into the sea, and said they would never return to Phocea until that ball rose an I floated on the surface. Be not surprised, therefore, at the demonstra-

As the colt with its rider descends the slope of Olivet, the palm trees lining the roat are called upon to render their contribution to the contribution to the contribution of the contri bution to the scene of welcome and rejoic ing. The branches of these trees are high up, and some must needs climb the trees and tear another illustration of the phenomenon off the leaves and throw them down, and which is often observed by fish cultur- others make of these leaves an emerald pavement for the colt to trod on.

Long before that morning the palm tree had been typical of triumph. Herodotus and Strabo had thus described it. Leyard finds with the same significance. In the Greek with the same significance. In the Greek athletic games the victors carried paims. I am very glad that our Lord, who five days after had thorns upon his brow, for a little while at least had palms strewn under his feet. Oh, the gloribus paim! Amarasinga, the Hindoo scholar, calls it "the king among the grasses." Linneus calls it "the prince of varieties."

vegetation." Among all the trees that ever cast a shadow or yielded fruit or lifted their arms toward heaven, it has no equal for multitudinous uses. Do you want nowers? One palm tree will put forth a hanging garden of them, one cluster counted by a scientist containing 207,000 blooms. Do you want food? It is the chief diet of the whole nations. One palm in Chile will yield ninety gallons of honey. In Polynesia it is the chief food of the inhabitants. In India there are multitu 'es of people dependent upon it for sus-

Do you want cable to hold ships or cords to look wild beasts? It is wound into ropes unbreakable. Do you want articles of house farniture? It is twisted into mats and woven into baskets and shaped into drinking cups and swunz into hammocks. Do you want medicine? Its nut is the chief preventive of disease and the chief cure for vast populations. Do you want houses? Its wood turnshes the wall for the bornes, and its leaves thatch them. Do you need a supply for the antry? It yields sugar and starch an I oil and sago and milk and salt and wax and videgar and candles.

Ob the paint It has a variety of en low-ments, such as no other growth that ever rooted the earth or kisse! the heavens. To the willow. God says, "Stand by the water courses and weep." To the course me says, "Gather the harricines into your becom." To the fig. ree He says, "Bear fruit and put it within reach of all the people." But to the palm tree He says, "Be garden and sterehouse and wardrobe and ropewa'k and chandlery and bread and banquet an i manufactory, and then be type of what I meant when I inspired Davi', My servant, to say, 'The righteous shall flourish like a palm

Oh, Lord God, give us more palm treesmen and women made for nothing but to be useful; dispositions all abloom; branches of influence laden with fruit; people good for everything, as the palm tree. If kind words are wanted they are ready to utter them. If he pful deels are needed they are ready to perform them. If plans of usefulness are to be laid out they are ready to project them. If enterprises are to be forwarded they are ready to lift them. People who say "Yes! Yes!" when they are asked for assistance by word or deed, instead of "No!

Most of the mysteries that bother others do not bother me, because I adjourn them; but the mystery that really bothers are is why God made so many people who a acoust to nothing so far as the world's better nent to nothing so far as the world's better-nent is concerned. They stand in the way They object. They discuss hindranes. They suggest possibilities of failure. Over the road of life, instead of pulling in the traces, they are lying back in the breechings. They are the everlasting No. They are bramble trees, they are willows, always mourning; or wild cherry trees, yielding only the bitter or crab apple trees, projucing only the ter; or crab apple trees, producing only the sour, while God would have us all flourish

like the palm tree. Flanted in the proje that But how little any of us or all of us accomplish in that direction. We take twenty or thirty years to get fully ready for Chritian work, and in the after part of life we take ten or twenty years for the gradual closing of active work, and that leaves only so little time between opening an istopping work that all we accomplish is so little an angel of Godneeds to exert himself to see it

Nearly everything I see around, beneath and above in the natural world suggests "Meast C. L. Hood & Co.:

"Weak, Blind and Helpless."

"What art thou doing up there, little star? Why not shut thine eyes and s'eep for who cares for for thy shunng?"

"No," saith the star, "I will not sleep. I guide the sailor on the sea. I cheef the traveler among the mountains. I belo tip the dew the mountains. I help tip the dew

with light. Through the window of the poor man's cabin I cast a beam of hope and the child on her mother's lap asks in glee whitter I come and what I do and whence I ge. To gleam and glitter, God set me here. Awas! I have no time to slerp." The snowflake comes straggling down.

"Frail, fickle wanderer, why comest thou here?" "I am no idle wanderer," responds the snowflake. "High up in the air I was born, the child of the rain and the cold and at the divine behest I come, an I am no strangler, for God tells me where to put my crystal heel. To help cover the roots, the grain and griss, to cleanse the air, to make stortiguen more bandy and the lazle firs more bright. I come. Though so light I an that you toes me from your muffer and crush me under your foot, I am doing my best to fulfill want I was made for. Cottled in soil or in the course of the to white I come on a heavenly mission, and, when my work is done and Got shall cull, in morning vapor I shall go back, drawn by the flery courses of the sun."

"What doest thou, insignificant grass blade under my feet?" "I am daing a root," says the grass blade, "as best I can. I seep to make up the soft beauty of field and lawn. I am satisfiet, if, with millions of others no bigger than I, we can give pasture to flocks and herds. I am wonderfully made. He who feeds the ravens gives me substance from the soil and breath from the air, and He who clothes the lilies of the field rewards me with this coat of green."
"For what, lonely cloud, goest thou across the heavens". Through the bright air a

voice drops from afar, saying: "Up and down this sapphire floor I pace to teach men that like me they are passing away. I gather up the waters from lake and tea, and then, when the thunders toll, I rainesh the earth, making the dry ground to laugh with harmaning the dry ground to laugh with vests of wheat and fields of corn. leatch the frown of the storm and the hues of the rainbow. At evening tide on the western slopes I will pitch my tent, and over me shall dash the saffron, and the purple, and the fire of the sunset. A pillar of cloud like me led the chosen across the desert, and surrounded by such as I the Judge of Heaven and Earth will at last descend, for "Behold He cometh with clouds!" Ob, my friends, if anything in the inan-

imate world be useful, let us immortal men and women be useful, and in that respect be like the palm tree. But I must not be mpted by what David says of that green shaft of Palestine, that living and gle pillar of the eastern gardens, as seen in olden times—the paim tree; I must not be tempted

by what the Old Testament says of it, to lessen my emphasis of what John, the evan-gelist, says of it in my text. Notice that it was a beautiful and lawful robbery of the paim tree that helped make up Christ's triumph on the road to Jerusalem that Palm Sunday. The long, broad, green eaves that were strewn under the feet of the

colt and in the way of Christ were torn off from the trees. What a pity, some one might say, that those stately and graceful trees should be despoiled. The sap oozed out at the places where the branches broke. The glory of the palm tree was appropriately sacrificed for the Saviour's triumphal proession. So it always was, so it always will sort without the tearing down of something Brooklyn Bridge, the glory of our continent, must have two architects prostrated

the one slain by his toils and the other for a lifetime invalided. The greatest pictures of the world had, in their richest coloring, the blood of the artists who made them. The mightiest oratories that ever rolled through churches had in their pathos, the sigh and groans of the composers, who wore their ives out in writing the harmony. American ndependence was triumphant, but it moved on over the lifeless forms of tens of thou-sands of men who fell at Bunker Hill and Yorktown and the battles between which were the hemorrhages of the nation. The kingdom of God advances in all the earth, but it must be over the lives of missionaries who die of malaris in the jungles or Christian workers who preach and pray

and toil and die in the service. The Saviour

triumphs in all directions-but beauty and

strength must be torn down from the palm

trees of Christian heroism and consecration

and thrown in His pathway. To what better use could those palm trees on the southern shoulder of Mount Olivet end clear down into the Valley of Gethemane put their branches than to surrender them for the making of Christ's journey toward Jerusalem the more picturesque, more memorable and the more tiumphant? And to what better use could we put our lives than into the sacrifice for Christ His cause and the happiness our fellow creatures? Shall we not be eousness shall have triumphant way? Christ was torn down for us. Can we not afford to be torn down for Him? If Christ could suffer so much for us, can we not suffer a tittle for Christ? If He can afford on Palm Sunday to travel to Jerusalem to carry a cross, can we not afford a few leaves from our branches to make emerald His way? The process is going on every moment in all directions. What makes that father have such hard work to find the hymn today? He puts on his spectacles and holds the book close up, and then holds it far off, and is not quite sure whether the number of the hymn is 150 or 180, and the fingers with which he turns the leaves are very clumsy. He stoops a good deal, although once he was

hawk's, and the hand he offered to bride on the marriage day was of goodly shape and as God made it. years ago he resolved his family should have no need and his children should be well educated and suffer none of the disadvantages of lack of schooling from which he had suffered for a lifetime, and that the wolf of hunger should never put its paw on his doorsill, and for forty or fifty years he has been tearing off from the palm tree of his physi-cal strength and manly form branches to throw in the pathway of his household. It has cost him muscle and brain and health and eyesight, and there have been twisted off more years from his life than any man in the crowd on the famous Palm Sunday twisted off branches from the palm trees on the road from Bethpage to Jerusalem.

straight as an arrow, and his eyes were keen

What makes that mother look so much older than she really is? You say she ought not yet to have one gray line in her hair. The truth is the family was not always as well off as now. The married pair had a hard struggle at the start. Examine the tins of the forefinger and thumb of her right hand, and they will tell you the story of the needle that was plied day in and day out. Yes, look at both her han is, and they will tell the story of the time when she did her own work, her own mending and scrubbing

Yea, look into the face and read the story of scarlet fevers and croups and midnight watchings, then none but God and herself in at house were awake, and then the burials and the loneliness afterward, which was more exhausting than the preceding watching had been, and no one now to put to bed. How fair she once was, and as fair as the palm tree, but all the branches of her strength and beauty were long ago tern off and thrown into the pathway of her house-

Alas! that sons and daughters, themselves so straight and graceful and educated, should ever forget that they are walking today over the fallen strength of an industrious and honored parentage. A little ashamed, are you, at their ungrammatical utterances? It was through their sacrifices that you learned accuracy of speech. Do you lose patience with them because they are a little querulous and complaining. I guess you have forgotten how querulous and complaining you were when you were getting over that whooping cough or that inter sittent fever. A little annoyed, are you, because her hearing is poor and you have to tell her something twice? She was not always hard of hearing. When you

drink at midnight woke her from a sound sleep as quick as any one will waken at the cumpet call of the resurration Oh, my young lady, what is that under the sole of your fine shoes? SARATOGA CO. MIRACLE. ELPLESS FOR YEARS AND EX-CLUDED FROM HOSPITALS AS INCURABLE.

THE REMARKABLE EXPERIENCE OF CHAS-QUANT AS INVESTIGATED BY AN AL-BANY (N. Y.) JOURNAL RESORT ER-A STORY OF SUR-

PASSING INTEREST. Albany, N. Y. Journal, March 19th. SARATOGA, March 11th .- For some time past there have been reports here and elseable—indeed, so remarka le as to be miracu lous-cure of a most severe case of locomoto ataxia, or creeping paralysis, simply by the use of a popular remedy known as 'Pink Pills for Pale People," prepared and put up by the Dr. Williams Medicine Company, Morristown, N. Y., and Brockville, Out. The story was to the effect that Mr. Char. Quant, of Galway, who for the last six or eight years has been a great sufferer from creeping paralysis and its attendant ills, and who had become utterly powerless of all self-help, had, by the use of a few boxes of the Pink Pills for Pale People, been so fully restored to health as to be able to walk about the street without the aid of crutches. The fame of this wonderful, miraculous cure was so great that the Evening Journal re-porter thought it worth his walle to go to alway to call on Mr. Quant, to learn from his lips, and from the observation and testi-mony of his neighbors, it his alleged cure was a fact or only an unfounded rumor. And so he drove to Galway and spent a day and a night there in visiting Mr. Quant, getting his story and interviewing his neighbors and fellow-townsmen. It may be proper to say that Galway is a pretty little village of about 400 people, delightfully located near the centre of the town of Galway, in Saratoga County, and about 17 miles from Saratoga Bprings.
Upon inquiry the residence of Mr.
Charles A. Quant was easily found, for everybody seemed to know him, speak well of him, and to be overflowing with surprise and satisfaction at his wonderful cure and restoration to the activities of enterprising cititenship, for Mr. Quant was born in Galway and had spent most of his life there. Mr. Quant was found at his pretty home, on a pleasant street nearly opposite the academy. In response to a knock at the door it was o; ened by a man who, in reply to an inquiry "I am Mr. Quant, Will you come in?"

if Mr. Quant lived there and was at hon After a little general and preliminary conver-sation, and after he had been apprised of the object for which the Journal reporter had called upon him, he at request told the story of himself and of his sickness and terrible sufferings, and of the ineffectual treatment he had had, and of his final cure y the use of Dr. Williams's Pink Pills for Pale People, and cheerfully gave assent to its use for publication. He said: "My name is Charles A. Quant." I am 37 years old. I was born in the village of Galway, and, excepting while traveling on business and a little while in Amsterdam, have spent my whole life here. My wife is a native of Ontario. Up to about eight years ago I had never been sick and was then in perfect health. I was fully six feet tall, weighed 180 pounds and was very strong. For twelve years I was a traveling salesman for a piano and organ company and had to do, or at least did do, a great deal of heavy lifting, got my meals very irregularly and slept in enough 'spare beds' in country houses to freeze any ordinary man to death, or at least give him the rheumatism. About eight years ago I began to feel distressed in my stomach and consulted several doctors about it. They said it was dyspepsia, and for dyspepsia I was treated by various doctors in different places, and took all the patent medicines could hear of that claimed to be a cure for dyspepsia. But I continued to grow gradually worse for four years. Then I began conscious that my legs were getting weak and my step unsteady, and then I staggered when I walked. Having received no benefit when I walked. Having received no benefit from the use of patent medicines, and feeling that I was constantly growing worse, I then, upon advice, began the use of electric belts, pads and all the many different kinds of electric appliances I could hear of, and spent hundreds of dollars for them, but they me no good. (Here Mr. Quant showed the Journal reporter an electric suit of underwear for which he paid \$124.) In the fall of 1888 the doctors advised a change of climate, so I went to Atlanta, Ga., and acted as agen for the Estey Organ Company. While there I took a thorough electric treatment but it only seemed to aggravate my disease, and

the only relief I could get from the sharp and distressing pains was to take morphine. The pain was so intense at times that it seemed as though I could not stand it, and I almost longed for death as the only certain relief. In September of 1888 my legs gave out entirely and my left eve was drawn to one side, so that I had double sight and was diszy. My trouble so affected my whole nervous system that I had also affected my whole nervous system that I had to give up business. Then I re-turned to New York and went to the Roose-velt hospital; where for four months I was treated by specialists and they pronounce my case locomotor ataxia and incurable After I had been under treatment by Prof. Starr and-Dr. Ware for four months, they told me they had done all they could for me. Then I went to the New York hospital on Fifteenth street, where, upon examination, they said L was incurable and would not take me in. At the Presbyterian hospital they

examined me and told me the same thing. In March, 1890, I was taken to St. Peter's spital in Albany, where Prof. H. H. Hun frankly told my wife my case was hopeless; that he could do nothing for me and that she had better take me back home and save my money. But I wanted to make a trial of Prof. Hun's famous skill and I remained under his treatment for nine weeks, but se-cured no benefit. All this time I had been growing warse. I had become intirely paralyzed from my waist down and had partly lost control of my hands. The pain was terrible; my legs felt as though they were freezing and my stomach would not re-tain food, and I fell away to 120 pounds. In the Albany hossital they with 17 big

In the Albany hospital they gut 17 big burns on my back one day with red hot irons, and after a few days they put 14 more burns on and treated me with tricity, but I got worse rather than better; lost control of my bowels and water, and upon advice of the doctor, who said there was no hope for me, I was brought home, where it was thought that death would soon come to relieve me of my sufferings. Last September, while in this helpless and suffer-ing condition, a friend of mine in Hamilton, Ont., called my attention to the statement of one John Marshall, whose case had been similar to my own, and who had then cured by the use of Dr. Williams's Pink Pills for

"In this case Mr. Marshall, who is a prominent member of the Royal Templars of Temperance, had after four years of conentment by the most eminent Causdian the sicians been pronounced inourable, and was paid the \$1000 total disability claim allowed by the order in such cases. Some months after Mr. Marshall began a course of reatment with Dr. Williams's Pink Pills. and after taking some 15 boxes was fully re-

stored to health. "I thought I would try them, and my wife sent for two boxes of the pills and I took them according to the directions given on the wrapper on each box. For the first few days the cold baths were pretty severe, as I was so very weak, but I continued to follow instructions as to taking the pills and treat-ment, and even before I had used up the

ns of G: way, seeing the won-

opportunity of bearing testimony to the high character of Mr. Quant, and of verifying the story of his recovery from the terrible affliction from which he had for so long a time been a sufferer. time been a sufferer.

Truly, the luty of the physician is not to save life, but to heal disease.

The remerkable result from the use of Dr. Williame's Purk Pills in the case of Mr. Quant, induced the reporter to make further inquiries concerning them, and he adoptained that they are not a patent medicine in the sense in which that term is generally used, but a nighly scientific preparation, to result of years of study and careful exper-

ment. They have no rival as a blood

with expandique cortes if the treatment of such disease as paralysis, rhouseston, science, St. Viture deads, parameters of the heart, that tired feeling which affects so many, and all diseases depending upon a watery condition of the blood or shallowed

nerves. Dr. Williams's Pink Pills are also a spr Dr. Williams's Pink Pills are also a specific for trouble peculiar to temales, such as sup-pressions, irregularities, and all forms of weakness. They build up the blood and re-store the glow of health to pule or sallow cheeks. In the case of men they affect a radical cure in all cases arising from mental worry, overwork, or excesses of whatever

natura.

On further inquiry the writer found that these pills are manufactured by The Dr. Williams Medicine Co., Brockville, Ont., and Morristown, N. Y., and are sold in boxes (never in bulk by the hundred), at 50 centes box, or six boxes for \$8.50, and may be had of all druggists or direct by mail from Dr. Williams Medicine Co., from either address. either address. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies, or medical treatment.

Rich organic phosphate deposits have been recently discovered in Trinidad. West Indies. The specimens are said to thow ninety per cent. of phosphate, and without any chemical treatment it has proved valuable as a fertilizer.

There are many cases in waich an extraordinary intellect has accompanied acary brain weight, but the records show that men whose mental abililies have never been questioned have had prains under the average in both size and weight. The theory advanced several years ago

that the pass through which the Theolul glacier in Switzerland is now running at one time contained no ice, is confirmed by a recent discovery of coins under the ziacial ice. These coins bear the like ness of Augustus and Diocletina. In 1887 a horseshoe was found. Snails' eggs absorb moisture. The

most singular thing about them, however, is their marvelous vitality. They may be burnt in a furnace and thus reduced to powder, yet on the application of moisture they swell and regain their vitality, hatching out as freely and suecessfully as if they had been let alone. The final products of combustion are

the same, whether gas, wood or coal is burnt. A gas stove gives off a large quantities of carbonic acid gas and small amounts of more or less poisonous hydrocarbon compounds. Although less offensive than the gases arising from a coal or wood fire they are still uphealthful, and the only safe way is to connect the gas stove with a chimney, so that the products of combustion may pass into the open air.

Alexander Agassiz finds that the suimal life of the Pacific as a whole compares but poorly with that of the Carribean Sea on the other side of the Isthmus. This is probably due to the absence of a great current like the Gulf Stream, which bears with a large amount of food, and serves to supply the deep sea fauna along its course. It is the Gulf Stream which is supposed to be largely responsible for the engrmous mass of floating vegetation known as the Sirgasso

A device to prevent engineers from passing curves at too great speed consists of a standing fork provided with a point which inscribes a curve on the smoked surface of a cylinder revolved by a suitable mechanism. The instrument is fixed at any desired part of the line, and as the train passes the mechanism is set in motion, the wheels of the engine stooping the revolution of the device as they leses the curve, The speed of the train can be readily determined by counting the viorations of the fork as shown on the cylinder.

Cooking as a Science. "Cooking is as much a science as che:ristry," said Miss Parios to Foster. Coates recently. "It is of the first importance that every women who is to have the direction and care of a household, whether large or small, should know how best to use money for what is wholeso ne and palatable, and understand the principles upon which food can be most economically cooked. No woman should be considered as less accomplished or refined because she has given considerable attention to household duties, and can, if need be, prepare a dinner better than the average hired cook. Mistresses ought to be in every respect the superiors of their servants instead of being at their mercy, as they too often unfortunately

"Every woman ought to study domestic science. She may be so placed later as to have no occasion to avail herself of the information acquired, but she will have lost nothing by her effort to gain the knowledge; for this homely branch is really all-important, since it affects the body, the mind, the purse and the morals of the family. Where you find a high order of cooking, you will find also refinement in other respects. While we, as a people, ought to live better than any other nation, we livetoo many of us-on repetitions of poor dishes, and the waste in preparing them is something that pains one who stops to consider it. A French peasant, with nothing more at command than many an American housewife would look upon as absolutely vilueless, can set forth a most appetizing though sim-ple meal, solely because of superior knowledge of the way to cook food, and a natural ability to give the dishes just

the right flavor. ... "There ought to be somewhere in the United States a normal school of cookery where teachers could be frained for their work, and in every towa there should be a room where girls could be sent at least once a week from the public schools to learn the first principles of cleanliness and of cooking. Such a course would surely decrease the percentage of criminals and paupers, for unclean homes and improper food have much to do with the filling of prisons and almshouses. It seems as if the Government could not forever be blind to its own interest in this matter. Some day a demand may be made for such schools on the score of humanity."-Mail and Ex-
