The Gardner murder case was taken up yesterday morning. Yesterday afternoon was spent in taking the evidence. At this writing 10:30 the case has not yet gone to the jury.

The following is the presentment of the grand jury:

To His Honor Judge Joseph H. Earle, presiding Judge at the February term 1895 of Court:

The grand jury have leave to make the following presentment:

We have carefully considered all bills of indictment handed to us to pass upon, finding true bills when the law and evidence require it, and finding no bills where the evidence was not sufficient to sustain the same.

The public roads, we find, are in a very bad condition, owing principally to the excessive wet weather that we have had for the past few weeks.

We find, however, that the public roads have been encroached upon by farmers through whose lands the roads run, so much so in places there is not enough space left upon which vehicles can pass. We would therefore suggest that the County Supervisor inspect all public roads and see that they are kept open to the legal width, and properly drained, and such places as cannot be conveniently drained shall be crossed away.

We have inspected the jail and find it kept in as good condition as we could expect with the present building. But would recommend the erection of a jail exclusive of a new court house.

We would recommend that the farmer be empowered to appoint a committee out of our own number, with an expert whose duty shall be to inspect books of all County offices and report their finding at the semi-annual term of the Court.

We would further recommend that all those who are now being supplied by the County on account of their impoverished condition, be required either to go to the Poor House in order to be supplied with other inmates are there, or else abolish the Poor House and let all go home and draw their supplier from the County alms.

In conclusion we would thank your Honor for the kind and considerate treatment with which you have afforded us, and your clear and explicit instructions to us, as to the law applicable to the various bills handed to us to pass upon, have enabled us to accomplish our work with more ease and satisfaction than we would have otherwise done.

All of which is respectfully submitted. W. E. GLENN, Foreman.

Our farmers are building more pastures and are preparing to raise their own hog and henny at home. Apparently very little fertilizers will be used unless the prices are reduced to suit the low price of cotton.
