"Laugh and grow fat" is a proverb that is worthy of being made a part of one's creed for daily living. Proverbe are merely epitomes of human experience, and that particular saying commends itself to the observant mind. . A laugh is complex in its workings, but direct in its result. It has a physical movement, causing the arteries to dilate and the flow of blood to hasten, thus promoting an increase of vital processes and a mental action through stimulating the blood vessels of the brain. A nervous invalid was induced to try a "laughter treatment" a year ago. She read all the funny books she could find laboriously conned even the comic weekiles, and when she could find nothing else to laugh at laughed at herself for the effort. Every one knows how inevitably a forced laugh, if continued, will merge into a genuine burst of bilarity, and the invalid found berself shricking with laughter over the abourdity of it. In a month she began o feel stronger and in less than rear wholly recovered.

#### PAUL R. BRATTON WAS ARRESTED

The Dying Man Indicates That He Was His Stayer - Probable Cause of
