**THE FIRST NATIONAL BANK.**  
Camden, S. C.

shall a permit be granted until such plan shall have been so presented and approved. Such plans for application for connection with the sewer system should be filed ten days previous to the time desired to make the connection.

Sec. 4. Whenever a house connection is being made to the public sewer, the plumber doing the work shall, before any part of the work is covered or hidden from view, send a written notice to the Inspector of Sewers and Plumbing, stating that his work is ready for inspection, and upon the final completion of the work shall again notify the Inspector of Sewers and Plumbing, asking for a final inspection in accordance with the rules, regulations and plans prescribed by the Committee on Water, Lights and Sewerage.

Sec. 5. It shall be the duty of the Inspector of Sewers and Plumbing, and the Director of the City of Camden, Water, Lights and Sewerage to issue all permits, notices and certificates to keep a daily record of the work, including all notices and applications received, and permits granted. The Inspector of Sewers and Plumbing shall be authorized to report promptly to the committee on Water, Lights and Sewerage all violations of these regulations. He shall inspect all house connections during their construction, from time to time, sufficiently to see that all plumbing, drainage and sewerage work is done in accordance with the rules and regulations. He shall, upon notification by the plumber proceed to inspect and pass upon the work, apply such tests as may from time to time be prescribed, and have any defects immediately remedied under penalty of fine. He shall promptly condemn and order the work done contrary to the spirit of these regulations and the specifications governing house connections, and shall perform such other duties as may be assigned to him by the Committee on Water, Lights and Sewerage.

Sec. 6. No plumbing shall be used until the same has been duly passed by the inspector, and a certificate of approval issued.

Sec. 7. The Inspector, as far as may be necessary for the performance of his duties, has the right to enter any building or premises in the limits of the city without interference or hindrance, and he shall have power to condemn all unsanitary work, and to report the same to the Committee on Water, Lights and Sewerage. A special order shall be given when the latter can be remedied. He shall also report all persons who shall interfere with him in the performance of his duties. And any person so interfering with the Inspector in the discharge of his duties shall be fined not less than twenty dollars (\$20) nor more than one hundred dollars (\$100.00), or be imprisoned not more than thirty (30) days.

Sec. 8. No plumber or any other person shall make a connection with the public sewer without being duly licensed to do so, nor in any manner except as herein provided, and in violation of the foregoing regulations and the following specifications, under penalty of a revocation of his license and a fine of twenty-five dollars (\$25.00).

Sec. 9. All permits to connect with the public sewers shall be given upon the condition that the Committee on Water, Lights and Sewerage may, at any time before the completion, revoke and annul the permit when the work is not being properly executed, and no party interested shall have a claim for damages in consequence of such permit being revoked or annulled.

Sec. 10. The licensed plumber who makes any house connection with the public sewer shall be held responsible for any damage he may do to the streets or sewers. He shall restore the streets to as good condition as they were in at the beginning of the work.

Sec. 11. No person shall directly or indirectly connect any open gutter, cesspool, privy vault, or rain water conductors with the sanitary sewers.

Sec. 12. Every house or building to be connected with the sewer shall be separately connected, unless special permit be granted for combined connections in extraordinary cases.

Sec. 13. The House Drains shall be 4 inch or 6 inch diameter, Standard, Vitrified Salt Glazed Sewer pipe, from the public sewer to within three (3) feet of the point of entrance to the building. The joints shall be made with Oakum Gaskets, well caulked and pure fresh ground Hydraulic Cement of standard quality shall be used and Cement of Mortar mixed in the proportion of one (1) part of Cement to one (1) part of good, sharp dry sand free from lumps, and one (1) part of fine sand, and sufficient Mortar shall be used to fill the joints to the outside edge of the bell, making a beveled joint, pipe to be laid in straight lines with grade of not less than one foot in fifty (50) feet for 6 inch pipe, and one foot in sixty (60) feet for 4 inch pipe. The pipe to be laid to the public sewer shall be made generally by 3 (one-eighth) bend to a V branch in public sewer, which location of inlet can be obtained at office of plumbing inspector. Any openings in streets or sewers shall be closed with a suitable number of red lights, lighted, shall be placed on or near the opening. These lights shall be burnt from sunset to sunrise. All other changes in direction from a straight line shall be made by a square pipe, V branches with an accessible clean out, or by a properly curved channel in a man hole subject to the approval of inspector.

Sec. 14. The soil pipe shall be of 4 inch diameter iron pipe, extending from the connection with the house drain three feet from the building through the entire height of the building, and four feet above the roof at a point remote from any chimney or window, wholly open at the top and protected by a wire basket. The soil and vent pipes shall be of the following weights and thicknesses approximately:

For cast iron 2 inch diameter pipe, three pounds per foot; for cast iron 3 inch diameter pipe, 4 pounds per foot; for cast iron 4 inch diameter pipe, 6 pounds per foot; for cast iron 5 inch diameter pipe, 8 pounds per foot; for wrought iron 2 inch diameter pipe, 3 67 pounds per foot; for wrought iron 3 inch diameter pipe, 7.55 pounds per foot; for wrought iron 4 inch diameter pipe, 10.75 pounds per foot; for wrought iron 5 inch diameter pipe, 14.50 pounds per foot; for wrought iron 6 inch diameter pipe, 18.77 pounds per foot.

All iron pipe must be coated both inside and outside with coal pitch varnish or liquid asphalt, or be galvanized. Joints of cast iron pipes shall be made with picket oakum gasket and with one pouring of hot lead, with one and one half (1 1/2) inches for depth of lead in bell, and so thoroughly caulked as to make the joints gas and water tight.

Sec. 15. Waste and vent pipes from bath-tubs, wash-bowls, basins, water

**Religious.**  
We learn that a series of meetings will begin at the Methodist Church some time in the near future. The pastor, Rev. C. C. Herbert, will be assisted by the well known evangelist, Rev. Thomas H. Leitch. The pastor of the Baptist Church wishes to see every member of the church, and every Baptist in the city present Sunday morning.

**Why Certainly.**  
Blaney, S. C., Mar. 31, 1908  
Editor The Camden Chronicle, Camden, S. C.

Dear Sir:—Please publish the enclosed communication in your this week's issue. I ask this in justice to the officials and citizens of this town, as you have seen fit to give publicity to a communication from a disappointed and disgruntled office seeker, R. W. Sutton.

Yours very truly,  
Geo. D. Bailey,  
Clerk & Treasurer.

**The Seed Have Come**

The garden seed from the agricultural department for free distribution have arrived. The supply is quite limited, however, and those who want to get some of them should call at once.

**An Ordinance**

**To Prevent Injury to Trees and Shrubs in the City of Camden, S. C.**

Be it Ordained, by the City Council of the City of Camden, S. C., that from and after the passage of this Ordinance it shall be unlawful for any person to cut, scar, mutilate, dig up or otherwise injure or destroy any trees or shrub on the public streets or parks of the City of Camden, S. C.; that any person violating the terms of this Ordinance shall be guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding one hundred dollars (\$100.00) or be imprisoned for a period not exceeding thirty (30) days, in the discretion of the City Recorder.

Ratified in Council assembled this 30th day of March, A. D. 1908.  
H. G. CARRISON,  
Mayor.

Attest:  
J. J. GOODALE,  
Clerk.

**An Ordinance**

**To Regulate the Sewerage System in the City of Camden, S. C.**

Be it Ordained by the Mayor and Aldermen of the City of Camden, S. C., in Council assembled:

Section 1. That the Sewerage system of the City of Camden shall be under the control of the Committee on Water, Lights and Sewerage, and the duty of securing and enforcing full compliance with all rules and regulations governing house connections with the public sewers shall be vested in said Committee, or their authorized agent. The duly authorized agent of said Committee shall be an Inspector of Sewers and Plumbing, who shall be chosen by the City Council of the City of Camden, and shall receive such compensation as the said City Council shall fix and approve, and whose duties are defined in subsequent sections. It shall be the duty of every person, firm or corporation carrying on a business of plumbing or house drainage in the City of Camden, to register in a book to be provided for that purpose at the office of the Inspector of Plumbing of the City of Camden, giving name and place of business. It shall further be the duty of every person or firm carrying on a business of plumbing to give a good and sufficient bond, in the sum of Five Hundred Dollars (\$500.00), to be approved by the Mayor of the City of Camden, conditioned upon the observance of the rules and regulations contained in this and subsequent Ordinances, for the faithful performance of duty in making connections with the Sewers and Water Pipes, and to indemnify said City against loss in any manner whatsoever for any unskillful, or negligent work or conduct in the performance of his duties, or for any damage to the Sewers or Water Pipes, or for the use of defective or improper material used in said work, whereupon such person or firm may be duly licensed by the City Clerk to conduct a Plumbing business, and for which license shall be paid, in advance, the fee designated hereon.

Sec. 2. No person or persons shall be permitted to do any plumbing of any kind in the City of Camden unless he or they be in the employ of or under the supervision of a licensed plumber. Any person convicted of a violation of this section shall be fined not more than one hundred dollars (\$100.00) nor less than twenty dollars (\$20.00) or be imprisoned not more than thirty days. Should any property owner refuse to pay for the class of work and materials required by this ordinance, the contractor doing the work and report the same to the Inspector, and the plumber who takes the contract without the necessary changes shall forfeit his license.

Sec. 3. Before any portion of the system of any building shall be laid or constructed, there shall be filed by the owner of the property at the office of the Inspector of Sewers and Plumbing a written application for such connections, stating the location of the building, with plan of same, showing in detail the entire proposed connection from the public sewer through the house to the terminals, showing the location of all fixtures, traps, vent pipes, etc. This plan shall be inspected and approved, corrected or modified by the Inspector of Sewers and Plumbing, whereupon a permit for the proposed connection shall be given by the Inspector of Sewers, upon ascertaining that the work will be done by a regular licensed plumber; but in no case shall a permit be granted until such plan shall have been so presented and approved. Such plans for application for connection with the sewer system should be filed ten days previous to the time desired to make the connection.

**WHITE-GOODS SPECIALS!**

- 1 lot (short lengths) White Lawn, 15 to 20c values, at 10c
- 1 lot " " corded and checked Madras, 36 in wide big values at 12 1-2c yd

- English Long Cloths, Nainsooks, Cambrics and Bleachings at special prices
- 40 in white Lawn, good quality, at 12 1-2c

**Improving the Court House Grounds.**

Supervisor West is having some much needed improvements made in the Court House grounds. A neat brick and cement fence will enclose the entire grounds, a fountain will be put in the front yard and the grounds otherwise beautified. The city has commenced grading Lafayette avenue at its intersection with Main street, and the abrupt elevation there will be removed. Altogether when the work is completed that locality will be very much improved.

**Early Closing.**  
We, the undersigned, Merchants of the City of Camden, do hereby agree to close our places of business, from Monday, April 6, 1908, to Sept. 1, 1908, at 6 P. M. (Saturdays excepted)

**Has Been Made a National Bank.**

The Commercial Bank of Camden has been made a National Bank. A national bank for Camden sounds good, and it is as good as it sounds. No better evidence of the prosperous condition of a community can be found than the presence in its center of sound financial institutions. They are the axis around which revolve all the business of their respective districts. Without them our commerce—local, interstate or national—would be but a passing dream.

There has been no more important factor in the upbuilding of our town and the development of the surrounding country than this bank. It has ever been ready to assist any legitimate enterprise for the good of the individual as well as for the growth of the city, the directors being quick to understand that in proportion to a city's population is its business to be determined. The progress of this bank has been very marked. It believes in advertising, to which fact a share of its prosperity can very safely be attributed. (A fact which other business houses would do well to take a note of.)

A few years ago this bank commenced business in Camden as The Commercial Bank and Trust Company, with a capital stock of \$25,000.00; later the name was changed to The Commercial Bank; recently the capital stock has been increased to \$50,000.00, and its latest step for its improvement is its compliance with all requirements to be admitted as a National Bank. The changes have come "thick and fast" and have always been for the better. This Bank since its launching has ever been looked upon as an indispensable factor; it is now firmly established and we predict for The First National Bank of Camden still greater attainments in the future.

**An Ordinance**

**To Regulate the Sewerage System in the City of Camden, S. C.**

Be it Ordained by the Mayor and Aldermen of the City of Camden, S. C., in Council assembled:

Section 1. That the Sewerage system of the City of Camden shall be under the control of the Committee on Water, Lights and Sewerage, and the duty of securing and enforcing full compliance with all rules and regulations governing house connections with the public sewers shall be vested in said Committee, or their authorized agent. **Union Meeting.**

The Kershaw Union held a very interesting meeting at Mt. Olivet Church on Saturday and Sunday. Captain L. L. Clyburn was elected Moderator and Mr. J. F. West, Clerk. The subjects discussed were very interesting and the speeches were on a high plane. Rev. L. A. Mitchell made a fine one on "Evangelism," and the union requested it published in the Camden papers. Rev. W. S. Walters also made several fine ones, and others too took part in the discussions. Rev. T. L. Cole and Messrs J. E. DuPre and S. B. Hatfield from Black River Association were present as visitors. Mr. Cole, as he always does, made some fine remarks on the subjects for discussion. The ladies spread a fine repast for the crowd and all enjoyed their hospitality. The visitors only staid one day to their regret.

Salem Union which was to meet at Piegah Church was postponed for various reasons. Quite a crowd was on Mt. Sunday and the pastor, Rev. Mr. Cole preached a fine sermon in the interest of Foreign Missions.

We have had a time in this section with gripe and chicken-pox, but they have about run their course.

Not much corn planted at station very backward.

New or interesting to write.

More Anns.

Member, C. Birch 30th.

The progress of this bank has been very marked. It believes in advertising, to which fact a share of its prosperity can very safely be attributed. (A fact which other business houses would do well to take a note of.)

A few years ago this bank commenced business in Camden as The Commercial Bank and Trust Company, with a capital stock of \$25,000.00; later the name was changed to The Commercial Bank; recently the capital stock has been increased to \$50,000.00, and its latest step for its improvement is its compliance with all requirements to be admitted as a National Bank. The changes have come "thick and fast" and have always been for the better. This Bank since its launching has ever been looked upon as an indispensable factor; it is now firmly established and we predict for The First National Bank of Camden still greater attainments in the future.

Sec. 4. Whenever a house connection is being made to the public sewer, the plumber doing the work shall, before any part of the work is covered or hidden from view, send a written notice to the Inspector of Sewers and Plumbing, stating that his work is ready for inspection, and upon the final completion of the work shall again notify the Inspector of Sewers and Plumbing, asking for a final inspection in accordance with the rules, regulations and plans prescribed by the Committee on Water, Lights and Sewerage.

Sec. 5. It shall be the duty of the Inspector of Sewers and Plumbing, and the Director of the City of Camden, Water, Lights and Sewerage to issue all permits, notices and certificates to keep a daily record of the work, including all notices and applications received, and permits granted. The Inspector of Sewers and Plumbing shall be authorized to report promptly to the committee on Water, Lights and Sewerage all violations of these regulations. He shall inspect all house connections during their construction, from time to time, sufficiently to see that all plumbing, drainage and sewerage work is done in accordance with the rules and regulations. He shall, upon notification by the plumber proceed to inspect and pass upon the work, apply such tests as may from time to time be prescribed, and have any defects immediately remedied under penalty of fine. He shall promptly condemn and order the work done contrary to the spirit of these regulations and the specifications governing house connections, and shall perform such other duties as may be assigned to him by the Committee on Water, Lights and Sewerage.

Sec. 6. No plumbing shall be used until the same has been duly passed by the inspector, and a certificate of approval issued.

Sec. 7. The Inspector, as far as may be necessary for the performance of his duties, has the right to enter any building or premises in the limits of the city without interference or hindrance, and he shall have power to condemn all unsanitary work, and to report the same to the Committee on Water, Lights and Sewerage. A special order shall be given when the latter can be remedied. He shall also report all persons who shall interfere with him in the performance of his duties. And any person so interfering with the Inspector in the discharge of his duties shall be fined not less than twenty dollars (\$20) nor more than one hundred dollars (\$100.00), or be imprisoned not more than thirty (30) days.

Sec. 8. No plumber or any other person shall make a connection with the public sewer without being duly licensed to do so, nor in any manner except as herein provided, and in violation of the foregoing regulations and the following specifications, under penalty of a revocation of his license and a fine of twenty-five dollars (\$25.00).

Sec. 9. All permits to connect with the public sewers shall be given upon the condition that the Committee on Water, Lights and Sewerage may, at any time before the completion, revoke and annul the permit when the work is not being properly executed, and no party interested shall have a claim for damages in consequence of such permit being revoked or annulled.

Sec. 10. The licensed plumber who makes any house connection with the public sewer shall be held responsible for any damage he may do to the streets or sewers. He shall restore the streets to as good condition as they were in at the beginning of the work.

Sec. 11. No person shall directly or indirectly connect any open gutter, cesspool, privy vault, or rain water conductors with the sanitary sewers.

Sec. 12. Every house or building to be connected with the sewer shall be separately connected, unless special permit be granted for combined connections in extraordinary cases.

Sec. 13. The House Drains shall be 4 inch or 6 inch diameter, Standard, Vitrified Salt Glazed Sewer pipe, from the public sewer to within three (3) feet of the point of entrance to the building. The joints shall be made with Oakum Gaskets, well caulked and pure fresh ground Hydraulic Cement of standard quality shall be used and Cement of Mortar mixed in the proportion of one (1) part of Cement to one (1) part of good, sharp dry sand free from lumps, and one (1) part of fine sand, and sufficient Mortar shall be used to fill the joints to the outside edge of the bell, making a beveled joint, pipe to be laid in straight lines with grade of not less than one foot in fifty (50) feet for 6 inch pipe, and one foot in sixty (60) feet for 4 inch pipe. The pipe to be laid to the public sewer shall be made generally by 3 (one-eighth) bend to a V branch in public sewer, which location of inlet can be obtained at office of plumbing inspector. Any openings in streets or sewers shall be closed with a suitable number of red lights, lighted, shall be placed on or near the opening. These lights shall be burnt from sunset to sunrise. All other changes in direction from a straight line shall be made by a square pipe, V branches with an accessible clean out, or by a properly curved channel in a man hole subject to the approval of inspector.

Sec. 14. The soil pipe shall be of 4 inch diameter iron pipe, extending from the connection with the house drain three feet from the building through the entire height of the building, and four feet above the roof at a point remote from any chimney or window, wholly open at the top and protected by a wire basket. The soil and vent pipes shall be of the following weights and thicknesses approximately:

For cast iron 2 inch diameter pipe, three pounds per foot; for cast iron 3 inch diameter pipe, 4 pounds per foot; for cast iron 4 inch diameter pipe, 6 pounds per foot; for cast iron 5 inch diameter pipe, 8 pounds per foot; for wrought iron 2 inch diameter pipe, 3 67 pounds per foot; for wrought iron 3 inch diameter pipe, 7.55 pounds per foot; for wrought iron 4 inch diameter pipe, 10.75 pounds per foot; for wrought iron 5 inch diameter pipe, 14.50 pounds per foot; for wrought iron 6 inch diameter pipe, 18.77 pounds per foot.

All iron pipe must be coated both inside and outside with coal pitch varnish or liquid asphalt, or be galvanized. Joints of cast iron pipes shall be made with picket oakum gasket and with one pouring of hot lead, with one and one half (1 1/2) inches for depth of lead in bell, and so thoroughly caulked as to make the joints gas and water tight.

Sec. 15. Waste and vent pipes from bath-tubs, wash-bowls, basins, water
