

REMARKABLE SHOOTING EXHIBITION SEEN LAST FRIDAY

Another farmer boy to gain fame for his skill with the shotgun and rifle is William F. Hall, of Knoxville, Tenn. Mr. Hall was born into an atmosphere laden with the songs of the harvesters and the calls of the mule drivers on his father's farm near Fishersville, Va. Growing up among a people familiar with firearms, young Hall soon became an expert marksman. In his early teens, he joined the gun clubs at Staunton, Roanoke and Lynchburg, Va., and coaxed his scores along up, point by point, until in 1909, he shouldered his gun and headed for the Virginia state shoot. Greatly to his surprise, the boy shooter came away with the State championship, won by a score of 96 out of 100—his first big victory.

As a trick shot, Mr. Hall has few equals. His public exhibition at the Camden Gun Club grounds last Friday afternoon, he having come here at the invitation of Messrs. Malone, Pearce Young Co., to demonstrate the superiority of the U. M. C. ammunition, was full of enjoyment to spectators, both as demonstrations of technical ability and for intense dramatic interest. Mr. Hall performs many shooting feats which are entirely of his own creation and his programs from day to day undergo continual development and improvement. Among his favorite stunts are ejecting a cartridge in a repeating rifle and shooting the cartridge before it reaches the ground with the same rifle from which it was ejected, causing it to explode while in the air; throwing peas and objects as small as No. 4 shot in the air and shooting them with a rifle; breaking several clay balls thrown in the air at the same time and shooting oranges, melons, cans of tomatoes, etc., in air, showing the effects of the various kinds of arms

and ammunition on such objects. Another wonderful feat performed was that of breaking a clay pigeon in the hands of a spectator thru the aid of a diamond ring. Mr. Hall stands at a side angle to the object and getting the site of his pistol thru the reflection gotten from the sparkler, breaks the pigeon in the hands of the holder. The feat brought forth hearty applause from all those present.

To meet Mr. Hall personally is an inspiration to those interested in shooting and allied subjects. He is an authority on the technique of firearms and ammunition, and on all matters pertaining to the game of the country, general information and trap shooting in all of its phases.

Special Holiday Excursion to Havana, Cuba.

Rate from Camden \$43.65, including meals and berth on steamship, children five years of age and under twelve at half fare. Tickets will be sold for all trains Saturday, December 20, 1913, limited returning to reach original starting point not later than January 6, 1914.

Proportionately low rates will be made from other points in Virginia, North Carolina and South Carolina. This will be an excellent opportunity for teachers and students to utilize their Christmas holidays in making an interesting and educational trip to Cuba.

The Atlantic Coast Line operates through pullman cars to Key West and to Port Tampa connecting at both ports with steamships for Havana. Tickets good via either of

the routes. Arrangements will be made to accommodate passengers leaving Jacksonville at 1:15 p. m., Sunday, December 21st, via the Flagler System—the "Over Sea Railroad"—and a steamship from Key West; and leaving Jacksonville at 1:30 p. m., via Atlantic Coast Line, thence by Port Tampa and steamship which touches at Key West enroute to Havana.

F. M. Jolly, traffic agent of the Coast Line, who has resided in Havana fourteen winters, will accompany the excursion, and render assistance to passengers enroute and in the matter of hotel accommodations, sightseeing, etc., in Cuba.

For schedules, reservations, descriptive booklets and any further information, apply to Ticket Agents of the Atlantic Coast Line, or address W. J. Craig, P. T. M., or T. C. White, G. P. A., Wilmington, N. C.

GROWING SUDAN GRASS

By W. L. Hutchinson of South Carolina Experiment Station.

Apparently the farmers of South Carolina are becoming more interested in the hay crop. The growing of alfalfa, the best of hay plants is being exploited. Interest is manifested in oats and vetch, a winter season hay crop. Moreover, many of the farmers of the State still have the bad practice of pulling fodder, an unprofitable business.

Sudan grass, perhaps the original form of sorghum, is a promising hay plant. The stems are much finer than sorghum and hence it cures quicker. It has a shorter period of growth, maturing a crop in about six weeks. This quick growth makes it valuable both for an early crop of hay and for a good yield when sown late in the season. This quality makes it valuable to sow after oats, as it will mature a good crop of hay and be out of the way in time to permit a good preparation of the land for the early planting of any fall crops. As it cures quickly, there is less danger of serious damage by rain.

Sudan grass is an annual and it grows during the summer season. It does not become a weed, as is the case with Johnson grass. The seed weigh about thirty-two pounds to the bushel and for sowing broadcast for hay, about one and a half bushels should be sown to the acre. For growing a seed crop, it is best to plant in drills. Five or ten lbs of seed to the acre will be sufficient for a good stand. When planted in drills, one or two cultivations should be given, but the drills should be just as close as will permit easy tillage.

Sudan grass grows from three to five feet tall and the stems have abundant leaves. It is hardy and it is very easy to get a good stand. It seeds abundantly so that when generally grown the seed will be cheap.

Sudan grass should make a more attractive market hay than the other plants being grown at present. It may be fed to all kinds of live stock and the animals are fond of it. Evidently this plant, a recent importation of the United States department of Agriculture, will be a valuable addition to most of the farms in the state. It may lessen and even stop the unprofitable practice of pulling fodder. The planting season is very long, extending from corn planting time till August.

It will be noted that Sudan grass has many desirable qualities as a hay plant. It grows rapidly, giving a good yield of hay in a short time. A good stand is easily secured and the cost of seeding small. The stems being fine, it cures quickly, lessening the risk of injury from exposure to the weather. The abundance of leaves gives hay of excellent quality relished by all kinds of stock. There is a season of several months in which to find a convenient time to grow it and in this way it can be made to supplement our standard crops rather than compete with them. Its qualities recommend it as a market hay as well as a good hay for the farm.

The seed are not plentiful as yet, but five pounds to start with would soon provide all the seed a farm would need.

This plant may be grown on the soils of South Carolina just as they are. You do not have to make the soils over in order to grow it.

Neither liming nor inoculation is necessary to success. It is just as easy to grow as any of the crops we now produce. The seed are about the size of sorghum seed and may be planted about the same depth. A corn planter with a sorghum plate may be used for planting in the drill. When sown broadcast, the seed may be covered with a harrow.

NOTES FROM CLEMSON.

Home Coming Week Planned For Old Clemson Students.

Clemson, S. C., Nov. 25.—Clemson students have been very fortunate in having Dr. Weatherford with them this week. Dr. Weatherford, who is now executive secretary of the International College Y. M. C. A. is a very able man. His series of lectures will deal with practical problems in student life and the Y. M. C. A. here at Clemson is doing all it can to get as many men as possible to attend these lectures. The Association is making a desperate effort to better conditions in barracks life here and the good work they have and are doing is beginning to show up already.

A meeting of the board of trustees was held here at college on last Wednesday morning, all members of board being present except Senator Tillman and Mr. Evans, deceased. Congressman Lever met with the board for his first time, having been recently elected a life trustee to take the place made vacant by the death of Col. R. W. Simpson.

A Home Coming week for ex-Clemson students was authorized by the board, and it will likely take place in August, 1914, in commemoration of the 25th anniversary of the Act of Acceptance of the Clem-

son Bequest by the Legislature. The resignation of Dr. P. H. E. Sloan, who since the organization of the college has been secretary and treasurer was accepted with expressions of regret and esteem. Dr. Sloan retires on account of age, being now 78 years old.

Mr. S. W. Evans, who for some years past has been the efficient bookkeeper for the college, was appointed secretary and treasurer to succeed Dr. Sloan when his resignation becomes effective January 1st, 1914.

Mr. F. G. Davis, of Newberry, was selected to succeed Mr. Evans as bookkeeper.

In view of the great demand for work along poultry lines, the board carefully considered the project of adding poultry husbandry to the work of the Agricultural Department and Extension Division. However, they abandoned the idea because of the lack of funds, and in view of the fact that the budget for public State work this year already amounts to \$110,000, which is more than the college can afford to risk because of the uncertainty of fertilizer tax. The board also decided to abolish the preparatory class after this session. A. M. T.
