PIGEONS FOR MARKET.

Climate of South Carolina Fine For Producing Squabs Says Clemson.

Clemson College, Nov. 22.—The climate of South Carolina is ideal for growing pigeons, according to the poultry husbandman of Clemson College. The winters of this section are not too cold, nor are the summers too hot for the production of squabs on a commercial scale. It is only in the molting period that the number of eggs and young pigeons will be decreased.

No special pigeon house is necessary in this state. An open-front chicken house, 10 feet long and 8 feet wide, and a height of 7 feet in front and 5 feet in back, will accommodate 30 pairs of pigeons. The house should face South and should have the east, north and west sides boarded tightly, as described in Farmers' Reading Course Bulletin 16, of Clemson College.

To complete the plant, erect in front of the house a frame 16 feet long, 100 feet wide, and 6 feet 6 inches high, using 2x2-inch posts and 1x3-inch boards. Cover the frame with 1-inch-mesh wire netting. This "fly" gives

the pigeons the necessary exercise and the small wire keeps out sparrows.

Good varieties are White King, White Homers, White Swiss Mondaines and Red, Yellow or Splashed Carneau. White pigeons are preferred because they can be sold alive at good prices when a surplus of stock arises. For some time the demand for good breeding stock will take care of the supply and the squabs can also be killed, chilled, packed in ice, and sold in Atlanta and other markets.

A mixed feed consisting of equal parts of peas, cracked corn (free from mold), sorghum or cane seed, and wheat produces excellent results. Small or broken peanuts may be substituted for peas. The important thing to remember is to make one-fourth of the mixture either peas or peanuts. These foods take the place of cotton-seed meal in an egg-mash. They supply protein and without one of them very few eggs and young pigeons will be produced. Feed the grain in a hopper or liberally twice daily. Hopper feeding is best.

Keep in the flying pen at all times a supply of grit, small oyster shells, rock salt, and water. Pigeons enjoy and require a bath twice weekly. A dishpan half filled with water is all that is needed.

For further information, write to the Extension Division of Clemson College for a bulletin on squab raising.

Stockton News Items.

Boykin, Nov. 24.—Dr. J. C. Pearce and Mr. John Forkney, of Graniteville, spent the week end at the home of Mr. B. M. Pearce.

Messrs. B. M. Pearce, John Forkney, Chapman Pearce and Dr. J. C. Pearce toured to Bishopville Thursday in Mr. Pearce's car.

Mr. Jennis Humphries and brother, Carl, spent Sunday with Misses Lella and Lila Smith.

Mr. LeRoy White and Miss Almira Weldon, of Spring Hill, spent the week end at the home of Mr. S. R. J. Smith.

Mr. and Mrs. B. M. Pearce, Dr. J. C. Pearce, Mr. W. H. Pearce and Mr. John Forkney went to Charlotte Friday and returned Saturday. They made the trip in Mr. B. M. Pearce's car.

Mrs. Lou Pearce and little daughter, Nancy, who has been visiting at the home of Mrs. B. M. Pearce, has returned home.

Mrs. Belton Owens has returned home after a visit at Pinewood.

The Stockton and Cleveland schools will have holiday Thursday and Friday of this week.

Just think—Thanksgiving day is so near, we are all looking forward to it for it is one of our happiest days of the year.

Miss Oma Workman celebrated her tenth birthday with a party Friday afternoon from 4 to 6 o'clock at the home of her parents, Mr. and Mrs. E. M. Workman. Games were played until late in the afternoon when the children were invited into the dining room, which was beautifully decorated in green crepe, and autumn leaves and ferns. In the middle of the table was a snow white cake with ten lighted candles. The centerpiece was a table mirror, holly ferns and tiny green burrs. Cake and candy were placed attractively here and there. Mrs. Workman, assisted by Miss Bearden, served ambrosia and cake. Those invited were: Misses Augusta, Elizabeth, Alene Bostick, Alma Humphries, Alice, Owens, Iona and Madge Seagle, May Turner, Mary Allen Boykin, Hugh Humphries, Chapman Pearce, Henry Owens and Geo. Turner.

Entire Pickford Family in "Fanchon the Cricket."

"Fanchon the Cricket," the latest production of the Famous Players' Film Co. on the Paramount program, attaches an unusual interest because of the fact that it does not only present Mary Pickford, the idol of the screen in the title role, but that the supporting cast also includes Lottie and Jack Pickford, sister and brother of the popular star.

This is the first time since the Pickfords have been appearing on the screen that all three have been together in a single production, therefore possesses a unique interest, aside from its great dramatic strength and the charm of "Little Mary's" exquisite portrayal of the title character.

Written by Georges Sand, one of the greatest novelists in the history of French literature, "Fanchon the Cricket" has lived for generations as one of the most human dramas ever conceived, and it is fair to assume that its interpretation on the screen by Mary Pickford and the superb cast which surrounds her, will forever immortalize this charming story.

The subject will be the main attraction at The Majestic next Friday.—adv.

It may be better to be born lucky than rich but if born rich he is lucky from the start.

Where Drugs Fail

Many chronic diseases fail to respond to drug treatment, even in the hands of the best physicians, whereas acute diseases usually respond readily. When a disease becomes CHRONIC, drugs often seem to do as much harm as they do good, for the system rebels against them. It is just this class of cases which physicians send to the health resorts and which derive the greatest benefit from Shivar Mineral Water, for it dissolves and washes out the poisons from the blood, cleansing and purifying the whole system. If you suffer with chronic dyspepsia, indigestion, sick headache, rheumatism, gall stones, kidney or liver disease, uric acid poisoning or other conditions due to impure blood, do not hesitate to accept Mr. Shivar's liberal offer as printed below. It offers you the equivalent of three weeks visit to the spring, with no charge for the water if you are not benefitted. His records show that only two in a hundred on the average, have reported "no beneficial results." This is a wonderful record from a truly wonderful spring. Simply sign the following letter:

Shivar Spring,
Box 100 F, Shelton, S. C.
Gentlemen:

I accept your guarantee offer and enclose herewith two dollars for ten gallons of Shivar Mineral Water. I agree to give it a fair trial, in accordance with instructions contained in booklet you will send, and if I report "no benefit" you agree to refund the price of the water in full upon receipt of two empty demijohns which I agree to return within 30 days.

TIMELY POINTERS FOR ORCHARD AND GARDEN

(Clemson College Bulletin.)

Arbor vitae makes a splendid ornamental hedge. It may be shaped into any desired form by pruning.

Carrots, parsnips, and salsify may be left in the ground over winter. These root crops keep perfectly without storage.

Cuttings of the bunch grape may be made now. Use the wood that grew last summer, cutting it into pieces 8 or 10 inches long.

Transplant evergreens such as arbor vitae and red cedar now. It is not necessary to cut back the tops of these plants at the time of transplanting.

Save seed from the fall crop of Irish potatoes for next year's planting, selecting smooth potatoes of uniformly large size, the not the largest. Seed potatoes are usually expensive at planting time.

If the ground for the orchard is not prepared when your fruit trees arrive, place the trees in a deep trench and cover the roots with soil. They will keep there in perfect condition for many weeks, giving ample time for their soil preparation.

The crocus is one of the earliest spring flowering plants. Plant the bulbs on the lawn in holes about 2 inches deep made with a sharp stick. Cover with soil. The crocus will finish blooming before the lawn needs cutting.

Bunch grape cuttings may be set out in a permanent place at once or may be tied in bundles and buried in moist, well drained soil until next spring. In putting out cuttings, cover them so as to leave the top bud just at the surface of the ground.

Greatness of the United States.

The United States covers considerably less than six per cent of the earth's area, and contains only about five per cent of the earth's population, but official records show that the United States produces:

- 76 per cent of all the corn grown in the entire world.
- 70 per cent of the cotton.
- 72 per cent of all the oil.
- 59 per cent of all the copper.
- 43 per cent of all the pig iron.
- 37 per cent of all the coal.
- 35 per cent of all the tobacco.
- 26 per cent of all the silver.
- 24 per cent of all the wheat.

21 per cent of all the gold and contains more than 33 per cent of all the wealth in the civilized world.

These figures were compiled July 1915, by Dr. Joseph Caccavaio, C. E., from the government reports and statistics for the year ending June 30, 1914, and were therefore uninfluenced by the present war.

The reports show that the United States produced 2,762,804,000 bushels of corn in 1914.

- 16,163,143 bales of cotton, 1914.
- 10,434,600 gallons of oil, 1913.
- 546,643 long tons of copper, 1913.
- 30,966,152 long tons of iron, 1913.
- 508,971,540 long tons of coal, 1913.
- 953,730,000 pounds of tobacco, 1913.
- 891,017,000 bushels of wheat, 1914.
- \$40,348,100 silver, 1914.
- \$88,884,000 gold, 1914.

Should the United States "shut up shop" just now, all the rest of the world would find the situation very awkward, to say the least.

Portland, Ore.—Is Doc Oster in the audience? Jeremiah Paulsell, 99 years old, has just applied for a license to hunt big game. "I won't take water from any young fellow," says Uncle Jere.

Mason City, Ia.—Thirty-two years old and married five times is the record of Ethel Wickes-Noble-Pump-Jurdy-Hughes, who is under arrest for bigamy.
