

AN ORDINANCE

An ordinance, requiring all unused open wells, in the City of Camden, to be filled in a specified time.
 Be it enacted by the Mayor and Aldermen of the City of Camden, S. C., in Council assembled and by authority of the same:
 1. That the owners of property situate in the corporate limits of the city of Camden, upon which there is a well, which is not used for any purpose, or household purposes, shall be required to fill same within a period of thirty days from the date hereof.
 2. That upon failure of said property owners to fill said wells within the time specified in this ordinance, the City Aldermen shall cause the same to be filled.
 Witness my hand and the seal of the City of Camden, this 23rd day of May, 1917.
 H. H. Yost Mayor

FINAL DISTRIBUTION

Notice is hereby given that on the 1st day of June, 1917, I will make to the Probate Court of Kershaw County my final return as Guardian of the estate of my ward, Cora Bell Ellis. (Now Johnson) she having attained her majority, and on the same day I will ask for a final discharge from my trust as said Guardian.
 W. J. ELLIS
 Camden, S. C., May 1st, 1917.

GAME FISHING

Author of LAKE and STRLAM GAME FISHING

LITTLE PANFISH FUN.

My Dear Buck:
 There's a great big army of little fish that don't seem to get the proper credit for all the fun and pleasure they have given fishermen. Of course old man, a great big chunk of this fun happened way back in the knee-pants stage of most fellow's fishing days, but at that, when the real game fellows are all the feed and prospects appear good for an empty stringer, and it looks like bacon and flapjacks for the evening meal, just toss out a line and give the little fellows a nibble at your bait. These little old nibblers include in their ranks the crappie, rock bass, blue gill, sunfish and yellow or striped perch.

As a pan fish, you can't beat 'em. Broiled to a turn in plenty of bacon grease or broiled over the open campfire they are a dish that would make even J. D. forget his stomach, and after an hour on the trail or a particularly hard portage, you thank your lucky stars when the feed bag has a generous portion of "little fellows" done to a turn.

Get 'Em Any Old Time.
 Of course, they don't put up a scream of a fight like their cousins the basses, but they are accommodating little cusses and bite any time in the day and most any time in the season, especially when at a time the real game fellows have a tendency to overlook a good thing in the shape of bait or lure. Although they only make a short little fight, there's a way of fishing for them that will give you quite a bit of fun and please even the sure-enough fisherman who is seemingly shocked when you even mention pan fish to him. Of course, most of that "fishy" stuff is merely bull on the part of the fellow that hops up in the clouds when you mention little panfishes.

Light Fly Rod Best.
 There is the tackle that put pep in the panfish game. Get the lightest, lightest fly rod you can find. Don't get a fly rod with an ordinary standard silk casting line and a number of other "top" look, and do a little "fishing" with it. With this rod you can catch a lot of panfish.

Hourly W. Double Reef.
 By adopting some tropical means of house building, a Florida landowner has constructed on the banks of the Miami river a dwelling that promises the maximum of comfort in summer. The house is described in Popular Mechanics. It is of a simple two-story frame design, with low-pitched roof, but the roof is double, with a considerable air space between, which serves to protect the upper story from the direct heat of the sun. There are also wide two-story screened porches around the house on three sides, so as to get all the benefit of the north-east trade wind which prevails during the summer. The porches are all under the double roof, which has overhanging eaves. This style of construction is common in Java and Ceylon, and is also found in the Panama Canal zone, but the house on the Miami is believed to be the first of its kind in the United States, as well as the first in Florida.

Mine Coal in River Beds.
 It has been known for some time that large quantities of anthracite coal existed in the beds of certain rivers running through the anthracite regions of Pennsylvania, the coal having been washed down years ago. In the Susquehanna river, the Schuylkill and the Lehigh, these deposits are exceedingly heavy, being found in greatest quantities in pockets along the river beds. During the last few years companies, independent of owners and operators of coal mines, have been at work digging out this coal by means of dredges, selling it afterward direct to the consumer. The coal is said to be of excellent quality. In fact, much of it is superior to that obtained direct from the mines. The cost of dredging averages about 12 cents a ton and the prices to consumers have been as low as \$1.35.

Striped Perch Good Biter.
 The yellow or striped perch is probably the best little biter in the whole outfit, and although he does not as a rule fight like a heavyweight, if you get a two-pounder on light fly tackle you know there is a fish on the far end of the line. Go after him in about thirty to forty feet of water and you get the big ones. With any sort of bait you can land him in good numbers most any time, and even through the ice in winter he is an accommodating fellow. The perch is a great little favorite with the women and children who don't go after the gamer fellows, and many pleasant days can be spent for this popular little panner. A bait that looks good to a bluegill tickles the fancy of the perch, and any old kind of a hook and line is tackle-enough to get him, although the real sport is to be had with the long light steel fly rod.

Taken as a whole the pan fish are a gentlemanly little bunch of good fellows, always eager to take a nibble, and save a fisherman from rinking up a "goose egg" for the day's fishing, and to his good, clean method of living we can thank him for his fine flavor, and crown him king of fresh water fish food.

NOT CROWDED YET

Plenty of Room in Heaven, Say the Statisticians.

Mathematicians Compile Interesting Figures Based on the Dimensions as Stated in Bible.

The dimensions of heaven are plainly stated in the Bible, but they are so great that no one yet has been able to reduce them to figures that can be grasped by most people. However, they do indicate that heaven is not a crowded place.
 The basis of calculations of the size of heaven is found in Revelation: 21-15: "And he measured the city with the reed, 12,000 furlongs. The length and the breadth and the height of it are equal."
 Twelve thousand furlongs are 1,920,000 feet, or 1,500 miles. The cube of this must be taken in order to obtain the cubic contents of heaven, which are 469,793,088,000,000,000 cubic feet.

With these figures before him one statistician has figured out just how much room there is in heaven for each individual soul. A single calculation is given to prove just how easy the process really is.
 This statistician thinks that the meeting place of the angels probably is the most spacious and requires at least half the total space. He deducts another fourth for streets and open places, which leaves 124,198,272,000,000,000,000 cubic feet for the actual dwelling place of the angels.

A room 20 feet square contains 8,000 cubic feet. Assuming that the dwellings of heaven are divided into rooms 20 feet square, there would be exactly 13,024,531,000,000,000 rooms. The present number of inhabitants in the world is estimated at approximately 1,000,000,000. Assuming for the moment that this number has always existed in the world each day and that there are three generations in a century, the number of inhabitants for each century would be 3,000,000,000. Assuming also that the world has existed for 1,000 centuries (scientists have not been able to agree as to the age of the earth), then the total number of inhabitants in the world amounts to 3,000,000,000,000.

Many scientists are of the opinion that other worlds besides the earth, especially Mars, are inhabited. Not to leave out of account the possible inhabitants of other worlds, it is estimated that 25 of them could be added, giving a total of 100 worlds like the earth with 300,000,000,000,000 inhabitants.

Dividing the total number of rooms, 13,024,531,000,000,000, by 300,000,000,000, the total number of inhabitants, there would be nearly five rooms 20 feet square and with a 10-foot ceiling for each man.

Hourly W. Double Reef.
 By adopting some tropical means of house building, a Florida landowner has constructed on the banks of the Miami river a dwelling that promises the maximum of comfort in summer. The house is described in Popular Mechanics. It is of a simple two-story frame design, with low-pitched roof, but the roof is double, with a considerable air space between, which serves to protect the upper story from the direct heat of the sun. There are also wide two-story screened porches around the house on three sides, so as to get all the benefit of the north-east trade wind which prevails during the summer. The porches are all under the double roof, which has overhanging eaves. This style of construction is common in Java and Ceylon, and is also found in the Panama Canal zone, but the house on the Miami is believed to be the first of its kind in the United States, as well as the first in Florida.

No Reason for It.
 Polly—Why do you quarrel so much with your fiancé?
 Molly—To keep people from getting the wrong impression. I don't want everybody to think I have to marry him.—Judge.

Catty Remark.
 First Girl—My motto is: Aim high.
 Second Girl—That accounts, I suppose, for the way you are throwing yourself at the head of the new minister who is over six feet.

She Wouldn't Apologize Then.
 She—You don't mind my talking so much, do you?
 He—No, indeed; but (facetiously) I may mind after we are married.
 She—But I shan't mind then.

5000 Per Cent Profit

A young man invested \$20 in a thousand dollar life insurance policy. Before he had paid any more, he died. His widow and children promptly received \$1,000.00.
IT PLACED THEM ABOVE WANT
 Make a similar investment for your family. They may realize the same percentage on it—for you will die just as quickly without it as you will with it.
 Let us hope, however, that there will be no occasion. But wouldn't you like to make them safe?
 Step in and let us explain to you some attractive policies we are writing—drop us a card and we'll see you.

One Negro's Experience.
 Those negroes in Kershaw county who are thinking of going to the north should have the following read to them, from the Abbeville Medium:
 Sam Harmon, formerly a fireman on the Seaboard for Geo. F. Flynn, left his job and went north some time ago, being told big tales of what he could make up there. He has enough of it already, and wrote Mr. Flynn as follows last week. The letter is dated Philadelphia, May 6th: "Mr. George L. Flynn:
 "I am up here and I want you to get me a pass for me and my wife to come home. If you can get them please send me two tickets and I will work with you until I pay for them.
 "I am tired of this place. Negroes fooled me up here, but it is not near like they say. I made a great mistake by coming. Go to Mr. Gilliam and tell him about it. I want to come back South and tell all the negroes something.
 "Write and let me know at once what you are going to do. When I come I will bring something good for you. You know what I am talking about. Please write and let me know if you can do it or not.
 "I am up here broke; please hurry and send for me. Will look to hear from you soon.
 "I am not going to let the negroes fool me off from home any more. Tell all the negroes down there they had better stay because I know what I am talking about."
 "Sam Harmon."

Waterree Mill Village Notes.
 Mr. Clayton Baker spent last week end with his parents, Mr. and Mrs. T. T. Baker.
 Judge M. J. Smith came up from Columbia to be with us at the flag raising last Saturday.
 Rev. J. B. Shiver, of Charleston, spent several days with Rev. and Mrs. P. A. Lyles.
 Mr. A. R. Corley, of Columbia, came up for the flag raising and fish fry last Saturday.
 There will be a "Japanese Fair" given by the girls of the village next Tuesday night beginning at 8 o'clock in the park by the church for the benefit of Waterree Ball Team. Admission free.
 A few more games like the one Saturday evening between our team with Columbia and Hermitage and we will be ready to play.
 Our Sunday School is steadily growing, having increased in attendance 137 up to last Sunday.
 Preaching next Sunday morning at 11 o'clock. Subject "Some essentials in developing a church to the greatest activity for Christ." Evening service at eight o'clock. Subject "The Mission of Jesus." Sunday School at ten a. m.

Honor Roll Lugoff School.
 Grade 1—Coleman Rabon, J. T. Aaron, Lucile Ward, Alie Brun, John Nettles and Carrie Brand.
 Grade 2—Jemel Rabon, Nick Ward, Nick Rabon, Chalmers Jack Wilson.
 Grade 3—James McCaa, John Nettles.
 Grade 4—Victor Ward, Sern Nettles.
 Grade 5—Thomas Rosboro, Lee, Louise Rabon.
 Grade 6—Isabelle White.
 Grade 8—Alberta Hammond, Hiram Rabon, Thomas White.
 Grade 9—Hiram Nettles.
 Honor Roll for the Year.
 Grade 1—Coleman Rabon, J. T. Cameron.
 Grade 2—Jemel Rabon, Nick Ward, Nick Rabon, Chalmers Jack Wilson.
 Grade 3—John Lee, James M. Nettles.
 Grade 4—Sern Nettles and Annons.
 Grade 5—Thomas Rosboro.
 Grade 8—Alberta Hammond, L. Rabon.
 Grade 9—Hiram Nettles.
