CAMDEN CHRONICLE

H. D. Niles and E. N. McDowall

l'ublishers.

Published every Friday at 1109 No. Broad Street, and entered at the Camden postoffice as second class mail mat Price per annum \$1,50.

Camden, S. C., September 19, 1919,

Next to the perfumed man, the halfburned dead eight is probably the most Acheive odor.

If it becomes the practice to jail profited is it will be necessary to increase the capacity of the jails of the

the profits, and no one about sharing tamden to contend with. the delicits—the losses. And yet there are both to be considered in business.

The Dawson News tells the truth when it sagely remarks that "It is getting better to live in the country and in the smaller towns all the while, The pace may not be so strenuous and the excitement of such high pitch, but the going is steady and in the right direction. Since the better class of country towns have adopted paving and erected modern theater buildings for the motion tilm there is little left for the cities

HARD ON MURDERERS

Despite the fact that Hugh T. Brainlett of Greenville entered a plea of insanity and several prominent physicians, including Dr. J. W. Babcock, former superintendent of the state hospital, testified that he was insune, a jury in the sessions court in Greenville found Brandett guilty after a trial lasing eight days. They deliberated only, about an The verdict carries the death sent time. Bramlett kidled his mother inlaw and shot his sister in-law. The last teen, of court for Greenville was not a view good one for murderers Brambett is the lifth man to be convicted of men on the bilt degree in that county Proc a grade were sentenced to death last week and one was sent up for life

SHOULD BE GIVEN A SENTENCE

The violators had that it her ear get off with a light fine they ake a charge. We are glad to know that other men are taking the same view rethe Kershaw sheriff. At the court erroral sessions held at York last ing assummendation to the court: "We delegation the advisability of making the to extend the the violation of the pronew, even to the extent of depriving consisted effenders of the provilege of setting on a basis of times and giving the confight prison or road sentences

PERSONAL MENTION.

Messrs, Lambert DePass and Dick Singleton were among those leaving this week for the University of South Caro-

Miss Katherine Blakeney has gone to Queen's College, Charlotte, to resume her studies in that institution.

Misses Sara Campbell, Wilbur Mc-Callum, Olive Rhame, Rebekah deLoach and Clara Cureton left Friday for Winthrop College.

A crowd of twentysix, each driving a Buick from the factory at Flint, Michigan, and bound for Columbia passed through Camden yesterday afternoon. They stated that they had concrete roads to travel over from Michigan to Virginia and that the worst roads encountered were in Virginia but on the whole Every one always talks about sharing trip they had nothing like the ferry at

> Surgeons of the entire system of the Scuboard Air Line railway are holding their sixtieth annual convention in Charleston this week,

Officers Saturday made a raid near Dixiana, Lexington county, and located a 50 gallon still under which the fire was still smouldering. The operators, however, had disappeared before the ofbeers came on the scene and no arrests were made. The raid was made by Deputy Collector P. J. Coleman and C. A. Rector and State Constable Smyrl.

What is probably a record in cotton picking, so far as Barnwell County is concerned, was made recently on the place of J. D. Prothro, near Williston, when two of his employees, John Pope and Lee Pope, brothers, picked nearly 1,000 pounds in one day, one picking 492 and the other 502 pounds. The cotton was the big boll variety.

Remember Cole's Air Tight makes the (qel bill light. The Camden Furniture empany carries this remarkable heater.

Near 700 Bales,

Up to noon yesterday the Camden Oil Mill had ginned 693 bales of cotton this cason since August 27th,

American Legion to Organize,

HERE BIRDS FIND SANCTUARY

Area in Deita of Yukon River, Valueless for Other Purposes, Is Now Profitably Employed.

ar the tury. The most important, and "refuges" for the preservation of wild birds is a vast area in the delta of the Yukon river, proclaimed as such by an edict from the White House just ten years ago.

It is an area approximately equal to Massachusetts, and the most valuable feather species concerned are wild geese and wild ducks, which breed there in countless numbers.

There is found the proper home of the "emperor" goose, the "whitefronted" goose, and many species of ducks which are sought as game in other latitudes.

The region is known as "tundra country"-devoid of trees, swampy. with many lakes, and of no possible usefulness for agriculture or may other purpose. If, however, the wildfowl are there safeguarded on their breeding grounds, it will be a permanent source of game and food supply for Alaska and the entire Pacific coast.

In order that this may come to pass, it is necessary that the birds shall be probated during the mating senson against the wholesale slaughter which formerly was conducted by por hunters and alleged sportsmen from year to year- a method commonly adopted being to drive the belpless creatures into pens built for the purpose where they were ruthlessly murdered.

Solid Heat.

Another of the problems that our army in France disposed of in a pracgeal way was the supplying of fuel for heating and cooking purposes in the trenches. Solid fiel alcohol filled age at the transfer of the age of the bill because it was safe, conven-; lent to handle and burned without oder or smoke. As a result of the demand, huge factories were built to produce this novel fuel. Now new

COWBOY NOT YET EXTINCT

May Be Fewer Than Some Years Ago, but This Traveler Tells of Meeting One.

"You mean to say," I began, "that there are still real cow-" But as smiles were beginning to pass about the platform I desisted, realization beginning to dawn why the barber said that the men we had seen driving cattle back in Kansas would be pleased to have been called cow-

The trip at once began to assume a new interest, and when the mine bar ber came back on the platform I eyed him with something of that reserve with which one contemplates a decettful man. But nothing could penetrate his drawling sang-froid.

At a tank station further along there was opportunity to stretch our legs; opportunity, also, to observe at close range a bronzed, dark-haired cow-puncher who had paused on hi mustang to observe the train. The barber approached him confidently.

"Neighbor," he said, "I bought a gun in K. C., Mizoo, What do you

think of it?" The puncher took the wicked 44 balanced it in the palm of his hand. twirled it around on his forefinger. and then brought it to bear upon a tin can lying in the road about 20 feet as ay. Bang! The can leaped into the air. Bang! It rolled five feet further along. Bang! Again It flew into the air and rolled. Bang! It rolled again. Bang! The can disappeared in the dust.

"It's a good gun." said the puncher, handing it back, "only it shoots a little high.'

A little high! Rather a nice critirism, I thought. The barber snapped out the cylinder, reloaded the weapon and passed silently into the background. My impression was that he was avoiding some questions on my part relative to Kansas City bad men: but I may have been wrong,

We began to fly through the level ground, perspectives on all sides dorted with peaks upon which clouds rested. Suddenly along the trail appeared an altogether amazing, unlooked-for, almost unbelievable spectacle-two Indians jogging along onhorseback wearing moccasins, wide black trousers, red or pink shirts, their black hair secured by scarlet bands about their foreheads,-Scribner's Magazine.

Americanism in the Making.

Almost anything you can think of, it tion. There is a vital local need for is said, can be seen somewhere in that this organization in our county aside long, erratle historic street that strays upward from the point of Manhattan island, cutting across the streets and avenues of the world's largest city at its own sweet will. Something once seen there by Mr. J. B. Kerfoot, the author of Broadway, indicates that the enterprise, the daring and adaptability to new conditions that were characteristic of the early settlers in America are still characteristic of the people who are crossing the Atlantic to our chores in the twentieth cen-

Birds Farmers' Best Friends.

Examination of hundreds of stomachs of birds, taken in different localities and at all sensons, painstaking scientific observations of the birds' habits by trained experts, have now for many years been establishing, beyoud question, the fact that they are one of nature's most effective checks on the undue increase of insect and codent pests.

In the early days, the days before we had scientific study of the habits of birds, the connection in the popufor mind between birds and the sow og of seed principally took the form of speculation as to what proportion of the sown sewl or its product the liteds would get. Crows and black tards were observed to pull corn. The fact that some bernels were left in the further that it was the conworm that the crows were really after a In come B & Bowdes's, in Chris-

"When you charged over the top,

"Oh yes: they kept up a running comment."

Kentuckian Marries at Age of 125,

Lexington, Ky., Sept. 6,-John Shell, said to be the oldest living man in the United States, today celebrated the 131st auniversary of his birth here. The aged mountaineer celebrated his birthday by taking his first automobile ride. He told friends that this is the first birthday on which he did not work, and said he was anxious to get back to his farm. Mr. Shell is exhibiting himself at a fair here, and will use the money derived to pay off the mortgage on his farm,

Shell was first married at the age of 19, and lived with his first wife for more than ninety years. He is the father of twenty-nine children, the oldest being more than 90 years of age Six years ago he married again, at the age of 125.
