**Get Your Tractor Now**

A TRACTOR operating successfully on low-priced, low-grade fuels — kerosene, distillate, etc., is a paying investment from the very outset. This has been proved by the records of many thousands of Titan 10-20 tractors specially designed and built to operate on kerosene or any other crude oil distillate testing 39 degrees B. or higher.

**Titan Tractors are All Alike**

They are easier to handle than a farm team and easier to care for. You can do your work on time, plow deeper, prepare better seed beds, do more work with less help, and get more profit from your farm. They do the work that cannot be done by horses and pull in proportion to weight than horses. Horses must have rest whether the work is crowding you or not. If necessary, you can keep your Titan working continuously, without rest, until the work is done.

Here you have economy, efficiency, dependability — three prime essentials of farm power — carrying an assurance of bigger crops, better yields, and fatter profit. Order a Titan early, so that you will have it when you need reserve power.
