**Nurses For Influenza.**

As has been stated before and has been especially emphasized, the Division Office is not able to supply Red Cross nurses in time of epidemics except to do community nursing, and then not as long as communities are not doing what they can for themselves and making use of all of their own available nursing resources. Nurses who have registered for epidemic service are not to be used for private cases, and no town which has a number of nurses on private duty should expect some other town to furnish it with other nurses for epidemic duty, when that means that these nurses must be given away from what they are doing. This can be done only in case of a real emergency when the Division office is convinced by thorough investigation that the need of the first town is much worse and more immediate than that of the town from which the nurses are summoned.

The Division Department of Nursing is doing all in its power to help communities meet the problems of adequate nursing service that are coming up in these days of increasing epidemic, but the Division is practically helpless unless the communities learn to help themselves and each other. As long as the towns are not making real and effective use of the nurses which they already have, they should not expect other nurses to be sent to them from outside. In many cases they are expecting the nurses to do what members of the patients' families ought to be doing, especially those members who have taken the Red Cross course in Home Hygiene and Care of the Sick, instead of conserving their strength for the supervision of the nursing service of the entire community. This failure on the part of towns to utilize the resources within themselves instead of calling for outside aid is making a much more serious situation out of the present epidemic than is necessary because of actual conditions. This does not mean that the Division office will not help these towns where an actual emergency exists, but simply that it in turn expects the very best co-operation from the towns themselves in order to make the service effective for the whole Division and not for a few people or even for a few towns.

**No More Free Seed.**

Washington, March 2.—Acting on the recommendation of the new Secretary of Agriculture, the Senate agriculture committee today voted to eliminate from the annual agricultural bill the \$240,000 voted by the House to continue the time-hallowed custom of distribution of free seeds to the constituents by members of congress.

The zircon, found in Norway, Ceylon, and other parts of the world, has been suggested as a substitute for the diamond.

**GOOD HEALTH LIFE'S GREATEST BLESSING**

**Happiness and Success Within Easy Reach of Red-Blooded Men and Women.**

**Anemic Condition Unnecessary**

**Pepto-Mangan Makes Rich, Red Blood—Builds Up Pale, Thin, Anemic Men and Women**

(Advertisement)

Good health is the most important asset of life. Without a vigorous, strong body and a keen, clear mind, true happiness and enjoyment are impossible. And yet so many women, and men too, whose misfortune it is to be pale, thin and anemic, hopelessly accept this condition in the belief that robust health and real happiness are not for them.

Thousands of men and women have been restored to vigorous health and lasting happiness by Gude's Pepto-Mangan. This beneficial blood tonic contains the very properties so vitally needed to improve the blood. Pepto-Mangan, if taken for a few weeks, will enrich the blood and create thousand of the tiny red blood cells that are so necessary to carry nourishment and strength to every part of the body.

Pepto-Mangan is safe, beneficial, and pleasant to the taste. For convenience it is prepared in liquid and tablet form, both possessing exactly the same medicinal properties.

Be sure to ask your druggist for "Gude's" when you order Pepto-Mangan. "Gude's" is the genuine Pepto-Mangan. Look for the name "Gude's" on the package.

**A New Beauty Now Makes a Chalmers Doubly Charming**

 Quality First

THE case for Chalmers has rested itself for several years on its power rhythm, its rare ability to utilize the last ounce of power nature stored away in gasoline, and to provide gentle, steady power that was throbbles.

Now comes a new body—a new coach—to make this car doubly charming.

To see it is to want a Chalmers, for it is so simple in line, so elegant as a result of its simplicity.

You can add the final touch to this choice if you will but ride in one a short distance.

Hot Spot and Ram's-horn, those two ingenious devices that fertile minds invented to "digest" the raw, inferior gasoline of the day, will win you.

They wring out the power in the gasoline, feed each cylinder without favoritism, and supply a rhythm of action that is very engaging.

Also they take out the uneven throb, and once you experience this sensation you, too, will say Chalmers is one of the few great cars of the world.
