

Double-Barreled Service

WHEN you buy IHC machines, you also buy the Service that goes with them—the co-operation that exists between us and the International Harvester Company, and which we intend to continue with you. We expect to hold your confidence in the IHC line by furnishing the best implements, machines and farm operating equipment on the market.

We render to you a double-barreled Service in not only supplying you with first-class goods, but in seeing that these goods are kept in perfect running order long after the original sale is forgotten.

Our moral obligation does not stop with the original sale, but you can hardly expect us to assume any responsibility for the successful operation of IHC machines if you buy imitation repairs of inferior quality instead of buying genuine IHC Repairs.

We sell only genuine IHC Repairs made by the Harvester Company, and which are made of the same materials as used for the original machines. No imitation equals the genuine. Play safe!

ENJOYED TOBACCO IN SCHOOL

In the Seventeenth Century It Was Common for the Children to Use the Weed.

The latest diatribe against women smokers—by "a doctor to a famous life insurance company," according to the London paper which publishes it—classes the tobacco habit among women as an evil of modern growth. But when tobacco first reached England it was enjoyed in common by both sexes. In the seventeenth century, according to John Ashton, "it was not only usual for the women to join the men in smoking, but in Worcestershire the children were sent to school with pipes in their satchels, and the schoolmaster called a halt in their studies while they all smoked—he teaching the neophyte."

Scotch women used to enjoy a pipe the same way as they enjoyed a pinch of snuff. One of the compilers of the "Statistical Account of Scotland," published in 1791, records that "The chief luxuries in the rural districts are snuff, tobacco and whisky. Tea and sugar are little used, but the use of whisky has become very great. The use of tobacco may almost be said to be excessive, especially among the female sex. There is scarce a young woman by the time she has been taught to spin but has also learned to smoke. Smoking seems to have been introduced as an antidote to rheumatism and ague. The favorable alteration with respect to these diseases has only produced a greater avidity for tobacco."

TO REVIVE HOME INDUSTRY

Good Work Done by Knitters During the War Has Given Impetus to New Movement.

What was accomplished by the vast volunteer army of knitters during the war is one of the creditable facts in the history of the world upheaval through which civilization has been passing, says the St. Louis Globe Democrat. But for the millions of devoted women who kept the needles flying the horrors of the trenches would have been still more frightful and deadly. The achievements of the knitters have suggested the organization in New York of a society for the revival of home industry and domestic art. Its first move is to gather all the spinning wheels within reach and look up practical instructors in the use of a household implement that had become but an antique piece of furniture. Man-kind needs weavers as well as plowmen, and spinning at home is one of the oldest forms of industry. In the cabins of American pioneers the spinning wheel was a necessity, and kept busy in what, by a stretch of imagination, were called spare hours. Those were the days of homespun textiles because often no others were to be had.

Find New Kind of Animal.

Captain Phillips, writing from British Ruanda, in the Tanganyika territory, states he has shot a specimen of an hitherto unidentified species of duiker. The animal is about the size of a large goat, and is known as an eppo or empuyl by the natives, to whom it is in a way sacred as being the totem-beast of Musinga, the now reigning chief or mwami of the country of Ruanda, over the greater part of which a mandate was recently given to Belgium by the peace conference.

The eppo lives in the bamboo forests of Mount Sabino and other mountain forests, and seldom comes into open country. It often takes refuge in the low and broad forks of large trees. The creature has a stumpy tail, orbi horns, and marsh hooves; in color it is a rufous black, and has a bright yellow stripe along about half of its backbone. In the case of the present specimen, which was, apparently, healthy, part of the back was nearly bald of hair.—London Times.

Plane That is All Wing.

A system of airplane construction which is being developed and particularly adapted to large craft appears on its face not only interesting but plausible and practical, provided the location of the weight is not detrimental, says a report by J. H. Colwell, published in the Journal of the Patent Office Society. Broadly stated, the system comprises a hollow plane merged into the fuselage so that the large trussed wing spars, the engine housings and fuel tanks, as well as the pilot, are enclosed within the lifting surface itself. The center of the plane between the upper and lower walls is deep, while the wings taper to small depths toward the tips. The entire machine, including the pilot's car, is practically a part of the lifting surface, thereby necessitating comparatively few external wind-resisting parts.

He Rode Free.

The rear platform of the car was crowded with poor business men in starched collars and rich laborers in overalls. There would be nothing unusual in that if one of the overalled party had not given the crowd a lesson in thrift.

"See, I've got a dime," he told the conductor.

The conductor nodded.

"I'll pitch it. Heads you get the dime or tails I ride for nothing."

The conductor nodded again and the coin fell to the air.

"Tails," announced the overalled one triumphantly, and he took his place with the rest of the crowd.

WHICH Phonograph is going Here

What phonograph is going to entertain your friends?—play for your dances?—bring you your favorite music?

The best phonograph!—None other!

The phonograph that gives you great orchestras and bands in the sublime fullness of their glory. The phonograph that gives the actual voices of great vocalists.

How are you going to tell which phonograph this is?

Come in and hear the Edison Turn-Table

Comparison. It will help you decide the big question—and decide it for yourself.

The Edison Turn-Table presents all the leading phonographs in a scientific comparison. It plays them all in the same room, from the same position, using the same artist as a basis for the comparison.

The Edison Turn-Table Comparison makes it easy to find your best phonograph. You ought not let another week pass without hearing it.

Ask to hear the Edison Turn-Table Comparison

(Given only on Request)

The Edison Turn-Table Comparison is conducted apart from the sales end of our business. It is a service for all music-lovers, whether they come to buy, or not. Come in whenever you have 10 minutes to spare, but kindly ask for the Edison Turn-Table Comparison since it is given only upon definite request.

Notice to Manufacturers and Representatives The Talking Machines used in these tests are kept by us in the best possible condition. Manufacturers of such machines, or their representatives, are invited to inspect them, or regulate them, or to substitute other machines of the same make, of their own selection, of equal or greater value, at any time during business hours.

Why Lose the Time and Money You Have Invested in Your Crops?

Why should you lose time and money you have invested in your crops by a Hail Storm when a Hail Policy of "The Franklin Fire of Philadelphia," will protect you against such loss? The money losses each year on Growing Grain from Hail Storms, are enormous, and no Farmer who is lucky enough to escape one year can be sure he will not lose the savings of a lifetime the next year from this cause.

In view of the high price for Cotton the possibility of loss from Hail Storms is an especially interesting question for every Farmer.

Insure today in "The Franklin Fire of Philadelphia," (Organized in 1829 and in business ever since) and be on the safe side! Our agent will give you complete information about the policy and the rates asked.
