DR. H. A. ADRIAN TO LECTURE HERE

Will Tell Audience of "The Wonders of Burbank."

Address Will Set Forth Powerfully Achievements of the Great Plant Wizard.

The marvelous achievements of Luther Burbank, the plant wizard, will be powerfully set forth at the coming Redpath Chautauqua by Dr. Henry A. Adrian, friend and co-worker of Burbank.

Doctor Adrian will carry with him specimens of the new plants and improved varieties that Mr. Burbank has

DR. HENRY A. ADRIAN

produced. He will also tell of the astonishing wonders that Mr. Burbank is working today.

Doctor Adrian uses the development of plant life as a plea for the development of child life as well—for cleaner and better homes and for better heroes to place before our school children. According to Doctor Adrian, the achievements of Thomas A. Edison and Luther Burbank place them among our greatest heroes today.

Nashville, Tenn., Plumber Family in Nashville, Tenn. will be provided with hot water supply by Nashville Gas Co. The new plant, located at the corner of Third and Main streets, will cost \$100,000 and will be completed by the end of the year.

BULL POUT QUITE AT HOME

Heroes of This Remarkable Fish Yarn Furnish Something New in Piscatorial Stories.

One feels almost like apologizing for telling a fish story that isn't a bit like any other fish story ever told since the days of Jonah, but there is one good excuse for the uniqueness of this fish story. It is gospel truth, says George L. Brown, according to the New York Sun. The scene of it is Elizabethtown, a village completely surrounded by Adirondacks.

The streams and ponds around Elizabethtown have been famous in their day for speckled trout and more recently for pickerel, perch, black bass and bull pout.

Let the humble bull pout be the hero of this yarn, the "Sacramento cat," as he has been named in California, the sluggish browser of weedy ponds, that will live wherever a frog can and bite anything from an anglerworm to a piece of a tin dinner pail. And the bull pout's tenacity of life may be credited with a good share of the uniqueness of this unprecedented fish story.

In the days when the thing happened the young fellows of Elizabethtown used to go fishing for bull pout Saturday nights in Lincoln pond or in the "marsh" not far away. And on Saturday night Carl E. Daniel and his cousin, the late Arthur H. Norton, went out and brought home a fine mess after midnight.

Carl was tired and he just dumped his bull pouts with the grass in which he had carried them home, into a dishpan. Then it occurred to him to put the dishpan in the kitchen sink and turn on the faucet a little, and he did so before going to bed.

That's where the story begins. The rest of it happened while Carl was asleep. You see, the grass overflowed with the water from the dishpan and clogged the drain of the sink. And then the sink filled up and overflowed. And then the whole of the ground floor of Carl's home, "Colonial Cottage," became a pond. And when Carl got up on Sunday morning and went into the kitchen he found all his mess of bull pouts swimming around over the floor as happy as if they were back in Lincoln pond.

That's the story, and if you doubt that it happened in just that way you can ask Carl, who is now head of the Elizabethtown Hardware company, Inc.

A Secret Society.

"It would shock, or bore, or disgust the world in general, I suppose. If all the school teachers and office workers who want to marry suddenly tell the truth. The public prefers to believe that women cherish their economic independence more tenderly than they ever could cherish husbands and babies. And our pride helps to keep up the great delusion.

"Many of us, especially the older ones, would never admit our loneliness and disappointment, perhaps, even to ourselves; but the majority, I believe, have had to tell someone—some equally lonely woman friend—whether or not we told it in words, the story of frustrated hopes, of baffled instincts, of imprisoned powers.

"We form a kind of great secret society. The initiation is, mercifully, gradual; the dues are endless; the badge may be anything from a communion ticket to a Phi Beta Kappa key; the password, seldom uttered, is always the same—loneliness."—From "No Courtship at All," by Another Spinster, in the Atlantic Monthly.

Clever Smuggler Caught.

What is said to be one of the cleverest devices ever developed for smuggling was uncovered on Puget sound recently by federal officers, when a speedy power boat, believed for several months to be a successful smuggler of illicit goods from Canada into the United States, was captured at Seattle. It had been known for some time, federal officers state, that a dumping device was in use on some of the smuggling boats, says Popular Mechanics Magazine, but a complete outfit of this type had never before been captured. Along with the seizure, more than \$2,000 worth of contraband was taken, which made it possible for the government to confiscate the boat.

Climbs Fujiyama Top.

Major Orde Lees, British balloonist and Arctic explorer, has just completed a trip to the summit of Fujiyama, the celebrated mountain in southeastern Japan. It is said he is the first European to have reached the top of the mountain in winter, which is 12,385 feet above sea level.

Major Lees was accompanied by H. C. Irish of London, and accomplished his feat in 48 hours. The last 4,000 feet of the climb were made over slippery ice. Major Lees was a member of the Shackleton Antarctic expedition in 1914, and he and Mr. Irish are members of the British air mission to Japan.

Electric Sealing Machine. A sealing machine, in which the wax is electrically melted and which is intended to meet the requirements of bankers, brokers, jewelers and large commercial institutions in the sealing of valuables, has made its appearance. The machine can be attached to a cord to any light socket and operated at a cost of one-half cent per hour. Popular Mechanics Magazine.

Spanish Shawl Is Theater Curtain. A new drama, entitled in one of the New York theaters is really a gigantic Spanish shawl of silk and lace, 35 by 40 feet in dimensions. To embroider the lace fabric took 75 of the most skillful Spanish needlewomen 34 days.

BOON TO MANKIND

Science of Canning Food of Immense Practical Value.

Few Discoveries or Inventions, It is Pointed Out, Have Been of Greater Benefit to Humanity.

Though less spectacular, the science of canning was a discovery only equaled in importance by such inventions as the telephone, the wireless and the airplane. When we stop to realize that food, shelter and clothing are man's most vital needs, and what a large proportion of our food is preserved for us today in canned form, we better understand the full significance of this important discovery.

Pickling or drying were the only methods of preserving foods that were known up until about a century ago. In 1795 the necessities of war prompted the French government to offer a reward of 12,000 francs for a better method of food preservation. The prize was awarded to Nicholas Appert, and his method stands today as the real basis of our present process of canning—namely, hermetic sealing and sterilization by heat.

This discovery has added immeasurably to the wealth of the world, because it has meant that at times of harvest the surplus crops, which it is impossible to get to market before they spoil, have not had to go to waste, but have been preserved for use at other periods of the year when Nature is producing less and when, but for the science of canning, we would have to subsist on much less attractive fare. This is conservation in the broadest and most economic sense of the word.

But the process of canning not only benefits the world at large; it has very definite advantages for each of us as individuals. For that much-talked-of Mr. Average-Man-in-the-Street and his Housewife-in-the-Kitchen, "canning" eliminates the seasons. In effect, it "makes summer last all the year 'round," and in midwinter brings us the crops of midsummer.

And canning also eliminates space or sectionalism, for those of us who live in the interior may still enjoy oysters, crabs, lobsters and other sea foods whenever we wish; and those of us who live in the eastern states may nevertheless have access to the delicious fruit crops of California and Hawaii. And so on the world over. The pioneer in Alaska, and miner in the mountains of South America, the explorer in the Antarctic, men and women everywhere on the fringes of civilization, all have at hand—thanks to the can—the same wholesome appetizing foods that are served to the most exacting guest in an exclusive New York hotel.

Because the science of canning has so done away with time and space—with respect to food—the can has come to be known as a modern genie of the home. The housewife whose pantry shelves are well stocked with canned foods is able to choose her meal from whatever corner of the world her whim suggests.

QUALITY KNITTED BATHING SUITS PREFERRED BY THOSE WHO KNOW

ACCORDING to the calendar, anticipation will soon be realization to those looking forward to the season of swimming and sunbathing. Why not forestall the usual plea of regret, "I have no bathing suit," by preparing aforesaid.

It was remarked at the sea-coast winter resorts this season, that the plain high-quality knitted bathing suit were prime favorite. Of course there were many novelty creations which pass under the title of bathing suit, which are in reality beach costumes of the elaborate sort. If one is not a water fan, this sort of outfit is charmingly in accord with the picture, but when it comes to real sport, genuine healthy hearty playing the waves, or professional swimming, nothing gives the satisfaction of the knitted bathing suit.

It is, however, good economy to buy only the best. There are certain standard makes which guarantee fast color and enduring suppleness. It is a waste of money to invest in any other.

Some of the new knitted suits are most attractively designed, as verified in the accompanying picture. This model is to be had in very interesting color combinations, such as gray with navy skirt or orange border. It is of heavy knit and in every line shows

WIDELY-KNOWN

ORATOR COMING

Edward Amherst Ott to Lecture at Chautauqua.

Will Give One of the Great Addresses Which Have Made Him Nationally Known.

One of the headline lecturers at the coming Redpath Chautauqua will be Edward Amherst Ott, eminent educator and one of the best known orators on the American platform.

Mr. Ott will give his inspiring, timely lecture, "Victory," one of the greatest of his famous "Art of Living" lec-

EDWARD AMHERST OTT

tures, notable among which are "Sour Grapes" and "The Spenders."

"Victory" is not a war lecture. It is an after-the-war lecture. It discusses the vital questions which are facing the American people. It is a real construction not a reconstruction lecture.

Edward Amherst Ott's treatment of great national problems will make a vivid and lasting impression on every community.

Easter Egg of Death.

The city of Paris, a few years before the war, presented the late czar of Russia with an Easter egg containing jewels to the value of \$10,000. The same year one of his revolutionary subjects sent him an egg stuffed with dynamite, timed to explode at a certain hour. The weight of the egg aroused suspicion, and a tragedy was averted by the secret police opening the egg and discovering its contents.

Paris Taxes Altitude.

The higher above the pavement Parisians live the higher taxes they pay. In place of the unpopular levy on pianos, the stair carpets and elevator of apartment houses will be taxed. The more stair carpet or elevator you use the more you pay.—Scientific American.
