THE CAMDEN CHRONICLE, CAMDEN, SOUTH CAROLINA, FRIDAY, AUGUST 14, 1925.

THE CAMDEN CHRONICLE H. D. Niles . . Editor and Publisher

Published every Friday at No. 1109 Broad Street and entered at the Camden, South Carolina, postoffice as second class mail matter. Price per annum \$2.00.

Camden, S. C., Friday, Aug. 14, 1925.

The first national forecasting service was established in France in 1855. The first definite discovery of oil in Australia has been reported by J. A. M. Elder.

The edition of Rudyard Kipling's first book, "Schoolboy Lyrics," published in 1881, was sold recently for \$1,000 in the American Art Galleries.

The population of the United States has increased by eight million during the past five years.

The total registration of motordriven vehicles in the city of Havana, Cuba, is 17,464.

The Mound Builders Country Club of Newark, Ohio, use the ancient earthworks of the mound builders as tees, traps, and bunkers.

One of the smallest radio receiving sets in the world is mounted in a shirt button, five-sixteenths of an inch diameter. It is audible on a loud speaker nine feet distant.

The Argentine wheat harvest begins the first part of January, in many sections of the country.

Japan has an avenue of trees, fifty miles in length, extending from the town of Nikko to Namada.

It has been estimated that about one-fifth of the population of the United States attends the movies each day. The amount of admissions in one single year totaled \$906,000,-000.

The "Trans-Canada," of the Canadian Pacific railway, claims the distinction of being the fastest transcontinental train in the world.

Galloway-Moseley Wedding in Sumter

Of more than county-wide interest is the announcement of the marriage of Miss Irene Galloway of Bishopville to Mr. G. B. Moseley of this city which occurred August first in the presence of a limited number of friends and relatives gathered at the home of the Rev. Wells in Sumter.

Miss Galloway who is the daughter of Mr. and Mrs. J. D. Galloway of Bishopville has often visited in Camden and has won many friends by her grace and beauty. Mr. Moseley is connected with the jewelry establishment of G. L. Blackwell and is one of 'Camden's most popular young men among associates both in business and social circles.

After spending their wedding trip in the mountains Mr. and Mrs. Moseley are at their home on North Mill

Mr. Brisbane's editorials are published as expressions of opinions the world's highest-salaried of editor and The Chronicle does not necessarily endorse all of his views and conclusions.

Horrible, But Welcome

Our navy will make, experiments with what is called the "death stroke," an interesting invention guaranteed to destroy all life with which it comes in contact within a radius of twenty miles.

It is horrible but welcome. Make war dangerous enough and war will stop. Don't believe the ignorant mil lions who think that a thing always will be, because it always has been. Two men pointing automatic pistols at each other's hearts don't shoot. That only happens when one of them gets the drop.

Mr. Aldrich, prosperous lawyer, is sucd for divorce. His wife alleges cruelty. He replies, "My only cruelty was almost storing her to death with jewelry." He spent \$175,-000 on jewelry, gave the lady a \$35, 000 sable coat, a chinchilla coat cost ing \$8,000, and securities worth \$100, 000.

The lady replies that not sables, not jewels, not securities, not even the fur of the chinchilla, most interesting little animal, can give real happiness.

She's right. But in this world we measure everything with money. The lady's lawyer, George Gordon Battle, demands for her alimony of \$75,000 a year. The court can give her that; it cannot give her love and affection.

One Minute After I Died ' William Jennings Bryan made many speeches worth hearing, and

the world applauded. What would the world give if he could come back and make another speech of thirty seconds on "What I saw, what I felt, what I knew, Where I went, the minute after I died?" Quality, Plus Advertising

The British Government, to fight depression in British trade, will undertake international world advertising on a gigantic scale. This proves again what everybody knows, that Great Britain has statesmen working for her.

Five billion dollars will be appropriated at first to boom colonial goods. The idea of the British Empire, solid and sound as a steel bullet, is that quality, plus advertising, can overcome any trade depression. Anybody can stand poverty, because almost everybody is compelled to stand it. We have plenty of prac tice. Few can stand prosperity. Farm lands on the edge of Detroit have boomed, and farmers have sold out at prices never dreamed of. Now fifteen of the suddenly rich accord-Miss Player, and besides her numer- ing to doctors, are nervously unbal-The shock was too much for them. In poverty they could have kept theeir balance indefinitely. Two young roughs, each a gang operates a grocery store on West leader, engaged in a fist fight, and a blow on the head stretched Anthony Functal services were conducted by de Lucca, seventeen, dead on the side-The police will do something about tooh Baptist church Monday morning this, because it, wasn't a "regular and interment followed in the church fight," with ropes around the fightuffians watching and gate re-- that make it profitable to vioin the taw. Ancient Castle Now

Used as an Office There is a castle twenty odd miles down the river from London which houses a complete office staff in much the same manner as might a block of chambers in the city of London or elsewhere. It was built in the Seventeenth century, and is of Norman design.

This once fortified stronghold lies off the London-road which runs into Gravesend, the castle overlooking the Thames is almost in direct line with Tifbury Docks on the opposite side. The approach to the castle is by a

slope cut out of the chalk cliffs off the main highway. Northfleet town lies several hundred yards distant. Once the ornamental gateway at the foot of the slope is reached, the Twentleth century is left behind.

Nearby is an ancient dockyard. This fell into disuse many generations back; but not long age a plant for the ninoufacture of paper was installed on the site. Thus arose the problem of accommodating the cierical and other staffs employed in the husiness during the ordinary working hours.

The demand for castles by the moneyed classes being somewhat limited, the stronghold at Northfleet was taken over and its interior con verted into up-to-date offices. Yet, modern as is the interior aspect, the view from within across the river is still by means of cross-bow windows and stone mullions.

Humble Clam Uses

Tools to Build Home The use of tools by so lowly a crea ture as a clam is described by Dr. D

T. Marshail in Long Island Life. There is a species of clam called s plddock, which bores holes in hard clay and soft rock and spends its life in the cavity so made. The piddock burrows its home in the rock by constantly turning its rasplike shell in the cavity. This explanation is all very wall after the bole is started, but how about the beginning of the hole before the piddock could get in to turn round. The piddock begins the hole by rubbing the surface with its foot, or, as one may as accurately describe it. with its hand, in which it holds a handful of sand grains. Is not this just as much making use of a tool as the action of the housewife who uses a handful of saud to scour a pot?

Two Images in Metal

I saw once lying side by side in a great workshop two heads made of metal. The one was perfect; all the features of a noble, manly face came out clear and distinct In their lines of strength and beauty; in the other scarcely a single feature could be recognized; it was all marred and spoiled. "The metal had been let grow a little too cool, sir," said the man who was showing it to me. I could not help thinking how true that was of many a form more precious than metal. Many a young soul that might be stamped with the image and superscription of the King while it is warm with the love and glow of early youth

MAGISTRATE IMPOSES FINES

Negro Forgets to be Kind to Animals and is Assessed Twenty Dollars

Kershaw Truesdell, in his trial before Judge Nicholson in magistrate's court this week, entered a plea of guilty to charges of public disorderly conduct and was fined twenty-five dollars. R. L. Peoples, whose case also came as a result of a recent fight on the Columbia highway near Camden, received a similar fine for his alleged drunkenness while driving an automobile.

Wyatt Williams, colored, appeared before the magistrate to answer charges of cruelty to animals and was found guilty and fined twenty dollars. Williams failed to give his mule sufficient food, the evidence showed, and since trial the animal has died as a result of starvation, it is said.

Joe Rodgers was found guilty of operating a motor vehicle without proper license and received a fine of twenty dollars.

Elmo Houston and Lewis Sease entered pleas of guilty to vagrancy and when unable to meet the fine imposed were given thirty days in which to help improve the county's system of roads.

The seventy-five pyramids in

Egypt, that were built as tombs for the kings, date from the period between the fourth and twelfth dynasties.

Believing that the "elixir of youth" may be obtained from the California redwood trees, an Oregon scientist is now experimenting with the sap to determine whether it will prolong life.

Treated For

Stomach Trouble

H. Heiselbotz of 4260 Troy Street, Beaumont, Texas, says he suffered for over a year with his back, bladder and kidneys, and when he would eat it seemed to disagree with him, and was treated for stomach trouble. He took five bottles of Hobo Kid-

ney and Bladder Remedy and has not been bothered since. He now feels strong and fine and can eat any-

sells for \$1.20 per bottle or six bottles for \$6.00.

or sug brutality The Power of Mothers

The marriage of a young girl in Vanderbilt family has caused newspaper discussion. A Protestant Bishop performed the ceremony , although the mother is a Catholic and her daughters were brought up in the Catholic faith.

All that is the business of the famiv and of those immediately conerned. But in one statement made by the family you observe the ancient -dom of the Catholic Church.

When young Mr. Vanderbilt, a Protestant, married Miss Fair, a Cathie, it was stipulated on the moth er's behalf that all daughters born of ne union should be brought up in the Carr die Church. There is wisdom. Inaughters become mothers, influence the children and the men about them. from thee next generation.

The enurch that has the mothers .ts ide is the church that will as yo for mothers (reate and guide each deviated of the the men.

CUT ALL WEEDS.

finite is an ordinance of the City quing all weeds to be cut during month of August This is therethre to notify each and every citizen within the corporate limits of the (its to have all weeds on their premses cut during this month in complance with said ordinance. Notify Health Officer as soon as weeds are cut and raked up and they will be removed as quickly as possi-ble. JOHN W. WILSON, Health Officer. August 4th, 1925

is allowed to grow too cold, and the writing is blurred and the image is marred.-Canon Teignmouth Shore.

Silver Conductors

Many questions are constantly being received which refer to the desirability of using silver as a conductor In radio receivers. The answer is that silver is the best conductor of electricity known and has several advantages over any other conductor. Most metals, such as copper, brass, etc., are sufficient to corrosion. This corrosion, which forms on the surface of the motal, greatly increases the resistance of the conductor to radio frequency currents, which travel on the surface. This is not true in the case of silver. Silver oxide, which is the corrosion which forms on silver, is an excellent conductor of electricity. Becouse of this fact sliver is an ideal metal for switch contacts, tube sockets, etc.

If You Want Solitude

Anyone searching for solitude should go to Tristan da Cunba, a very lovely Island which is a six-day trip by steemer from Cape Town, South Africa. That statement should be modified to say a six day trip when steamers run, but it is often many months before a ship calls at this little south Atlantic istand. The inhabitants, few in namher, would starve were it not for o castored supplies, which are brought ishare with great difficulty, owing to ne surf
