The Mark of Quality
25 Years of Firestone Service to Highway Transportation

25 years of anticipating the requirements of motorists—making manufacturing processes more certain—producing a higher standard of quality—25 years of unswerving adherence to the Firestone pledge, "Most Miles per Dollar"—summarizes Firestone's record of service to car owners.

This Firestone record could only have been made through furnishing the public with outstanding values and is, consequently, your assurance of quality and lowest prices. If you would like to know more of this wonderful record, ask your Firestone dealer to send you an illustrated folder. With today's high cost of crude rubber and other raw materials, Firestone's opportunity to serve the public was never better, due to its great volume and special advantages in buying, manufacturing and distribution.

Firestone factories have grown from a small building approximately 75 x 150 feet to mammoth plants having floor area of over 60 acres—from a capital of \$50,000 to over \$50,000,000—from an annual sales volume of \$100,000 to over \$100,000,000—all in the short period of 25 years. AMERICANS SHOULD PRODUCE THEIR OWN RUBBER... Firestone

Praise For Stevenson
The following editorial in a recent issue of The Pageland Journal gives deserved praise to our able Congressman, W. F. Stevenson: It is just a little early to be discussing the race in this district for Congressman, but no earlier or more out of place than to be throwing hats into the ring. So here goes a crack at the target. There are no entries as yet against our Congressman, that is, in an official way, but according to reports, the woods are full of would-be Congressmen. If there is one thing the people of the South are guilty of that they should steer clear of, it is changing officers too often. We believe when the office holder gets to thinking he owns the office and that he is the boss, instead of the servant, of the people, it is a good time to give said officer the pink slip and say to him, your room is preferable to your company. Then when an officer has been

tried and found wanting in morals of leadership, he should be replaced by one who is not deficient. Then we believe when we get a good man, one who is efficient, he should be kept in office. The people lose by making a change. This district is peculiarly fortunate in having a representative in Congress in the person of Hon. W. F. Stevenson. He is moral, brainy, energetic, watchful. He has proved his efficiency repeatedly. Then he is physically a real man, and the physical man has much to do with the man as a whole. Now, we do not believe the voters of this district are going to make any change. We believe W. F. Stevenson is going to succeed himself. If it were not for his splendid service as a Congressman, we would draft him for governor and the old Palmetto State would do herself proud to put him in the governor's chair. We believe the people of this district are going to let good enough alone. We are honest in our contention to keep our present Congressman where he is and in proof of it we say right here that we do not care who runs, W. F. Stevenson will have our support. We believe he is the man who has kept faith with the people and that he will continue to do so. Now what more can the people ask? We do not know who is going to run in the coming race and it makes no difference. We want it clearly known that we are for the best men for office irrespective of friendship. We would not support our best friend for any office if we did not believe he was the man for the place. We like the man as a stalwart Christian layman, we admire him as a big American, but if we did not believe he was the all-round man for the place we would not support him. The first time we ever saw him was many years ago as he sat as chairman of a big State laymen's meeting in one of our progressive little cities. He impressed us then as being a real big man. We have watched him ever since and we can say of him, "Well done." We appreciate his services in Congress, therefore we are going to show our appreciation in more than mere words and we believe a big majority of the voters of the district are going to do the same thing. We do not believe they are going to be ungrateful to a public servant.

Conditions Could Be Remedied. Commenting upon South Carolina's murder record, as revealed by facts and figures published in a recent issue of The South Carolina Gazette, The Greenville Piedmont says: "Undoubtedly Mr. Duncan hits the nail squarely on the head when he declares that public opinion that will not tolerate murder and that will insist upon the full penalty for murderers will put an end to the excusing of the murderer, or slapping the murderer on the wrist as the penalty for his crime. Until the people generally have formed the unalterable will to make the punishment fit the crime, murder will go unpunished or will be lightly punished in South Carolina." Some other conditions precedent to making human life safer in South Carolina, are pointed out by The Piedmont: 1. Feeble-minded men must be barred from the jury box. 2. A better system of selecting jurors must be provided. 3. The prosecution must be given the same number of challenges as the defense. 4. New trials must not be given by the Supreme Court, unless there has been substantial, rather than technical, error in the trial of the case. 5. The power of executive clemency for convicted murderers must be less liberally used or restricted by law. 6. Such delays as have been secured in the Bigham case and others must be prevented. 7. South Carolina must remodel its system of administering the criminal law upon the lines of England's. 8. The press and the pulpit more than ever before must continually bring home to the people the imperative necessity for the conviction of murderers.

Miami Realtor Held For Murder. Miami, Fla., Aug. 20.—Mrs. H. D. Hunt, who died in a hospital here yesterday, came to her death from poison administered by John Gobel, wealthy Florida real estate operator, a coroner's jury declared today. Mrs. Hunt was visited by Gobel at the local jail Tuesday night, after being placed there under a warrant charging she had stolen a \$1,500 diamond ring from Gobel, with whom she had been friendly. While Gobel was visiting her she ran from the cell, declaring he had forced her to drink poison. County Solicitor Robert Taylor testified that while examining Gobel, the latter offered him a \$500 bribe to "fix things up." Gobel, he said, denied giving Mrs. Hunt poison, but admitted he had been on very intimate terms with her previous to her arrest. Deputy Sheriff L. A. Short also said Gobel had offered him a bribe. The deputy obtained a blank note, he said, and the wealthy real estate man, who came here from Daytona, Fla., filled it in for \$700.

Jury Convicts Rudolph Disse. Richmond, Va., Aug. 20.—Rudolph Disse was sentenced by the judge in Hastings court here today to die in the electric chair for the murder of Henry Grady Carter. The jury of Fredericksburg citizens found the 20 year old triple slayer guilty of first degree murder for shooting and almost instantly killing the restaurant owner, his rival for the affections of Mrs. Vivian Tomlin Peers, 18 year old clothing model. Mrs. Peers and Detective Harry Burke also were killed and Willis Britt, automobile salesman, was wounded July 28th, last. The verdict of the Fredericksburg jury, which was called upon to decide the case when Judge Frederick W. Coleman, presiding, held an unprejudiced jury could not be obtained in Richmond, was brought in at 1:27 o'clock after less than an hour and a half of deliberation. The prisoner showed no emotion when the verdict was rendered. A motion by the defense, that the verdict was contrary to the law and the evidence, will be argued August 28th. Another defense motion that Disse be incarcerated in an insane asylum until a petition for a writ of error could be disposed of also was continued to that date.

Lightning Kills Three. Camilla, Ga., August 24.—Three persons were killed near Sales City late this afternoon when a house in which they were seeking refuge from a storm was struck by lightning. The dead are Julian Gregory, 11; Mrs. Albert Pitts, 20; and Tony Webb, 10. They were all the children of Charles W. Webb, prominent citizen of Sales City. Rain and wind did serious damage to the crops. R. I. Manning's farm at Meredith, Lee County, was visited by a disastrous fire about 3 o'clock Sunday morning, when barn, stables, cow shed, with all their contents, and seven mules were lost. The loss is estimated at approximately \$4,000 with \$1,200 insurance.

Family Reunion. A reunion was held at the home of Mrs. Laura Truesdale, of near Westville, August 9th, and the following children and grand children were present: Mrs. L. W. Blanton and sons, Lawton and Charles, of Perry, Fla.; Mr. and Mrs. C. H. Truesdale and children, Charles and Misses Edred and Ozelle, of Kershaw; Mr. and Mrs. B. C. Truesdale and three daughters, of Boykin; Mr. and Mrs. D. D. Ogburn and little daughter Lucile, of near Heath Springs; Mr. and Mrs. S. L. Rush and twin daughters, Irma and Iris; Mr. and Mrs. F. B. Truesdale and twin sons, Harvard and Howard, also Ben; Mr. and Mrs. M. J. Truesdale and daughter, Vira and twin sons, Boyd and Loyd, and triplets, Mary, Martha and Marion. Those beside the family were Misses Cornelia and Diana Jones and W. L. Ogburn.—Kershaw Era.

Grass Grows in River. Greenwood, Aug. 20.—An acre of grass, six or eight inches high is growing in the bed of the Saluda river at Ware Shoals, just below the dam of the Ware Shoals Manufacturing plant, where ordinarily the river covers all the rocks and dirt in the bed. This unusual condition is due to drought, large spots of the river bed being above the few inches of water now flowing in the stream. The Country Gentleman is the oldest agricultural paper in the world. It was established in 1831.

Man Hangs Self. Greer, August 25.—Using a leather belt to suspend himself from the bars of his cell door, Allen Moore, about 29, a resident of the Greer mill village tonight committed suicide by hanging himself in the Greer jail. He was arrested about 6 o'clock by a city policeman, on a charge of drunkenness and disorderly conduct and placed in jail. Moore's wife and his mother-in-law came to the jail to visit him and when escorted to his cell found him hanging dead from the upper bars of his cell door. Asiatics who served in the United States Army, Navy or Coast Guard during the World War are not entitled to naturalization, the Supreme Court has decided.

The High Cost of Postponing Permanent Highway Building
Poor motor roads stifle industry and agriculture, waste huge sums annually in high maintenance costs, and greatly increase gasoline, tire and repair bills. There is no community that isn't paying a heavy price for having too few permanent roads. Many sections of the country—on which states—are trying to operate twentieth century traffic over nineteenth century roads. Even what we often call the more progressive communities are far behind the demands of modern highway traffic with its 15,000,000 motor vehicles. From the Atlantic to the Pacific, and from Canada to Mexico, we need more Concrete roads—the roads for twentieth century traffic. Your highway officials want to be of the greatest possible service to you. They know you need more Concrete roads—the roads for twentieth century traffic. Get behind them in many ways and means that will provide these roads and streets. Such an investment will pay you big dividends in the future. PORTLAND CEMENT ASSOCIATION Hurt Building ATLANTA, GA. A National Organization to Improve and Extend the Uses of Concrete OFFICES IN 50 CITIES

Permanent roads are a good investment—not an expense
