

## POULTRY TIPS

By LEONARD BROWN

(Conducted by Leonard L. Brown, internationally known authority and founder of the Brown and Mann strain of S. C. W. Leghorns. Enquiries addressed care of this paper gladly answered by Mr. Brown.)

### Cost of Pullets

Most of us raise poultry for the eggs we get. That means that the laying pullet and hen is the source of our profit, and I believe most everybody will be interested in the figures that the Pennsylvania State College of Agriculture found recently in extensive experiments to determine the cost of bringing a flock of pullets to maturity.

The figures include all costs, from the purchase price of the leghorn chicks, on through to 26 weeks, which is taken as the time of maturity, when the pullets are ready to lay. They figure this cost at \$1.26, and here is how they get it:

Cost of 2,600 chicks, at 20 each	\$520.00
Total value of all feed consumed	681.03
Mash, 14,366.5 pounds	442.07
Scratch feed, 7,669 pounds	221.19
Milk, 5,079 pounds	17.77
Coal for brooding (7 brooder houses)	29.34
Labor, 934.72 hours	327.15
Depreciation on brooding equipment, 10 percent	28.00
Interest on capital invested in chicks, brooder houses, supplies, for 6 months, 6 percent	87.16
Total	\$1,725.18
Receipts from sale of 924 cockerels at 60 cents each	\$554.40
Net cost of 926 pullets in laying houses	\$1,170.78
Net cost per pullet	\$1.26

Mortality on the 2,600 chicks, including all pullets culled as undesirable, amounted to 34.6 per cent. The pullets were not credited with any eggs laid on the range.

The above figures are considered typical and it would be interesting to check your own costs against these, item by item.

### Town's Oldest Woman 'Grandma' To Ninety

Shaw Rapids, Iowa—Mrs. Gertrude Johnson, who is this town's oldest active woman at 89, is called "grandma" by 90 children. She has five sons and two daughters, 4 grandchildren and 25 great-grandchildren. She came to America from Norway 42 years ago, lived 2 years in Illinois, 13 in Omaha and the rest here.

Let me figure on your next building job.  
Floor dressing machine.

### PAINFUL INDIGESTION

"I SUFFERED a good while before I found something that would help me," writes Mr. E. W. Berry, of Neosho, Mo. "My trouble was indigestion, pains in my chest and a tight, bloated feeling that would make me feel smothered. Speaking of this to a friend of mine, he told me that Black-Draught was good for this trouble. I went over bought a package. It certainly did help me, so I continued to use it. I am in the transfer business, and sometimes when I would be hungry and ready to eat, I would get a call and would have to eat too hurriedly. This would cause indigestion. After I started using Black-Draught, I found it did me a world of good. It is splendid for biliousness and stomach troubles."

**Black-Draught**  
For CONSTIPATION, INDIGESTION, BILIOUSNESS  
WOMEN who need a tonic should take Black-Draught. It is good for all ages.

### Pickens Farmer Feels Penalty of New Law

The full meaning of the Jones prohibition enforcement law, which was recently ratified by the United States senate, was brought home to Andersonians yesterday afternoon when W. E. Sisson, 50, well known Pickens county farmer, plead guilty in federal court here of violating the prohibition law and was sentenced by Judge H. H. Watkins, presiding, to five years in the federal penitentiary in Atlanta and to pay a fine of \$200. Mr. Sisson sold a pint of apple brandy to a federal agent.

Several representative citizens of Pickens county, including a magistrate and an ex-deputy sheriff, appeared in Mr. Sisson's behalf and told the court that the defendant was an honest hard working farmer and that with the exception of selling a little peach or apple brandy every now and then, he was law abiding and a good neighbor. It was recalled by Judge Watkins, however, that some five years ago Mr. Sisson was found guilty in his court of violating the Volstead act, and that the sentence had been relatively light. So being a second offender the defendant ran amuck of the Jones law which is aimed to check habitual prohibition law violators, and was, therefore, in no position to be shown mercy by the court.

When sentence was pronounced Sisson seemed dumbfounded. He mumbled out something about not being able to pay the \$200 and stumbled out of the courtroom. He is said to have told friends that he expected to get off with two or three months and a light fine. Sisson has a wife and two children and is reported to be worth between \$25,000 and \$30,000. He lives between Pickens and Easley.

Judge Watkins stated that all second offenders could expect to get the Jones law thumbscrew. The law provides that a federal judge can sentence prohibition law violators to serve from one to ten years time or pay a fine of \$100 to \$10,000 or both, depending on the status of the offense and the reputation of the defendant. On the same day, F. A. Keisler pleaded guilty to violating the prohibition law and was sentenced to serve three months in the Newberry jail or pay a fine of \$200.—Anderson Independent, May 29.

### Orders Removal of Tobacco

Ridgeland, May 30.—C. C. Kennerly is deputy sheriff of Jasper county but that didn't put him above being called down by Judge J. Henry Johnson yesterday.

Mr. Kennerly has a great weakness for chewing tobacco and he felt he couldn't part with his quid even while testifying on an important case in criminal court. He tried to chew and talk at the same time and that got on the judge's nerves, so he suggested that if the deputy would remove the delectable morsel from his mouth, he might be able to enunciate more clearly. The deputy adopted the suggestion without hesitation.

### Negro Lynched in Tennessee

Alamo, Tenn., May 29.—A mob of about 100 men early today entered the Crockett county jail here, removed Joe Boxley 19-year-old negro accused of attacking the wife of a justice of the peace, and hanged him on a tree four miles from town. The negro was taken from jail about 4 o'clock this morning and his body was found shortly afterwards. On the tree with the body was a cardboard on which was written 'Let this — hang here until 4 p. m. Thursday.'

### His Last Jump

Scranton, Pa., May 31.—Edgar R. (Red) Enochs, 22, noted daredevil parachute jumper, was hurled 2,700 feet from the wing of an airplane to his death in a stunt exhibition at the Ackerly speedway dirt track motor races, when the rings on his parachute "fouled" as he swung into space. Enochs hit the earth with such terrific force in a rocky strewn pasture that the heavy mossy sod was torn up a distance of about three feet and bared the soil to a depth of ten inches. Enochs leaves his parents and a sister at Mullica Hill, N. J. where he made his home.

### Police Commissioner Whalen of New York, has put a ban on sunbath bathing suits for women at all municipal bathing beaches. Whalen states that the people of New York demand a certain standard of decency at the beaches.

### Kills Man For Insurance

Macon, Ga., May 29.—An aged landlady and a youthful roomer confessed today that they murdered James Parks, 25, a printer, for a \$7,000 double indemnity insurance policy on his life. Mrs. J. C. Powers, 65, the landlady, confessed that she "hired" Earl Manchester to kill Parks on the promise of \$1,000 of the insurance "when it was collected." Parks, also a roomer at the Powers house, was found dead beside the Ocmulgee river here Tuesday morning, and Mrs. Powers and Manchester were arrested yesterday after police learned that the woman had insured Parks life for \$7,000.

### Summons for Relief

State of South Carolina, County of Kershaw. (In Court of Common Pleas)  
R. B. Elliott, Plaintiff, vs. Fannie Mack, John Mack and L. B. Belton, Defendants.  
To The Defendants Above Named: You are hereby summoned and required to answer the complaint in this action, of which a copy is herewith served upon you, and to serve a copy of your answer to the said complaint on the subscribers at their office in Camden, S. C. within twenty days after the service hereof, exclusive of the day of such service and if you fail to answer the complaint within the time aforesaid, the plaintiff in this action will apply to the Court for the relief demanded in the complaint.

KIRKLAND and KIRKLAND, Plaintiffs Attorneys.  
Camden, S. C., April 17, 1929.  
To The Defendant John Mack: You will please take notice that the Summons and Complaint in the above entitled action were filed in the office of the Clerk of Court for Kershaw County on the 19th day of April, A. D. 1929.  
KIRKLAND and KIRKLAND, Plaintiffs Attorneys.

### JUNE FARM CALENDAR

#### Things To Do This Month For Better Farming As Told By Clemson

Clemson College, June 1.—Timely better farming suggestions for June are given, in a nut shell, by Clemson College specialists.

**Agronomy**  
Leave cotton thick in the drill as an aid to early fruiting. Side dress cotton at chopping with readily available nitrogen. Cultivate all crops often against grass and weeds. When corn is knee-high side-dress with readily available nitrogen. Plant an abundance of soybeans, velvet beans, and cowpeas for feed and soil improvement.

**Horticulture**  
After picking peaches, burn or bury rotten peaches and trim out and burn dead or cankered limbs. Pack fruit in right kind of attractive package and get better prices. Set tomato plants deep to stand drought much better. Secure Lookout Mountain Irish potatoes to plant in July, and prepare your soil now to conserve moisture. Spray tomatoes and melons with Bordeaux mixture. Keep the grape vines covered with Bordeaux to prevent black rot. Plant spare garden land in black-eyed peas or some other variety that can be used dry during winter. Order celery plants for July delivery.

**Entomology**  
Secure adequate dusting machinery and calcium arsenate for boll weevil fight. Watch for red spider on cotton, destroy plants when first infested, and if needed dust with sulphur or spray with flour paste. Examine frequently bean fields in upper Piedmont for Mexican bean beetle and poison if necessary. Use Bordeaux-arsenate spray for little black flea beetle on garden plants. Transfer and requeen bees.

**Livestock**  
Wean pigs at eight weeks. Castrate pigs before ten weeks old. Shade and fresh water will save feed costs. Treat pigs for worms and if possible put them on uninfested territory. Use soybeans for grazing when knee-high. Feed lambs grain in a creep. Give ewes copper sulphate for stomach worms every 30 days. Market lambs at four months, when they should weigh 70 to 80 pounds.

**Dairying**  
See that cows get enough to eat to prevent a drop in the summer milk flow. Produce milk clean, cool immediately, and keep clean and cool. Start clipping the pasture with the mowing machine. Groom cows twice daily to lessen fly annoyance and increase production. Remove cows from pastures infested with bitter weeds several hours before milking. Feed heifers two pounds of grain daily to keep them growing.

**Poultry**  
Select the best cockerels for next year's breeders. Keep feed and clean water before growing stock, and use clean range with some shade. Watch chicks for worms, give treatments and take preventative measures. Keep laying mash before the hens; cull out non-layers. Plan to have alfalfa for green feed.

### Agricultural Engineering

Remove and store binder canvas after grain harvest, and grease the knottor with cup grease. Keep the two-horse cultivator going. Use sharp sweeps properly adjusted. Get the bollweevil duster in good working condition. Keep the mower in good shape for cutting weeds and hay.

### Three Meet Death When Cars Collide

Lake City, June 1.—Three men were killed and another and two young women are in the hospital as the result of a collision on the main street here tonight shortly after 3 o'clock. The dead are Robert Beard, 40, Harvey Beard, 33, and Henry Thigpen, 25, residents of Olanta. The injured are Miss May and Miss Pearl McSween and R. B. Dangerfield, all of Charleston.

Mr. Beard and his son and Mr. Thigpen were in a Chevrolet sedan and the others with G. W. Grooms were riding in a Lincoln car. The accident occurred at the intersection on Main street and the state highway.

The two Beards were almost instantly killed and Thigpen died shortly after his arrival at a private hospital, where he had been taken for treatment. The injured occupants of the Lincoln were taken to Florence, where they were placed in a hospital. Examination there showed Miss May McSween to be seriously injured. Miss Pearl McSween and Dangerfield are expected to recover.

On arrival in Florence Grooms was taken into custody by Florence county officials to be held pending an investigation into the accident. He stated, however, that Dangerfield was driving the car at the time of the collision. According to Grooms' statement, the members of his party were from Charleston and had intended spending the week end in Florence.

**Springs Gives Swimming Pool**  
Contract for the new swimming pool at Presbyterian college has been let within the past few days to the firm of Tucker & Laxton of Charlotte. It was announced Tuesday during the commencement exercises. Funds for the pool have been donated by Col. Leroy Springs, textile magnate and loyal friend of the institution.

This addition to the handsome gymnasium erected a few years ago, and also the gift of Colonel Springs, will complete the athletic plant of the college. It will cost approximately \$40,000.

The pool will be 30 feet by 65 feet, will be of tile construction and enclosed for winter use, a heating plant also being a part of the equipment. Machinery for chlorination of the water will also be included. Work will be begun within the next two weeks and it is hoped to have the pool finished in time for the opening of the college in September.—Clinton Chronicle.

New York city is planning to dig a tunnel 500 feet below the surface, 19 feet in diameter, and twenty miles long, for a water supply for the city of Brooklyn and Queensborough.

### Murdered People For Insurance Money

Macon, Ga., June 1.—The mysterious deaths of an unknown youth and an overseer on a farm owned by Mrs. J. C. Powers, today occupied officers investigating the tangle of "insurance murder plots" in which they believe the 71-year-old rooming housekeeper was involved.

Both men were believed to have assigned life insurance policies to Mrs. Powers, who now is held with Earl Manchester on a charge of slaying James Parks for his \$14,000 life insurance.

Park's body with two bullet wounds in the head was found on the river front last Tuesday and Manchester, 21-year-old Canadian, confessed he killed the youth for the \$1,000 price the aged widow offered for his life. A confession by the woman later was repudiated.

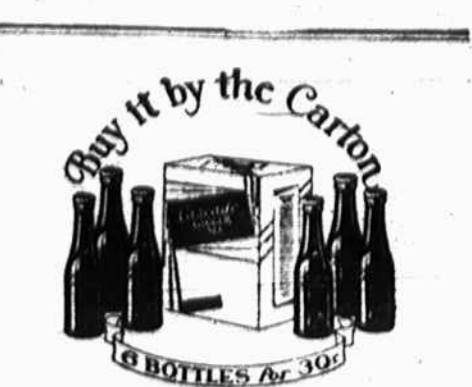

An insurance company informed the police that Mrs. Powers had received settlement on a life insurance policy she held on a young man who died in 1921 or 1922. An agent for the company said he remembered making the settlement which he thought was \$5,000 but had forgotten the name of the man.

Simultaneously attention of the authorities was directed to the death of Sam Wright, the farm overseer several years ago. The officers said the undertaker in the case told them Wright, who died unexpectedly, had been insured for \$2,000 with Mrs. Powers listed as beneficiary.

Sheriff James R. Hicks, Jr., said a man had informed him through a letter that he was coming to Macon today to tell the story of a "different kind of plot" the rooming house keeper tried on him.

William R. Pharr, cotton man of Memphis, was convicted in the Federal court at Memphis, Tuesday, of aiding and abetting J. Ramsey Beauchamp, former vice president of the Old Union and Planters Bank and Trust company in the misapplication of \$600,000 of the bank's funds.

Ernest Landsford, 16, and Everson Hudgins, 14, were placed in the Spartanburg jail Tuesday night, charged with the abduction of Evelyn Rutledge, 13, of Hickory, N. C., who was visiting in Spartanburg. The girl alleges that she was given a soft drink containing a drug by the boys and after that she remembered nothing.

Buy it by the Carton  
6 BOTTLES for 30¢  
Served in the best homes by the best people  
Cascade Ginger Ale, in the 6-bottle "hospitality" carton, is the ideal beverage for home use. You can serve it on all occasions with full assurance that no other ginger ale is superior, either in quality or flavor—no matter what price you may pay.  
The 7-ounce green bottle contains the exact amount required for one person, therefore, no leftover to grow stale or go to waste.  
You can buy Cascade at grocery stores, drug stores and delicatessens, in the handy 6-bottle carton for 30 cents. The small deposit required for bottles will be refunded when empties are returned.  
Keep one carton in the refrigerator always—another in the pantry for emergency needs.

## Dairyman Makes Profits by Cutting Delivery Costs

Puritan Dairy Changes Brand of Motor Oil and Makes Big Savings In Truck Operation

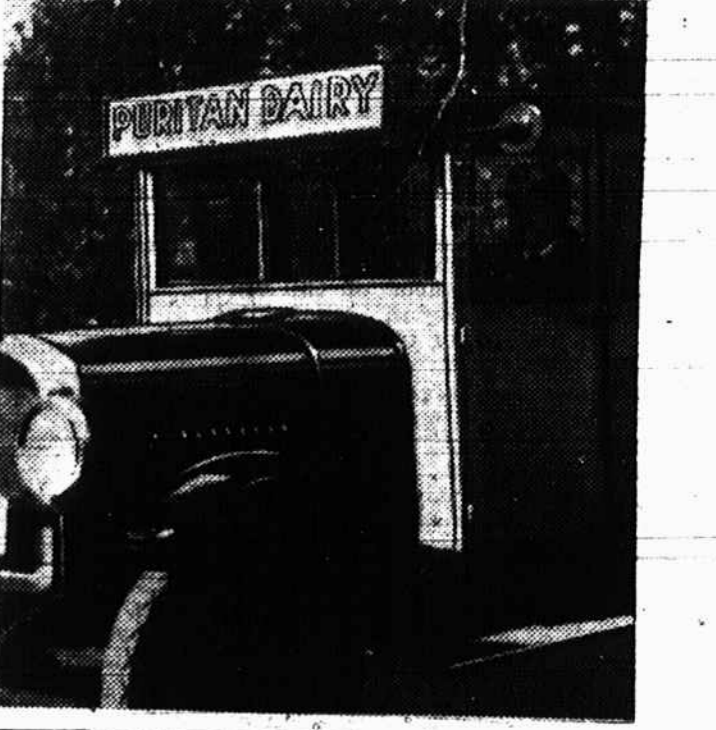

### Test run shows 42.2% Increase in Gasoline Mileage

Whenever owners of motor cars get together and start claiming mileage records, the only way to prove or disprove any statement is to make a supervised test. Such tests are difficult to arrange and supervise. Few motorists have the time to spare.

But the Puritan Dairy of Red Bank, New Jersey, wished to use the best oil on the market for their delivery trucks. No use to waste hard-earned profits on poorly lubricated equipment. No reason for keeping trucks needed to make their appointed rounds in the repair shop because of worn-out bearings. So a practical test, to be made while one of the trucks performed its regular work, was arranged by company officials.

#### Details of Test

The crank case of a sturdy G. M. C. truck was drained, flushed and refilled with "Z" brand of oil—nine quarts all told. The gasoline tank was filled with "Standard" Gasoline. In eight days of running, over a regular route, 572 miles were covered, eleven quarts of "Z" oil were used (nine had been added after the first day of driving) and 80 gallons of "Standard" Gasoline were consumed. Drained, flushed and refilled with "Standard" Motor Oil and "Standard" Gasoline, the truck started on its rounds again. The same route was followed. Another eight days passed. Somehow 680 miles were clocked on the speedometer this time. But only 67 gallons of "Standard" Gasoline had been used as against 80 gallons in the previous period. An increase in gasoline mileage of 42.2 percent.

Truck operated by Lee McGuire in which the test was made.

No motor oil was added after the first day. Yet 8 quarts of "Standard" Motor Oil remained in the crank case.

Tested in a laboratory, brand "Z" showed extreme dilution. "Standard" Motor Oil, however, was comparatively fresh—still a "good lubricant."

#### Car "Handled" Easier

"And the car," said Lee McGuire, the driver, "was easier to start and worked better all along with 'Standard' Motor Oil." Everywhere, this oilier oil—"Standard"—is pleasing millions of motorists as well as truck operators who appreciate how a richer-bodied, smoother oil can protect motors as well as "add mileage to gasoline." For sale everywhere you see the "Standard" Motor Oil sign. And it's uniformly good.
