3 about Cigarettes

Not so long ago practically all cigarettes were made by hand

Now, Chesterfields are made by high-speed machines that turn out 750 cigarettes a minute, and the cigarettes are practically not touched by hand.

BY the use of long steel ovens—drying machines of the most modern type—and by ageing the leaf tobacco for 30 months—like wine is aged—Chesterfield tobacco is milder and tastes better.

Only pure cigarette paper—the best made—is used for Chesterfield.

And to make sure that everything that goes into Chesterfield is just right, expert chemists test all materials that are used

in any way in the manufacture. Chesterfields are made and packed in clean, up-to-date factories, where the air is changed every 4½ minutes. The moisture-proof package, wrapped in Du Pont's No. 300 Cellophane—the best made—reaches you just as if you went by the factory door.

In a letter to us, an eminent scientist says: "Chesterfield Cigarettes are just as pure as the water you drink."

"Chesterfield cigarettes are just as pure as the 'water you drink'"
