Bulldogs Triumph

Over Lancaster (Continued from first page) tiful ten yard sneak by Tindal took the ball to the Lancaster 25. Then it happened. Some smart quarterbacking sent Price around left end on a double reverse and the lad waltzed into pay dirt standing up.

This department wants to say at this point that if this story is disjointed and registers errors, please bear in mind we were in a state where we could not write with any degree of clarity. We had joined the thousands of Camden maniacs in the stands and along the side lines.

To continue—the half ended with the Bulldogs 13 and the bruisers from up north, zero. The second half found the Bulldogs showing alertness in capitalizing on a blocked punt.

It is interesting to note that Camden scored 14 first downs to 7 registered by Lancaster. Lancaster made frequent substitutions allthrough the game while Camden, with but a few exceptions, offered an iron-man squad.

Speaking of interest and enthusiasm—we have never witnessed quite such a demonstration on Zemp field. Lancaster's many hundreds of fans with a fine band never gave up cheering for their team.

Now in closing just a word about something that did not happen, something that has caused us a great deal of chagrin, as we had publicized it as one of the attractions for the evening.

Back to football—the Bulldogs go to Charlotte tonight to play Harding High of that city. Harding defeated the Columbia Caps recently and are reported to have a hard playing heavy team.

On October 31 we plan to stage another drill by the crack Battery E platoon from the Public Relations headquarters with the fine 109 Field Artillery band to play for the drill.

Ginnings For Lee County According to William J. Muldrow, special agent for Lee county the census report shows that 6,003 bales of cotton were ginned in Lee county from the crop of 1941 prior to October 1, 1941, as compared with 16,188 bales for the crop of 1940.

On questions of domestic policy it is right and proper for Americans to differ, and it is best for us to be that way; but on the foreign situation there can be no ground for difference.

As surely and with as deadly execution as the strike leaders in defense order plants.—Chester Reporter.

CONGRESSMAN J. P. RICHARDSON

Washington, D. C. Oct. 16—Asserting what is in effect absolute control over all major public and private building in the United States, the Supply Priorities and Allocations Board Thursday served notice that further expansion of the Nation's new and phenomenal building boom will be stopped dead in its tracks.

The Supply Priorities and Allocations Board policy announcement was equivalent to an order that henceforth no new construction—from power plants, highways and harbor works to post offices, apartment houses and loft buildings—will be permitted to use up vital defense materials unless the work is deemed by Supply Priorities and Allocations Board to be in the interest of national defense or public health and safety.

Officials had no hesitation in admitting that the program would be executed in hard-boiled manner. It was pointed out that since almost all construction of any consequence utilizes such critical list items as steel, copper or brass, it could be effectively stopped by refusal to grant priority ratings for those materials.

Clearly spelling out the scope of the policy decisions, the Supply Priorities and Allocations Board announcement said it applied to public projects—Federal, State and local—such as post offices, court houses, roads and highways, navigation improvements, flood control and power projects. The ruling also applies to residential and commercial construction, such as homes, office buildings, factories, warehouses and apartment dwellings, it was announced.

Public health directors from the American republics have been invited to attend the annual conference of the American Public Health Association at Atlantic City, N. J., October 14 to 17, as guests of the United States Government. It was announced October 3 by Nelson A. Rockefeller, Coordinator of Inter-American Affairs.

The House tonight will finish consideration of the new Lend-Lease Appropriation Bill, which came to the Floor from the Appropriations Committee on Wednesday.

The bill provides almost six billion dollars, additional, for the help of those resisting Hitler in his efforts to dominate the world. This makes about thirteen million dollars in all that has been appropriated by the Congress, under the Lend-Lease Bill, passed earlier this year.

Millions of pounds of scarce defense materials, originally consigned to countries subsequently overrun by German armies, have been discovered at storage points throughout the United States and soon will be requisitioned for American military use.

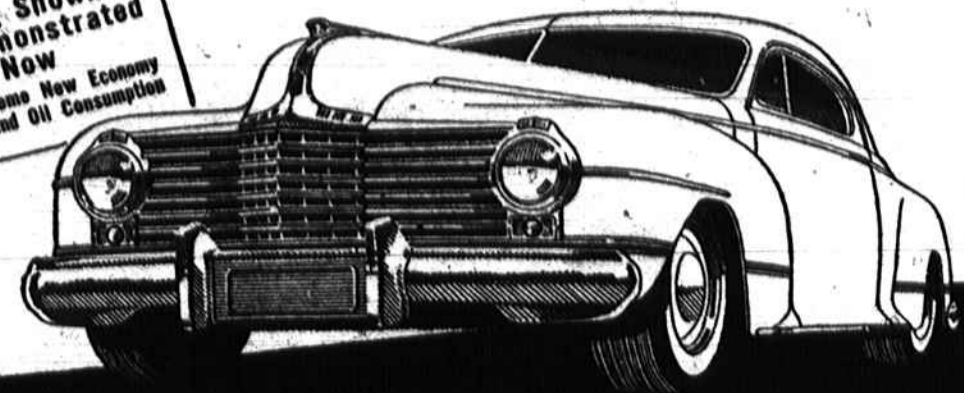

Wallace disclosed that 1,000 carloads of critical materials were stored at New York Harbor. In a railroad yard at Hoboken, N. J., he said, 500,000 pounds of aluminum, 700,000 pounds of tinplate, and 1,500 tons of iron and steel products were uncovered.

New York Harbor officials acknowledged the presence of thousands of pounds of the materials, particularly ship steel, a product the scarcity of which is holding up naval construction in Philadelphia.

President Roosevelt on Thursday asked Congress to repeal, with all speed, restrictions on arming of merchantmen and also recommended

Kendalls Lose Game To Battery E Team

Softball fans who witnessed the game between the Battery E team from the Public Relations headquarters and the Wateree Mill team at the high school athletic field Wednesday were treated to a fine exhibition, the soldiers defeating the Kendall talent 3 to 0.

Some brilliant play featured the contest. The soldiers presented a strong defensive group and the usual powerhouse offensive of the Kendalls was throttled in every inning.

A return game is to be played on Monday afternoon at the high school field, between the same teams. Later in the week the Battery E team will play a team from the Southern Aviation school.

Cotton Ginning Report According to O. R. S. Pool, special agent, the gins of Kershaw county report 2,026 bales of cotton were ginned from the crop of 1941 prior to October 1, as compared with 7,033 bales for the crop of 1940.

direct delivery of lend-lease supplies in American flag ships.

Legislation to wipe out the Neutrality act ban on arming vessels was immediately introduced. Leaders predicted short hearings by the House and swift passage through that Chamber.

Warning that Hitler's unscrupulous ambition, if fulfilled, will bring the war to American homes, the President asked arming of ships as a matter of immediate necessity and extreme urgency.

The President's message, denouncing the Nazis as madmen who are crazed with a desire to control the world, met with majority applause, but the usual division along war policy lines.

Garden Notes

At this season when all other flowers have succumbed to the heat and drought we find "spider lilies" in many yards in Camden to gladden our eyes. Having known them by this name all our lives it is surprising to learn that they are not lilies at all, but belong to the Amaryllis family.

There are several bulbous plants whose blooms have long stems or filaments sticking out beyond the petals and for this reason called "spider lilies." They are not lilies at all, but belong to the Amaryllis family.

The common red spider lily is often called "Surprise lily" by old gardeners in this section, because its blooms appear so suddenly in September before the leaves come up. The foliage disappears in the spring, and the bulb rests through the hot weather. It sends up flowers stalks and then the leaves which remain green all winter. The foliage is rich and beautiful, shiny and strap-shaped and graceful like that of all the Amaryllis family to which it belongs. The flowers are most striking with their three-inch filaments.

In catalogs it is offered in all shades of mauve and red and their combinations. It is listed as Nerine sarniensis. The old name for the nerine was "Guernsey Lily," because it came from the island of Guernsey, having been carried there from its native haunts in South Africa by some old sea captain who found and admired it.

It is grown in pots under glass in the North and considered an expensive rarity. In our climate it thrives out of doors with little or no attention, remaining in the same location year after year. But like all other, bulbous plants, it repays care. A mulch of rotted manure each summer after it dies down, and occasional liftings in order to remake the beds with good soil and sand, will insure finer blooms. They need not be lifted oftener than once in five years.—Elizabeth Baum, Camden Garden Club Publicity.

W. P. A. Recreation News

Saturday night, October 11, eighty khaki-clad youths gathered at the old armory for an evening of entertainment. They all participated in the dancing to the music of a clarinet and all ping-pong tables, Chinese checkers and target practice were in full swing. They also enjoyed the radio and reading material. The old armory will be open every night from 7 to 9, and all day Saturday and Sunday.

The field next to the old armory is being cleaned up for a horse-shoe pitching track for the soldiers. Plans are under way for a dance at the armory Saturday night. The Kirkwood Hotel band will furnish the music. There will be no charge.
