**FARMER'S FORUM**

"I've heard a lot recently about increasing corn yields. I didn't realize that 100 bushels of corn takes as much nitrogen out of the soil as there is in more than 600 pounds of nitrate of soda. I decided to see what would happen if I put back that much soda in side dressings, the last one when the corn was in full silk. I made over 200 bushels on one acre."
