

The Barnwell People.

JNO. W. HOLMES, Editor & Prop.

LARGEST COUNTY CIRCULATION.

THURSDAY, MAY 11, 1905.

Many farmers, large and small, are still holding cotton, something they have never done before.

This proves that they are better off than they have been, and it shows as conclusively that they are not obliged to make as much cotton as they have thought essentially necessary to their support.

Last year the Conway Field made light of this paper's suggestion that the truck business could be overdone.

The farmer's prophecy has already come to pass. Last week the strawberry growers of Eastern Carolina lost many thousands of dollars because the railroads couldn't or wouldn't and didn't furnish the required cars for the shipment of their fruit.

Many of the very best citizens of this State were born across the seas. The truthness of some of them was proven when the battle clouds covered the Southland, the goodness of them all has been manifested in every year of peace. They came of their own accord and cast their lots with the builders of this civilization and Carolina's love and honor for them has no limit or measure.

Several excellent papers have paid Governor Hayward the high compliment of favoring his election for a third term.

The Sumter Watchman and Southern, itself an excellent paper, commenting thereon favors the rotation out of the State House of all the present occupants.

Merit and efficiency should be the only test. If the Ins are superior don't turn them out. If they are inferior let the swaps be made.

"Far from the madding crowd's ignoble strife," the Barnwell People would always stay. It deprecates the building up of South Carolina's waste places because higher values mean higher rents, higher purchase prices mean more burdensome taxation, increase in volume of business means greater competition. That is one way of looking at it. It is not the progressive way. It is the Chinese way.—The Columbia State.

And there is the kaleidoscopic way, of which our critic is the monopolist in South Carolina.

Nobody knows or seems to care how many people native and to the manner born emigrate each year from this State. Going one or a family at a time they are little missed outside of their legal relationships, but the aggregate would be a startling surprise if accurately figured up.

The People goes regularly to former Barnwell county people in the States of Maine, New York, Pennsylvania, Virginia, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, Wisconsin, California and the District of Columbia.

The conditions that caused them to emigrate continue to operate and the number of departures will not grow smaller until the Legislature or somebody finds out the cause and provides the remedy.

COTTON OPINIONS.

Theodore H. Price, the New York speculator, who has done more than any other one man to depress the price of the present crop of cotton, has changed his mind and is now as much bull as he was bear.

His correspondents throughout the South have covered him by their reports. He averages the reduction in acreage at 14 1/2 per cent, and accounts for the over sale of fertilizers by the increase in truck and tobacco acreage. The crop this year is two weeks late. The world will, he says, require at least 12,000,000 bales next year.

President E. D. Smith, of the South Carolina Cotton Growers' Association, now in Texas, wires back that owing to excessive rains the farmers from Birmingham, Ala., to Dallas, Texas, are far behind in their work. Not half the land had been ploughed and that it was too wet last week to work in the fields. Ordinarily at this season cotton in Texas is being chopped out and plowed. In the boll weevil section of that State the only chance to make half a crop is to plant early in April.

The boll weevil is already out of winter quarters and ready for business, even before the crop is planted.

THE MODEL FARMER'S WIFE.

(Prize Essay by Mrs. W. C. Cally in Union Progress)

I do not believe there has ever been a model farmer's wife, or any other man's wife, in the estimation of the (so-called) Lords of Creation. For ever since that little apple episode in the Garden of Eden and man has had "to earn his bread by the sweat of his brow," there has been a grudge against woman, who has made it necessary for man to dig and delve and reap and sow. But aside from all this the ideal farmer's wife would no important part in the success or failure of the man who tills the mother earth. First, she must be economical, but not penny-pinching. She should be industrious, but able to plan her work so as to have some time for recreation and the improvement of her mind, in order to be a cheerful companion for her husband and children.

We do not think a farmer's wife should become a drudge, at the same time it is her duty to look closely at all details of the house, garden, poultry yard and orchard. For these seemingly little things either make or break the average farmer.

records of the past show that a large per cent of the famous men and women were reared in the country. The ideal farmer's wife will see to it that her children are educated, but not trained to be above their surroundings, but rather to dignify labor and to feel that a living honestly earned is the sweetest of all attainments.

FITZHUGH LEE.

Veteran's letter, asking information as to the family relationship of Fitzhugh-Lee, was received after our paper was made up for the press last week. We reply now.

Richard Lee, the founder of the family in this country, came to Virginia in 1696, and since that time the Lees have held high place in the affairs of Old Dominion.

"Light Horse Harry" Lee of the Revolutionary war was the grand father of Fitzhugh Lee, Sidney Smith Lee, a captain in the United States navy, was his father and his mother a member of the distinguished Mason family.

Fitzhugh Lee was graduated from the West Point Military Academy in 1855 and appointed second lieutenant in the Second Cavalry.

In a fight with Indians on the frontier of Texas he was shot in the side by an arrow. A comrade tried to draw it out, but only the shaft came and the arrow head remained in his body all his life. He was carried 200 miles on a horse litter to hospital treatment.

Another fight Lee met a big Indian band in hand. The Indian, who was a chief, and more than six feet in height, attacked Lee and tried to stab him. Lee fired his revolver but the Indian grasped its barrel and the ball went wide. The revolver dropped to the ground and the Indian tried to stab Lee again. Lee caught the Indian's hand and begged his adversary so closely that he could not use the knife. The two men wrestled fiercely for a while until Lee, remembering the old Virginia back heel trip, which he had learned at school, put it in execution and the Indian went away. Lee then quickly grabbed the revolver and shot the Indian dead.

Gen. W. H. F. Lee, nicknamed "Rooney," and George W. Custis Lee were sons of Gen. Robert E. Lee, cousin of Fitzhugh Lee.

During the civil war he rose to the rank of major general and at Gen. Hampton was sent South to oppose Sherman's march he was in command of the cavalry of the Army of Northern Virginia.

After peace he went to work on his farm and was later Governor of Virginia.

General appointed him Consul General to Havana and McKinley refused to remove him. He asked that a warship be sent to Havana and the ill-fated Maine was started and could not be recalled when he requested it.

He was appointed Major General of Volunteers and served from service in the Spanish-American War. He was buried in Hollywood cemetery, Richmond, on Thursday, and his funeral was the largest since the burial of Jefferson Davis.

CONFEDERATE REUNION.

Gen. T. W. Chawle, commanding the South Carolina division, U. C. V., has issued the following order:

"Dear Comrades: Once again we are called to meet in annual reunion. This year our reunion will be in Louisville, Ky., on June 14, 15, 16. The prospects are bright for one of the largest and most inspiring reunions ever held. Let me urge your camp to send a full delegation. Let us make this the banner year for South Carolina camps. When our faithful adjutant general in chief calls the roll let him be able to say, 'South Carolina camps have paid in full. The dues are very small. Five cents per capita for State dues should be sent at once to J. M. Jordan, chief of staff, Greenville, S. C., and 10 cents per capita for general headquarters should be sent to Gen. William E. Mickle, No. 824 Common street, New Orleans, La. These amounts are now due and should certainly be paid not later than June first. The place and date of the State reunion will be named later.'

Capt. Richmond Pearson Hobson, the hero of the Merrimac, has at last met his match. On the 25th inst. he will marry Miss Gertrude Houston Hull of Tuxedo, New York.

Fertilizer shipments from Charleston this season have been 276,291 tons. The average for previous years has been something over 300,000 tons. That proves that the farmers have reduced its use.

TO REVOLUTIONIZE FARMING.

Williston, S. C., May 8th, 1905.

EDITOR BARNWELL PEOPLE: Barnwell, S. C.

Dear Sir: Since the year '78, when I moved to your State and County, I beg to advise that the State of my adoption and her material prosperity have been matters of a great deal of thought to me. As a general proposition, South Carolina must be dependent upon agriculture for her prosperity; at least in a large measure. Land in our State is usually what it is made, and we do not compare favorably with the delta sections of other States.

I believe that it is within my power to materially aid my State and County, and for this purpose I beg to offer a few suggestions, merely leaving the outcome to the intelligence of South Carolinians, both the farming and business classes. I am perhaps known to many of the farming Carolinians, and to my personal friends I refer my life for nearly thirty years among you and my reputation for veracity. To the nearly one million additional Carolinians, to whom I am unknown, I submit the following:

The cultivation of our soil with its accompanying climatic conditions requires only two essentials: 1st. The absolute removal and destruction, as far as possible, of all weeds and grass, permitting the growing crops to benefit exclusively from soil fertility of area planted.

2nd. The maintaining of soil muleh and frequent stirring, admitting air and preventing the evaporation of moisture, which the plant secures by capillary attraction from beneath. The perfection of these two essentials is all that can be accomplished by the cultivation of crops, and in this I think I will agree among all classes of farmers and thinking men. The arterial circulation of a man's body is somewhat similar to sap circulation in growing plants. Cut your finger and you sever tissue and time is required to heal the wound and restore vitality. Likewise with the feeding roots of a plant, and it requires additional strength and time to replace the wastage.

Now, tap roots in plants, especially cotton, are merely a continuation of the vertical body above the ground; but stop and consider the position of the feeding roots to the plane of the surface in cultivated fields, and you will agree that all feeding roots lie laterally and are varying in depth; hence you have seen a man absolutely ruin his crops by improper plowing.

The center of furrows, is of course, the most distant point from the growing plants and at the point of the least feeding roots that at any other distance. Take a point at right angles to the row upon which your plants are situated, I have a machine which will first break this land and succeeding teeth will break the land on each side of both rows, covering in one operation which of row four feet, but adjustable to any width up to this distance. But the distance from the initial breaking to the final tooth action near the plant is in the neighborhood of five feet. Now taking a hard, compact surface concrete, the first blow of a pick is a difficult one; after repeated blows, when the surface is broken and an edge remains to be worked upon, there is less resistance; hence you see the application of my instrument in this respect.

Again this machine is adjustable to varying depths. At one operation, as stated, will cover the entire space of four feet in width, and also make the feeding roots that at any other distance. Take a point at right angles to the row upon which your plants are situated, I have a machine which will first break this land and succeeding teeth will break the land on each side of both rows, covering in one operation which of row four feet, but adjustable to any width up to this distance. But the distance from the initial breaking to the final tooth action near the plant is in the neighborhood of five feet. Now taking a hard, compact surface concrete, the first blow of a pick is a difficult one; after repeated blows, when the surface is broken and an edge remains to be worked upon, there is less resistance; hence you see the application of my instrument in this respect.

Again this machine is adjustable to varying depths. At one operation, as stated, will cover the entire space of four feet in width, and also make the feeding roots that at any other distance. A CREEPING DEATH.

Blood poison creeps up towards the heart, causing death. Dr. E. Stevens, Belle Plaine, Minn., writes that friend dr-adfully injured his hand, which swelled up like blood poisoning. Bucklen's Arnica Salve drew out the poison, healed the wound, and saved his life. Best in the world for burns and sores. 25c at C. N. Burckhalter's Drug Store, Creech's Pharmacy.

Now, just listen to a resolution passed at a regular meeting of the Medical Society of Columbia. "3rd, That this society considers it unethical the appearance of a practitioner's name in connection with any case published as a news item. That any physician whose name appears will be suspected of being guilty of the indecorum of advertising. That the press of the city be requested in the report of cases to withhold the name of the attending physician until his consent has been obtained." As a fitting climax to this resolution the Legislature should pass a law at its next session compelling the physician, when he loses a case, to walk in front of the hearse wearing a placard bearing the inscription: "I attended the extremely unfortunate deceased in his last illness."—Lexington Dispatch.

TERRIFIC RACE WITH DEATH. "Death was fast approaching," writes Ralph F. Fernandez, of Tampa, Fla., describing his fearful race with death; "as a result of liver trouble and heart disease, which had robbed me of sleep and of all interest in life. I had tried many different doctors and several medicines, but got no benefit, until I began to use Electric Bitters. So wonderful was their effect, that in three days I felt like a new man, and today I am cured of all my troubles." Guaranteed at C. N. Burckhalter's Drug Store, Creech's Pharmacy, price 50c.

BRING YOUR CORN and have home-made meal and grist. BRING YOUR GRAIN and have your stock feed ground. No cash to pay, only a small toll. We have all modern machinery for these purposes. GLENDALE DAIRY, Barnwell, S. C.

FANCY GROCERIES, CONFECTIONERY, BAKERY, CIGARS, TOBACCO, SNUFF. Do you know that the can of salmon we are offering you at 5c a can, 60c a doz. cannot be bought anywhere in the United States at this price? That no wholesale house in America will make you such prices? Think of the little town of Barnwell leading America in prices! Do you know that the Fairbanks 12 oz. Laundry Soap we are offering you 3 cakes for 5c, 15 cakes for 25c; that the Fairbanks 12 oz. Laundry Soap 2 cakes for 5c, 10 cakes for 25c; are better prices than any wholesale house will make you? Barnwell still leads in prices. See Ryan's 5c Plug Tobacco and his one pound package fresh pork Sausage at 15c.

Do you know that we will sell you the celebrated Heinz India Relish, a delightful sweet pickle, at 20c a bottle, which is less than manufacturer's wholesale price? You see, Barnwell still holds the fort. Do you know that our quart bottle Tomato Catsup at 15c a bottle or 2 for 25c is cheaper than you can buy it anywhere? Do you know we are selling the "Yaleb Club" Mayonnaise or Salad Dressing—a splendid article at 25c a bottle, which is less than the wholesale price? Do you know that when we offer you a 15c plug Schnapps Tobacco for 10c it is cheaper than you can buy from the manufacturer? Please observe, Barnwell is still in the lead.

Do you know that our quart bottle Tomato Catsup at 15c a bottle or 2 for 25c is cheaper than you can buy it anywhere?
