ARGEST COUNTY CIRCULATION

THURSDAY, AUGUST, 24, 1905.

The Georgia Legislature reduced the price of liquor licenses to \$300 last week. An exodus of blind tiger keepers from South Carolina prohibition sounties over the Savannah is sent in

Notwithstanding the wild oats of his vonth and the tares of his riper years King Edward of England enjoys a larger home popularity than any other crowned bead.

And the chief reason lies in the fact that he takes 3,000 papers.

Goldwin Smith, the eminent English authority on constitutional law, said last week that "Japan has no claim to a cash indemnity" to be paid by Rus-

Several eminent South Carolina newspapers took the different ground, a week before Mr. Smith spoke, that the Japanese demands were right and reasonable. Mr. Smith must have been ignorant of that fact when he delivered his opinion as above defined.

During the last scholastic year Clemson College spent over \$150,000. A modest part of that princely income A modest part of that princely income as the price of peace and adjourned un til Tuesday, so that they could submit ter advantage by the establishment and the results reached to their home govmaintenance of an experimental farm in the sandy section of the State, and Clemson cannot fill its mission properly until that is done. Experiments on the red clay hill sides of Anderson are of no earthly value to the farmers of lower Carolina.

President Harvie Jordan has called meeting of the Executive Committee of the Southern Cotton Growers' Association at Ashaville, N. C., on September 6th, when a minimum price will be ffxed at which the farmers are to sell their cotton,

unked to put down and to keep down the price, and they have many silent partners in their mean business.

The price will not be unreasonable. It will be based on the sure smallness of the crop and the great demand for

Crescit eundo. If this immigration nightmare continues to travel at its present gait South Carolina will in the course of time become the largest State in area in the Union.

From a local article in the esteemed State of Saturday we learned that a colony planter who has made two visits to this neck of the woods has discovered that while much of the land is "unfit for settlement by any body except coolies" three fourths of the 30,000,000 screemay be inhabited by immigrants of any nationality.

When our summer school began it was claimed that 13,000,000 acres were "available" for immigrants, Between equinoxes that area has expanded to 22,500,000 acres.

Will the State please tell us what it will be at Christmas?

## THE YELLOW FEVER.

Proof piles up that the mosquito is the sole spreader of yellow feyer and through destroying them the yellow plague can be stayed. In New Orleans the doctors of the

marine hospital service are keeping the epidemic under control and are hopeful of putting an end to it long before frost comes to put the mosquito out of husiness. In the country parts of the lower Louisiana and Mississippi the outlook is not so hopeful, as the mosquito has a wider range.
