LARGEST COUNTY CIRCULATION

washing school and better the weather the THUBSDAY, JANUARY, 6, 1910.

So much of the lien law as provided security to merchants making advanees of agricultural supplies to farm workers became a dead letter on Satwent into effect. Land owners can still make advances on Hens to their

At a meeting of the American Po litical Science Association in New York elty last week several good speeches were made, the best by Prof. Richard S. Childs who said: "Poli tics is so complicated that it has become a profession and shuts out fully 95 per cent of the great unbribable mass of the people "

Our esteemed pupil the News and Courier is learning some, Last week It reached the very same and patent conclusion that there are undestrable immigrants, whose room is better than their company.

After a while it will discover that there are enough native born children growing up in South Carolina to take care of its every acre and interest.

Champ Clark, leader of the Demoeratic inthority in the national House of Representatives, claims that the Congressional District in Missouri which he represents, "is the center of the mule producing region of the world."

He says that the five fold increase in ten years in the price of muies has been caused by the "various wars throughout the world during the pass ten or fifteen years."

The statement widely published a few weeks ago, that a new Phited States law would go into effect on January enough to gather much money from 1st, making it unlawful to issue checks for amounts under one dollar, was all a mistake. There is no such law.

The act referred to forbids issuing papers by persons or corporations Intended to circulate as currency. The and forget them. It soon drives out act was passed during the war between pain. For burns, Scalds, Wounds, ped this personal currency. The old law was re enacted last year.

The approaching session of the ures from the session of 1900 there will he many new and notable bills intro- doors every night all the year round,

The tax question, compuls ry educations grees below zero.

The pine tree is also useful in reat contact will bring. Anthe tails of storing and maintaining the fertility of the soil. Pine needles make excellent bedding for stables and add but The name of Comet was their one. On my farm, though there are many applications for straw, there is one on broken rule, to wood or straw to give or sell from the land, but a liberary supply for the use of those on the the muchings of great dishelers farm

and the way farers brought over by the Wittekind.

Fluding no fault, on local option principle, with the growth of Columbla in population, progress and self es. teem we remark that If there has so far been any increase in the number of churches and ministers in its borders that light has been and is hidden under a bushel.

MERIT REWARDED.

Abou Ben Adhem was nothing if not practical, says Puck. Perceiving that his tribe wasn't likely, under modern social conditions, to increase much, he turned his whole attention tirday, when the repealing act of 1500 instead to his bank account, with the result that in a relatively few years he could draw his check for anything up to fifty millions and have it certified. His mannets, meanwhile became, of course, those of a rhinoceros. But when the proper authorities nade up the final lists of "Who's Who, 't fo! Mrs. Ben Adhem's name

COMET TO HIT.

lead all the rest!

Sky prophets say that on the aftersoon May 18th 1910 the tail of Halley's comet will swish the world as it rushes by. As the point of contact will be twelve million miles from the head of the comet nothing worse than an electrical storm is expected.

GROWING GOOD MONEY.

Progress, a monthly issued by the

Atlanta Chamber of Commerce, contains in its last issue a story worth reading by every land owner. Twen y seven years ago G. M Bevan, who lives 12 miles from Albany. Ga. received a sack of preams from a Texas kinsman. All the nuts were caten except four that were planted to

the garden and afterward transplanted So well pleased was Mr. Beyan that he planted more and he is now President of a company that has 14,000 pecan trees on 700 acres. Twenty trees to the acre is the rate and each tree when tull bearing yields 20 ths annually and the average profit on the paper shell variety is two bundred dollars to the

There are now over ten thousand acres in pecens in the neighborhood of Albany, and Northern and Western men are buying Georgia lands for the purpose of planting pecan orchards that will make their children rich, even if the old folks do not live long

trees in all waste places. Land owners and tenants must work together in this, and in every other matter for what affects the one will later affect

Perhaps the quickest growing tree that we have is the china tree. It will grow anywhere and is somewhat difficult to eradicate once it is planted upon land. It produces so great a number of berries that they are scattered every where. It grows to a considerable size in a few years and the wood makes excellent quick fires. The foliage is dense, the twigs being closely set to gether, and though I have never seen them so used I think they would make as good a wind break as any of the deciduous trees. One standing alone

is, however, easily uprooted after it The abundant foliage puts much called Drake's Comet after the South litter upon the ground to assist in soll

repoyation. The beautiful health giving longleaf pine cannot be surpassed in readiness to grow and for general utility purposes. It grows quickly on every Pollowing the rule of other gomets it piece of ground left idle for a short will go around the sun and then out of time if one solitary pine be near enough to scatter its seed there.
