## LOWER EXPRESS RATES.

All South Carolina asparagus grow ers will be interested in knowing that Senator Tillman with the aid of the In succeeded in getting the express rates on asparagus, which were exorbitantly high, lowered to the following cities: New York, Philadelphia. Pittsburg, Buston, Baltimore and Washington. The reduction on a twenty-four bunch erate varies from ten to hity cents.

#### THE SOUTH POLE.

Now, that Commander Robert E Peary has been pre-ented with a medal by the National Geographic Society for his work in finding the North Pole, he is intent upon going to the other end of the earth and finding the South Pole. He has offered his services and urges the expedition be ready to start next September, All that is lacking is the accousery funds and they will likely be aging the development of the growing forthcoming in thre.

presented to him, The Richmond Times-Dispatch is fortunate in securing so brainy and brilliant an editorial chief. William Stone, claiming to be a lieutenant of the United States army, was arrested in Aiken last week on the charge of being an escaped lunatio from a Maryland insane hospital. Hadmitted that he was. Pinkerton de ter-State Commerce Commission, has tectives say that Stone is the man who killed and robbed Dr. C. W. Hickman

in Augusta on February 2nd. The candidates for Governor of South Carolina so far announced are Cole 1. Blease of Newberry, C. C. Featherstone of Laurens, T. C. McLeod of Lee and John G. Richards of Kershaw. It is pretty sure that R. J Manning will run again, and there has been talk of F. U. Hyatt of Columbia making the

race. The more the merrier. Washington, February 9-Cotton growing in Africa is becoming an important pursuit, and one which, it time, will affect the marketing of American cotton in Great Britain, as that country, which uses so much cot-'on from the Unite ! States, is encour. of that staple in her colonies. This season's cotton crop in West Africa is estimated at 5,200,000 pounds. or over

# Works Across the Rows the Right Way. Patented April 21, 1908.

I desire to call your attention to this Great Labor Savor. The Chopper that doe Execution to Grass and Weeds, in fact. it does the work of eight men. After lookin around for a time, I have decided to go direct to the cotton planter and sell him th right to make this chopper for his own use for One Dollar This right is good for 1 years from the 21st day of April, 1908. I will say here that I have complied with a the laws of the patent office and I further say that this chopper does all I claim for or your money back.

## A SHORT DESCRIPTION.

The Chopper works across the rows, the chopping and plowing is done with a System of sweeps, adjustal connected to a stock beam. In setting up these sweeps I will say you can close them altogether-that, of course, wo cut it all out; but this connection being an adjustable one you then move out on the beam, as desired, so as to leave SPACE between the sweeps that will allow 1 or 2 stalks to pass through. The beam and stocks are connected with Front with rods they are also connected beneath the frame with a cross rod; the beam and stocks are moveable in frame; if the handles are elevated and let go, the beam drops back on the frame, so in case of skips or bad stand, elevating the handles you miss that part altogether and strike the next ridge at any depth desired. The chopper can adjusted to leave 1 or 2 stalks; and to run deep or shallow. The chepper cuts uni'orm any distance, by using large aniall sweeps. Say you want 8-inches, use 5 inch sweeps. If wanted extra wide, take out one or more stocks and extra wide sweeps. This patent calls for any number. I think 5 or 6 about right. The rear wheels run in the w of the outside sweeps. The front wheels cut under, turning is easy. The chopper works in any ordinary land, v one or two horses. The old way of baring off cotton is a waste of time and money. This chopper does all the plow as it goes across, leaves dirt to the cotton and gives the land thorough cultivation. By taking out the middle at and straddling you can give your cotton a second plowing, two rows at a round. This done your cotton is under a troi. This rapid cultivation in the early spring is a good remedy for the boll model in the let me and stand it will not pay you to follow this chopper with the hoe the amount left is with you. They repared a book of instructions for making the chopper that tells every thing the first to the last lick. The cost is comparatively nothing, you simply take any light cast off wheels and ent t down and use the same axles. The farmer with the aid of this chopper is independent as far as labor is concerned. gets in the cotton at the right time, both chopping and plowing as he goes at the rate of 10 acres a day. No thing as being in the grass. Its what you save that counts Read what the farmers say, and send \$1.00 today for right and book of instructions for making and be ready. Address
