nure is required of fertilizer is used bealth that's a daily joy. Try them. it should be applied at the rate of not Only boy. Satisfaction is positively less than a ton of high gra le fertilizer guaranteed by C. N. Burckhalter, R. per acre. A few rows heavily fertilized A. Deason & Co. will produce potatoes in plenty for the average family.

Onions may be planted in the same way as potatoes but not so deep in the ground. There is no more healthful vegetable than the onion. It is a good male for early spring. It brings re-

Garden pess ought to be planted now. The manure must be covered and the peas dropped in shallow double

All of the other little seeds must be planted in even shallower trenches and eovered very lightly. Beets, cabhage, mustard, radishes and lettuce should be planted without delay. If cabbage seed have been sown in a hot bed the plants should be travs-

pianted now. If seeds have not yet been sown it would be a good plan to purchase plants. They may be had at mall cost and the vegetable will come much earlier.

Mustard is a quick grower and affords variety to the Spring diet. Almost ev-erybody likes some kind of early greeps It is quite good prepared as a salad and is preferred by many to let-

Early radishes are toothsome. They are quick growers if not plauted too Collards for next winter's use ough be planted now. All old stalks dor to destroy all insects.

This is a busy month for gardeners. A garden requires a well manurel, well pulverized soil and rapid cultivation. It will repay tenfo

.... und every housewife ought o love to see the little plants grow and rejoice in the fresh air that is part of her compensation for digging in the garden

### A LONG FELT WANT.

South Carolina is soon to have "A State Supervisor of Elementary Rural Schools." He is to be directly associated with the State Department of Edu . eation and with the University. His appointment is made possible by the Aberality of the Peabody Board and the Scuthern Education Board.

Mitchell and Superintendent Swearingen, he visited Charleston to learn at J. Owens, and estate lands of A. H. sider an offer to enter upon this great but untried field. Though Professor Tate's friends, in Charleston, were loathe to give him up, they could but admit that a great opportunity for constructive work in every quarter of the State was here presented to him. He pus in Columbia.

He will devote his great talents and energies especially to the Rural Schools. His strong personality and by estate lands of Hay. already won for him a host of friends in every section of the State. In his new position he will come in immediate nontract with the greatest school probems and possiblities of South Carolina, Rose and the generosity of his col-

MASTER'S SALE. State of South Carolina, 7 County of Barawell, Court of Common Pleas. J. M. Bolen, in his own right and as

Calhoun; on the South by made possible by the interest of Dr. Jands of M. M. Holly and West by es is the most ancouraging ed Banthar Contrat and ands of Corbin

# Barnett's Home Made 4-Wheeled COTTON CHOPPER

## Works Across the Rows the Right Way. Patented April 21, 1908.

I desire to call your attention to this Great Labor Savor. The Chopper that does Execution to Grass and Weeds, in fact, it does the work of eight men. After looking around for a time. I have decided to go direct to the cotton planter and sell him the right to make this chopper for his own use for One Dollar This right is good for 17 years from the 21st day of April, 1903. I will say here that I have complied with all the laws of the patent office and I further say that this chopper does all I claim for it or your money back.

### A SHORT DESCRIPTION.

The Chopper works across the rows, the chopping and plowing is done with a System of sweeps, adjustably connected to a stock beam. In setting up these sweeps I will say you can close them altogether-that, of course, would ut it all out; but this connection being an adjustable one you then move out on the beam, as desired, so as to leave a PACE between the sweeps that will allow 1 or 2 stalks to pass through. The beam and stocks are connected with the rout with rods they are also connected beneath the frame with a cross rod; the beam and stocks are moveable in ame; if the handles are elevated and let go, the beam drops back on the frame, so in case of skips or bad stand, evating the handles you miss that part altogether and strike the next ridge at any deoth desired. The chopper can be adjusted to leave 1 or 2 stalks; and to run deep or shallow. The chepper cuts uniform any distance, by using large of mail-sweeps. Say you want 8 loches, use 8 inch sweeps. If wanted extra wide, take out one or more stocks and use extra wide sweeps. This patent calls for any number. I think 5 or 6 about right. The rear wheels unn in the wake of the outside sweeps The front wheels out under, turning is easy. The chopper works in any ordinary land, with one or two horses. The old way of baring off cotton is a waste of time and money. This chopper does all the plowing as it goes across, leaves dirt to the cotton and gives the land thorough cultivation. By taking ont the middle stock and straddling you can give your cotton a second plowing, two rows at a round. This done, your cotton is under conrol. This rapid cultivation in the early spring is a good remedy for the boll weevil, try it. Now let me say right here : In planting if you will put plenty seed in to insure a stand it will not pay you to follow this chopper with the hoe, for the amount sets is with you, I have prepared a book of instructions for making the chopper that tells every thing from be first to the last lick. The cost is comparatively nothing, you simply take any light cast off wheels and cut them town and use the same axies. The farmer with the aid of this chopper is independent as far as labor is concerned. He gets in the cotton at the right time, both chopping and plowing as he goes at the rate of 10 acres a day. No such they as being in the grass. Its what you save that counts Read what the farmers say, and send \$1.00 today for this right and book of instructions for making and be ready. Address
