The Barnwell People.

JNO. W. HOLMES, Editor & Prop't

LARGEST COUNTY CIRCULATION

THURSDAY, NOVEMBER 17, 1910.

AN OCTOGENARIAN.

Ripe in years and rich in the ultimate regard of relatives and friends Miss Lucy Patton, aged seventy-one, departed this life on the 10th inst. and entered into the everlasting peace. In the old family burial ground near Meyer's Mill laying hands gently laid the weary body beside the remains of the loved ones gone before.

THE SYCAMORE FESTIVAL.

Please give us space to thank our many friends for the hearty support extended us in our Church Festival, it having proven a big success, we think, for a little place like ours, as we netted $31 for the fund being raised for this place to build a church at Sycamore.

Yours Very Truly,
Church Community.

TEACHERS' ASSOCIATION.

The Barnwell County Teachers' Association met most auspiciously on Saturday of last week. A goodly number of teachers heard an ideal address by Prof. Patterson Wardlaw of the South Carolina University. Dr. Wardlaw as always was practical and plain. He plead with the teachers for more of life in the schools and more intellectuality in life. He thinks the schools ought not to educate the pupils away from the farm or from any of the activities of right living.

All trustees, teachers, patrons and others interested in education who failed to hear Dr. Wardlaw missed a treat.

Mr. Dibble gave the association an interesting talk with illustrations on the new international language, Esperanto. He is a most enthusiastic Esperantist.

The Association will probably have Supt. Lawton B. Evans of Augusta present at the meeting in December. It has been decided to adopt a text on pedagogy for study and discussion. One of the books required by the State Board of Education will be used. It will be to the advantage of all teachers in the county to take this course.

President Scott with his executive committee is making good and the Association promises to be both interesting and instructive in its year's work.

The Barnwell teachers provided entertainment for all teachers and visitors at the meeting. The next meeting will be held in Barnwell probably on the Saturday before the third Sunday in December, this date is arranged to suit the convenience of Supt. Evans.

THE GARDEN OF EDEN.

Apples and Eggs were the first special luxuries provided in the original Garden of Eden. The theory of good men is that the soil of South Carolina is fortified not only by geological resemblences but by the growing of the aforesaid fruits. The memories of the old fashioned days back to the traditions of the good days of yore when apple orchards were as much a part of farm life as potato and truck patches and new cider was a common pleasant and unintoxicating beverage that had not been supplanted by hotter stuff.

THE PEOPLE has had occasion in mentioning from time to time the excellence and abundance of the fine presentations made to its worthy Barnwell friends and in picturing the luscious and toothsomeness of the apples that have grown and ripened throughout this county, almost without care and attention.

The Appomattox apple, a direct descendant of the farmers surrender tree has flourished here as if it were a stranger that had come back to its original home. Does it grow elsewhere?

But a new revelation was made to us on Friday by a friend who objects to seeing his name in newspaper print. On that day, November 11th, he picked from a tree on his place a Rome Beauty apple, of as good size as the imported products of northern orchards exhibited on the street side fruit stands and selling at three for a dime. The Barnwell apple is as solid as a silver dollar, as vividly colored as the cheek of the average Car Line girl massaged by the November north west wind, and from its firmness would seem to be a sure all winter keeper. Not having tasted either nothing can be said of the comparative sweetness of cheek and apple.

The Rome beauty tree has another characteristic of helpful value. The limb growth is so thick that the small lead by can not climb it with intent to appropriate the fruits thereof to present appetite or pocket or for future enjoyment. The apples must be pinched from the higher limbs or allowed to drop from their full ripeness.

A CHOICE CAR

Of Horses and Mules direct from the West received on November 14th at Rizer's Stables, Olar, S. C.

There are some extra nice Horses as well as Mules in this load and those in need of the best obtainable stock will take the right course by coming to see them this week. C. F. Rizer.

PRACTICES WHAT HE PREACHES.

Mr. S. M. Duncan, the expert farm demonstration agent for this county, is practicing what he is preaching in the raising of corn. He raised 865 bushels on a two horse farm 785 bushels to one plow, averaging 28 bushels per acre on the entire farm. That is the way to solve the problem. Fall in with the Duncan plan.—Newberry Herald and News.

A FERTILIZED COLLEGE.

The State in its Friday issue said:

During the past year there were 834,834 tons of fertilizer and 140,765 tons of cottonseed meal used by the farmers of the State, according to a report submitted yesterday by Clemson College to the department of agriculture. This is a total tonnage of 975,039 tons, which is valued at approximately $20,000,000, taking the average price per ton for last year as a basis.

Clemson college derives a tax of 25 cents on every ton of fertilizer sold in the State and will receive approximately $250,000 this year.

It is expected that there will be a measure introduced in the general assembly asking that the number of scholarships to increased for the institution. The State Farmers' union passed resolutions favoring the increase of scholarships.
