SEVERAL TOWNS BIDDING FOR THE FISH HATCHERY

The Appropriation Made Through the

Efforts of Senator Tillman for the Establishment of the Hatchery Now Available and Investigations

to Determine Location Conducted. The Appropriation Act approved March 4, 1911, carried the following

"For the establishment of a fishcultural station, including purchase of site, construction of buildings and ponds, and equipment, at a point in the State of South Carolina to be selected by the Secretary of Commerce and Labor, \$25,000."

The Washington correspondent of The News and Courier says the history of that provision is that in February, 1911, when the sundry civil appropriation bill was before the appropriations committee of the Senate, and the matter of confirming a similar provision for a fish-hatcher in Minnesota was taken up, Senator Tillman said that he would not like to object to any measure in which his friend, Senator Nelson, of Minnesota, was interested, but that he could not let this provision go through without objection unless something of the same kind should

be done for South Carolina. The Senator explained that at several previous sessions a bill for the establishment of a fish-cultural staenate but that on each occasion the measure failed because there was one of the for parties and the northwestern portion of Texas New Jersey governor the northwestern portion of Texas New Jersey governor and the northwestern portion of Oblaham o West appeared in the newspapers als of Senator Tillman's remarks, the and the portion of Oklahoma, where nation. will increase D and became law. ### DOING A GREAT WORK

CONDUCTING CAMPAIGN FIGHT BOLL WEEVIL

President Finley Tells of Cotton Culture Work by the Southern Railway in the South.

The Southern Railway is conductng a campaign in the South to en able the farmers of the cotton belt to overcome the boll weevil. The campaign is educational in its nature and it is planned to introduce improved cultural methods. President Finley, discussing the work recently

The primary purpose of the organization of the county culture department by the railway companies which contribute to its support was to cooperate with farmers along the lines of those companies in the territory along the advance of the Mexican cotton boll weevil for the adoption of those cultural methods recommended by the late Dr. S. A. Knapp from New York by the of the United States agricultural department, for growing cotton under boll weevil conditions. Dr. Knapp also advised that it would be advantageous to adopt those methods independently of the presence of the ec.il. The results of the first year's work of our cotton culture department have demonstrated the soundness of his advice in all respects.

"In a circular, under date of February 12, 1912, prepared by Dr. W. D. Hunter, the boll weevil expert of thirds of the Democra the bureau of entomology, and issued by Dr. L. O. Howard, chief of that bureau, with the approval of the secretary of agriculture, it is pointed out that the weevils were less num- for ironclad instr tion in South Carolina had been erous in 1911, owing to adverse passed by either the House or the weather conditions, and that the in- prove to the conve sect was exterminated in an area covering about 23,000 square miles whelming popular sect continued to spread to the northsissippi an d Alabama. He says the reduction in numbers in 1911 was due to a combination of climatic influences which can only be expected Taft be the Rept to recur at infrequent intervals, and that, with the return of favorable
