SPLENDID RACING FOR FAIR WEEK

Wednesday, Thursday and Friday the Big Days.

BARNWELL COUNTY HORSES

There Will Also be Ostrich, Automobile and Motorcycle Races.

The committee on races for Fair Week has arranged the racing cards for each day and are doing everything in their power to make the races a most attractive feature of the week. There are several interesting events for each day, with good purses for each one. Unlike former meetings, only Barnwell County horses will be allowed to compete in the races. The committee believes that this will be more satisfactory to every one concerned and create more local interest in the events.

The Sherwood course is probably the finest natural track in the South, and it will be put into excellent condition.

A feature of the races this year will be a race between an ostrich and a fast horse. "Hurricane" is said to be the fastest trotting ostrich in the world. He weighs 400 pounds, stands 10 feet high, and takes strides that vary from 12 to 15 feet. He will be driven hooked to a sulky buggy.

In addition there will be automobile and motorcycle races, full announcement of which will be made later. All in all, there is every indication that the races this year will eclipse any run here in years.

They were dragged about 100 yards, it is said, before the engineer could stop his train. Soon afterwards persons who had barricaded themselves in their homes began to emerge cautiously from their hiding places, and by noon the town was quiet. No more trouble is feared.

Two inverted white pine boxes served the double purpose of seats and receptacles for their stock in trade. They were promptly arrested and placed under a bond of \$50 and \$25 respectively, which they furnished.

COL. HARRY D. CALHOUN ADVOCATES A NEW PLAN

Bank President Would Buy Calves and Supply Farmers on Credit.

Col. Harry D. Calhoun, president of the Home Bank of Barnwell, has made the following suggestion to the State Department of Agriculture:

"What do you think of the Home Bank buying, if it can, about five or ten carloads of young thoroughbred heifers, say three to six months old, and let our farmers have two or three at actual cost, payable next fall; of course, they to secure the bank for the amount? As I see it, we are gradually losing sight of raising cattle, and the reports are that it's a fact throughout the states.

"The mere encouragement of a thing of this kind would be, to my mind, a great incentive to the farmers that they may see the importance of the enterprise.

"If you are in touch with cattle raisers, that I may correspond with them, and you think the idea a good one, the chances are that our bank will embark in the enterprise."
