

We know by experience that to 

aspiration and since the inauguration of the Phillipine assembly the na

fional representative body has been acting in accordance with the popu Har will; thus in the midst of the most adverse circumstances the ideal of the people never wavered and was respectfully and frankly brought before the powers of the sovereign country on every propitious occasion "On the other hand our faith in the justice of the American people was as great and persistent as our ideal. We have waited in patience, confident that sooner or later all errors and injustices would be redressed

"The message of the president of the United States to the Filipino peo gie is eloquest proof that we have not waited in vala. We accept said message with love and gratitude and consider 1. a categorical deciaration of the purpose of the nation to recogalso the independence of the islands. The immediate step of granting us a majority on the commission places in our hands the instruments of power and responsibility for the establish ment by ourselves of a stable Filping government. We fully appreciate and are deeply grateful for the con-Sdence reposed in us by the govern ment of the United States We look mon the appointment of the Hon ! Arands Hurton Harrison as govern or general as the unmistakable har Singer of the new era in which we expect the attitude of the people to be one of co-operation and finally, we believe happily, the experiment of impertaitsm has come to an end and that colonial exploitation has passed tate history

"The epoch of mistrust has been closed and the Filipinos, upon having thrown open to them the doors of opportunity, are required to assume the burden of repsonsibility which it would be inexcusable cowardice on their part to avoid or decline Owing to this, a few days have sufficed to bring about a good understanding which it had been impossible to establish during the 13 years past. We are convinced that every onward step while relieving the American government of its responsibilities in the islands, will, as in the past, fully demonstrate the present capacity of the Filipino to establish a government of his own and guarantee in a permanent manner the safety under such government of the life, property and liberty of the residents of the islands, national as well as a foreign.

"We do not wish to say by this that there will not be difficulties and embarassments, nor do we even expect that the campaign, open or concealed, of the enemies of the Filipino cause will cease soon, but we feel sure that through a conservative use of the powers entrusted to us the Phintno neople will, with God's favor
