SCALED A RUGGED PRECIPICE

Large Body of Insurgents Completely Routed From Stronghold By a Sergeant and Detail of Only Twenty Men.

A special of Sunday from Manila says: Captain Edward P. Lawton's company of the Nineteenth infantry has attacked and captured an insurgent fort on Bohol island, south of Cebu in the Visayan group.

This fort was surrounded on all sides by a precipice and the only entrance to the higher ground was guarded by a stockade with a line of entrechments behind it. Captain Lawton sent Sergeant McMahon and twenty men to climb the precipice and attack the fort in the rear. Sergeant McMahon's party accomplished their task after three hours' climbing through the thick undergrowth of brush and vines that covered the almost perpendicular cliff. They took the enemy by surprise and drove them from the fort. As the insurgents escaped, they had to pass the remainder of Captain Lawton's company at a distance of 150 yards. Here the enemy suffered terri-

DEFIANT STRIKERS ROUTED.

Officers of Court In Kentucky Break Up Camp Near Nortonville.

Officers of the law swooped down upon the famous camp of the striking union miners that has been located about a quarter of a mile south of Nortonville, Ky., Saturday, and there is nothing left to mark the rendezvous of those who defied the officers and even the courts, and gave the state and county authorities so much trouble for the past two months, save ash heaps, straw that was used for beds, holes in the ground made by the tent stays and other marks of debris incident to camp life.

All of the campers on whom the sun rose Sunday morning, with the exception of a very few who escaped the officers, are prisoners behind the bars of the county jail, charged by County Judge Hall with a "breach of peace. unlawfully assembling and banding together, thereby making the camp a menace and terror to the public peace."

The four large tents with all the camp paraphernalia, were captured and transported to Madisonville with the prisoners.

Eight Prominent Inspectors Go Down Into the Treacherous Baby Mine and Fail to Return.

A special from Bluefields, W. Va., says: At 11 o'clock Friday morning Superintendent Walter O'Malley, of the Pocahontas Collieries Company, along with State Mine Inspector William Priest, A. S. Hurst, chief coal inspector of the Castner, Curran & Bullitt Company, of Philadelphia; Robert St. Clair, chief coal inspector; Morris St. Clair and William Oldham, sub-coal inspectors: Frazier G. Bell, mining engineer, and Joseph Cardwell, manager of the Shamokin Coal and Coke Company, of Maybury, W. Va., composing a party of eight, entered the west mine of the Southwest Virginia Improvement Company's collieries for the purpose of examining the true situation in regard to the recent explosion and fire in the Baby mine, and up to

midnight had not been heard from. It was supposed that the Baby mine proper had been cut off from the west mine for the purpose of operating the west mine. The large fan in the west mine had ween started at an early hour Friday morning, and at 11 o'clock it was thought that all gases originating from fire in the Baby mine had been forced from the main portion, and it was considered safe to enter.

At 6 p. m. a party consisting of experienced miners, led by Assistant Superintendent King, entered the mine to rescue the party of eight, but forty-five minutes later they returned, having encountered such quantities of black damp as to make it impossible to enter any distance into the mine.

Superintendent King was completely overcome by the gas encountered, and was soon in a critical condition. The secretary and treasurer of the

Southwest Improvement Company, C. S. Thorne, of Philadelphia, is directly in charge of all movements at the mines. The fire originally started in the Baby mine last Thursday morning and which was supposed to have been kept of all natives taking the oath of under control, is now burning furiousprominent in the coal fields, and the excitement now prevailing in Pocahontas is intense, business having been was organized last August, is proving | practically suspended. ## WHELMED BY DEADLY DAMP. NAY, SAYS UNCLE SAM

Proposed Bombardment of City of Colon Will Not Be Allowed.

IOWA COMMANDER INSTRUCTED

United States Government Has For mally Taken Charge of Isthmian Transit and Will Keep Railway Open.

A Washington special says: It is pretty well understood at the national capital that there is to be no bombardment of Colon by either side. While Commander McCrea was given wide discretionary power and nothing was said to him about stopping the bombardment directly, nevertheless the state department established a precedent in these matters last year when it instructed Mr. Gudger to warn some insurgents at Panama that they would

not be allowed to bombard that port. If the government troops on the Pinzon should persist in their purpose, it is said that the commanders of the various warships at Colon would require that ample time be allowed for the withdrawal from the town of all foreigners, and the attacking force, to escape restraint, would be obliged to direct its bombardment with such rare precision as to destfoy the insurgent defenses without harming the railroad property, and even without endangering the passage of trains, conditions probably not to be met.

During the encounters between the military and the turbulent demonstrators seven persons were killed, thirty were wounded severely and many others were slightly wounded.

Twenty thousand persons assembled around the ruins of the temple of Jupiter Olympus and took part in a demonstration organized by the students. A resolution was passed calling on the holy synod to excommunicate any person who translated the gospels into Greek as now spoken. Eight hundred marines were landed and co-operated with the troops in patroling the locality. Several collisions occurred and

ings. During the demonstrations following the assemblage several shots were fired at M. Theotokis, the Greek premier, but without effect. Great excitement is prevailing. Strong military detachments guard the palace and the residence of the pre-
