Call Money in New York Soars to Thirty-Five Per Cent.

MORGAN COMES TO THE RESCUE

Various Gigantic Deals on Foot, Calling For Millions of Ready Cash, Given as the Cause of Big Shake Up.

Stocks broke disastrously in New York Monday when the rate for call money rose to 35 per cent and the market was almost in a panie just before at the close.

R. Keene, the bull leader, said:

"The money situation alone has unsettled the stock market. Underlying conditions are safe and reassuring as ever. I think the plans of relief set afoot by the secretary of the treasury will ease the situation shortly."

The whole list went down in the day's slump, led by Louisville and Nashville, which lost over 11 points. and St. Paul, which lost about 10. Giltedge stocks like Pennsylvania drop ped from 4 to 6 points.

million dollars was paid out by Morgan & Co. anticipating interest due Octo ber 1, but the only effect it had was to break the price of money from 35 to 20 per cent. It did not stay the down | Companies in Savannah and Jackson ward deluge of liquidation.

Cause of Stringency.

There is high authority for saying that the real cause of the money stringency is that J. P. Morgan & Co. are buying up all the foreign bills of exchange to pay the English stockhold ers cash for their stocks surrendered in the organization of the ship trust. Mr. Morgan has already called on his syndicate for twenty-five million dollars for this purpose and it is stated that he will require that much more.

The reports that plans are well advanced for the Atlantic Coast Line to take over a majority interest in Louis ville and Nashville stock is attribut€d by those in a position to know to the fact that the Louisville and Nashville stocks not now controlled by J. P. Mor gan & Co. either by direct ownership or under the option given that firm by the interests represented by Gates and Hawley, will constitute a minority stock. It is also said positively that

the dividend will remain at 5 per cent Among the heaviest sufferers in Monday's crash is said to be John W Gates. He is in Europe, where he is said to be desperately endeavoring to unload his American stocks on the

The greatest loss was sustained by Louisville and Nashville. Disappoint ment regarding the probable disposi tion of the road as much as anything else is supposed to have caused the break.

Other features that combined to un settle the market were disquieting re ports concerning the president's condition, the prolongation of the coal strike and the undoubtable fact that London and the continent are unloading "Americans" in large blocks.

Practically all the money loaned on call came from trust companies and out of town corporations and private individuals. The banks of the Clearing House Association stood aloof and made virtually no loans for speculative purposes. Moreover, the so-called substantial interests offered no support to the market.

A Philadelphia special says: Of the ten anthracite coal producing counties of Pennsylvania, state troops are now camped in five. Coal is being shipped from many parts of the coal fields to market, but quantity is insignificant. The output for the week will be considerably less than the average moral production of one day, which is about 300,000 tons. Children Dropped From Mill Roll. It was stated a few days ago that the Whaley cotton mills had issued an order for all children under 12 years of age to be kept out of the mills. As there is considerable agitation just now on account of the pending "child labor agitation," the statement is con-

sidered of some importance. When asked if such an order had been issued, J. Sumter Moore, general manager of the Olympia mills, stated that the mills have not done more this year than has been their custom. It is true that there were forty or fifty children to quit the mills under instructions issued, but the reason of this is that the schools resumed work and the mills wanted to encourage the chil-

dren to attend school. Sheriff's Good Luck. Sheriff M. M. Buford has again shown his remarkagle ability for keeping track of criminals. A little over five years ago a negro living in Laurens county by the name of Mart Blackburn, alias Mart Rook, was charged with murder. Some time ago a warrant for the negro was placed in the hands of Sheriff Buford by the sheriff of Lancaster county, who had learned from some source that Mr. Buford was in possession of facts that would likely lead to the capture of the murderer. A few days ago Sheriff Buford and two trusted men boarded the outgoing Augusta train in Columbia. The party alighted from the train at Lewiedale about 3 a. m., where they hired conveyances and went several miles in the country to a point above Priceville on the plantation of Dr. James Draffs, where they succeeded by strategy in capturing the negro.

While none of the doctors are willing to be quoted. they give the most positive assurances that there is not the least alarm, and say, on the contrary, there is ev ery indication of a speedy recovery; that the area of the bone affected is very slight, and will not result in an impairment of the president's limb, and that there is no evidence whatever of any matter than would produce blood poisoning. The only fund therefore, available for deposits in banks is internal revenue and miscellaneous receipts, before they have been actually covered into the treasury. These amount to about half a million per day, and since the stringency arose to the fullest extent have been steadfastly returned to circula tion. This policy will be continued from thirty to sixty days, if needed,

and longer, if necessary. "In the meantime, national bank circulation has been increased about \$7,-000,000, largely induced by the distribution of deposits, and the further increase to the amount of \$8,000,000 is

"All rumors of experiments have been unauthorized by the treasury department. It is to be hoped that the public will place no credence in vagaries started by irresponsible and uninterested men of the street. It is also hoped that the country will understand that the treasury department, to the fullest extent of its ability, will stand by the banks, east and west, north and south, and it is hoped also that the banks will stand by every business and every interest that is worth

"The only way to get money out of the treasury into circulation, after it has been actually covered in, is by the payment of legal obligations of the government. These may be anticipated. The department did anticipate the October interest. It now offers to anticipate all interest maturing between October 1 and the end of the fiscal year, if presented within sixty days, at a rebate of two-tenths of 1 per cent per month, which is at the rate of 2.4 per cent per annum. In other words, these obligations will be repaid at such a rate as to allow the government to profit thereby at 2.4 per cent per annum. The amount maturing before June 30, 1903, is, in round figures, \$20,650,000. The profit to the government, if this offer shall

be accepted, will be, in round figures, "There will be no experiments tried, and no policy adopted until after mature deliberation, and no feelers will be sent out. Anything to the contrary

should be discrelited." Regarding the published report that he had resigned, Secretary Shaw said: "I denied this rumor in Chicago. It would seem unnecessary to repudiate a story that has no author, and is built upon a false assumption and is enlarged upon simply to fill space. The president and the secretary of the treasury are in thorough harmony. Of

speeches made by the president and the secretary will be read and compared instead of the head lines."
