Those who have been hoping that the near future would see a modification of the prohibition law are probably doomed to disappointment. It appears to us that the country has never been further from any letup in prohibition. And we believe that the longer the prohibition law stands the stronger it will become entrenched. Liquor will continue to be sold in the larger cities, and in a more or less degree throughout the country, but no fair minded man will pretend to say that under prohibition there is not a vast decrease in consumption of liquor, and that is the purpose of the law. It has always been our opinion that neither the city, county, state nor nation needs the revenue from liquor sales. The price is too high.

Although considerable effort has been made to do so, up to a few days ago no one had been secured in Bamberg county to act as chairman for the raising of funds for the Democratic national campaign. Until such chairman is secured, The Herald will gladly receive contributions for this purpose, and will see that such funds are forwarded to the proper authorities. A democratic victory on November 2 will mean much for the continued prosperity of the south. It has already been clearly demonstrated that the Republican ticket is hostile to the interests of this section of the country. To elect Harding and Coolidge will mean a reversion to many practices in the south from which we have been delivered in the past eight years. It takes money—and lots of it—to conduct a national campaign these days. The Democratic party has no big moneyed interests to look to for support. Give a dollar or five or ten or a hundred—any amount will be appreciated. The Herald will acknowledge contributions in the paper.

There has been too much knocking in Bamberg lately. A good many things have gone wrong, but they will never be remedied with the toe of the shoe. Knocking is one of the easiest things in the world to do. We all grant that there are things in Bamberg that need remedying, and it has become the common custom to express about all the criticism we are capable of, without accomplishing a thing.

Now, if Bamberg is to continue to prosper and grow, the people must put their shoulder to the wheel and push, instead of trying to kick the thing along, which won't do a thing but wear out your shoes, and shoes

Have Your Car as Reliably Equipped as a Railroad

Great railroad systems choose Gould Storage Batteries to operate vital signal systems.

What better battery can you ask for your car?

Dependable action of the Dreadnaught Plates helps make these railroads safe—

And gives the kind of starting and lighting service you want.

Good plates are the essential thing for both uses.

The Dreadnaught Plates are rugged brutes for punishment and power.

Next time you renew your storage battery, order a Gould.

are entirely too expensive to wear them out kicking.

We like the tone of Kirkland Graham's communication in this issue of The Herald. Read it. Stop knocking and kicking the old town and let's pull her up. By continually criticizing we are apt to lose sight of what we have and the progress we have made. Bamberg compared with a few years ago has made wonderful progress, and we have just started. Naturally, in making so many improvements in so short a time many mistakes have been made.

Let's start out fresh and give everybody credit for being honest and sincere, even if things have not been conducted exactly as you would have conducted them. This will broaden the vision. Get up some enthusiasm. Tell everybody what a good town we

have. There is no use to stress our bad points, for the bad points can be eliminated.

Sensible Question.

A dusty stranger limped into the railroad station of a little Texas town that was chiefly noted for cactus and alkali, and deposited a coin on the counter.

"Gimme a ticket to the next place," he ordered dispiritedly.

"Single or round trip?" queried the agent.

The stranger glared. "Round trip," he burst forth. "What's the use of a round trip when I'm here already?"

Primarily, of course, it is the soldier in war who is the patriot—he produces fighting qualities, his life, his all.

Just as important was the worker at home. Without him the soldier must fail.

We supported the soldier as far as we could. We honor and encourage the producer at home.
