

DO CLOSE FOR COMFORT

Meeting a Lion at a Distance of Four Feet is an Exciting Experience.

To prove that lion hunting isn't all a "pink tea," witness Stewart Edward White's experience as told in Outing:

"Suddenly I heard a tearing scramble in the bush. Forty yards down I would see game trail coming up, and about the same distance back another. The bank in front was precipitous. I hurried for that strategic point. If the bluff held the donkey bottom I could shoot him from above; if he came out either trail I'd get a good chance.

"Instead of that a big-maned lion scrambled up the wall of the ravine right at my face, and stopped for an instant four paces away. Just step off four paces.

"He looked like a lion angry about something. It was somewhat startling for I was not expecting him; but I had to get busy before he did. The first shot from the .405 did not knock him off his feet, but at that range it literally blew him sideways as though the gust of a tornado should catch a man off balance. Working the lever as fast as I could throw it, I put in another (they proved to be three inches apart). This blew him backwards again, literally over the edge of the barranca. He roared and growled and leaped. The third shot broke his foreleg. Another raked him from stem to stern. He rolled on his side and died roaring. Fine little scrap with lots of excitement.

"Found Mamba Sasa next me with five more Winchester cartridges spread out fanwise in one hand and the Springfield cocked and ready in the other. That fellow is all right."

FISH THAT SURVIVE FREEZING

Swiss Scientist Has Made a Discovery That May Be of Much Commercial Importance.

The ordinary cold storage of fish is put out of date by Mr. R. Pictet, the brilliant Swiss scientist, noted for his experiments with cold. He has just succeeded in freezing live fish and reviving them several weeks or months later, an achievement which recalls Edmond About's fanciful tale of "The Man With the Broken Ear." He recently placed 25 fish in a box containing water rich in oxygen, and in which several pieces of ice were floating. He then very slowly reduced the temperature of the contents. At the end of about two months the resultant cake of ice was gradually thawed and the fish were all found to be alive. According to the report of the experiment given in L'Illustration (Paris), it is essential that the water be very gradually frozen and that it shall have contained pieces of ice for from fifteen to eighteen hours before the whole mass is frozen. The process of thawing must also be very slow. It is stated that Alaskan salmon and Siberian sturgeon may thus be brought alive to Paris. Methods of making the process commercially successful are now being sought.

Modern Single-Truck Cars.

A few years ago the single-truck car seemed doomed to die a natural death except in cities which were too small to use the large double-truck cars which were becoming more and more popular. No one would have ventured to foretell that the time would come when a large city company would actually discard double-truck cars in excellent operating condition for any kind of single-truck design. Yet this is precisely what the Third Avenue railway system, New York, has done during the current year in ordering a total of 50 single-truck cars. The one thing worth pointing out at this time is that the operator of a modern single-truck car has nothing to apologize for so long as that type makes ample service an economic possibility. The public must be educated to the fact that it would be as absurd for it to expect a metropolitan car in low-traffic service as to demand big-city standards in theaters and public buildings.—Electric Railway Journal.

Forty-Six Years a Deputy.

French political life bears the reputation of being so full of vicissitudes that it is somewhat surprising to find among the deputies returned at the general election one with a longer record of parliamentary service than any member of the house of commons. This distinction belongs to M. de Mackau, who is eighty-two years of age, and has sat for the department of Orne since 1866, first in the corps legislatif of the second empire, and subsequently in every chamber of deputies elected under the third republic. None of the present members of the house of commons was elected before 1868.

Army Really is Prussian.

The adoption of Mr. Filson Young's suggestion to speak of the Germans as Prussians rather than Germans would really be a step toward accuracy. Strictly speaking, there is no German army. The force commonly so termed is composed of the units of Prussia, Bavaria, Wurttemberg, Saxony, etc., all of which wear the distinctive uniforms of their states, and have a kind of independence. The officers, too, take the oath of allegiance, not to the kaiser, but to their respective sovereign princes. With the navy it is different. That is imperial, and the officers take their oath direct to the kaiser.

BEST TO FIND PAIN'S CAUSE

Useless to Smother Nature's Danger Signal by the Excessive Use of Drugs.

Of all the sentinels that watch to give warning that something within our bodies has gone wrong, pain is the most assiduous, although its importance is frequently overlooked by physicians, as well as laymen. Pain is simply an expression of rebellion against objectionable stimuli; therefore, however desirable it may be to get rid of it, it is far more important to find and cure its cause.

The old-time family doctor's first thought when called to a patient in pain was to smother it by means of powerful drugs. This was sometimes useful in tiding a patient over a short illness, which was bound to right itself; but it was worse than useless in chronic ailments, because it substituted for the remedy in question a far worse disease, namely, the opium habit. It was exactly as though a railroad inspector on finding a red lantern on the track should throw a coat over it and go on his way. The patient was lulled, but in this important danger-signal was disregarded and nature's call for permanent relief remained unanswered.

In appendicitis, for instance, it used to be the custom to "kill pain" by administering large doses of morphine. We now know that this dulls the patient's senses to a degree which makes diagnosis of peritonitis or other complications impossible, and that a life may be lost because one of the most important symptoms is masked by drugs. It is interesting also to note how pain in appendicitis sets up a reflex action of the abdominal muscles. The muscles become hard and "boardy," nature attempting to hold the appendix as if in a splint so that further injury may be impossible and conditions favorable to repair may obtain.

OPPORTUNITY A GREAT ONE

Chance for Trade Expansion in the United States During and Following the War.

In reference to the prospective enormous foreign demand for American manufactured products, the American Machinist points to the fact that the world outside of Europe needs machine tools alone to the yearly amount of \$7,750,000. In machinery proper the requirement is about \$130,000,000. These figures are based on United States, British and German exports. Some machinery is sent abroad from Belgium and France; thus the totals given above are conservative.

The world's manufactured products are made by machinery, and machinery is built with machine tools and small tools.

In estimating the opportunity now in sight, the parallel we naturally turn to is England, during and immediately after the Franco-Prussian war. Parliamentary reports give most striking facts in this connection. There was an unexpected trade expansion. The national income jumped from \$5,500,000,000 in 1870 to \$6,750,000,000 in 1874, an increase of \$1,250,000,000.

During 1870-1874 England was manufacturing for the world. In 1914-15 the United States must manufacture for the world.

"Witchcraft" in England.

A case of witchcraft came to light before Justice of the Peace Rupp of Northampton, England, in the suit of Stanley Wagner against Howard Remaley recently. Wagner charges Remaley with seeking to harm him. It was alleged that some time ago a sum of money was supposedly stolen from Remaley. The latter consulted a "witch" doctor, who described the thief. The description is alleged to have tallied with that of Wagner. In order to "disturb the sleep of the thief" the witch doctor told Remaley to take three horseshoe nails to a neighbor, which he was to ask to grease thoroughly. This was done. Next Remaley was advised, in order "to kill the thief," to get three drugs from a druggist or undertaker and to use a sledge-hammer in connection with them. About this time rumors began to reach the ears of Wagner, and he became so alarmed that he caused a warrant to be sworn out against Remaley for surety of the peace. The case has been settled.

The Rib.

At a luncheon Dr. Lyman Abbott sat beside a suffragist who harangued him from the hors d'oeuvres, to the coupe, Jacques on the importance of woman.

With his urbane smile Doctor Abbott endured the young lady's eloquence till the coming of the coffee. Then he ventured to say very mildly: "The importance of woman? The importance of woman? I have heard nothing but 'the importance of woman' for the last hour. Yet surely Scripture teaches us that woman is but a side Tasse!"

Man's Idea of Modern Woman's Dress.

Mr. H. B. Watson, the well-known English novelist, author of "The Temboy," boiled over in a recent interview on modern women's fashions. Style and shape are meaningless, in his opinion, when applied to these dresses. "In his heart of hearts every man knows how ugly they are. They cut a woman's figure at the wrong place, stuff her out where she has least need of bulging, skimp her where she is scantiest, and generally turn her into an expensive scarecrow."

HAD ENOUGH OF NEW YORK

Dressmaker From Indiana Formed Mighty Poor Opinion of the Great Metropolis.

She was a middle aged person from the rural districts and evidenced health in her appearance and perfect digestion in her breakfast, which consisted of ham and eggs with catchup on them. The catchup made even the waitress wince. Her trouble was entirely of the mind, but it was acute.

"What I want to know," she said to the waitress, according to a New York correspondent of the Cincinnati Times-Star, "is how there's so many people in New York when most of 'em, so far as I see, could git away if they wanted to. I come here to see th' fashions, actin' on the advice of friends, though I run a dressmakin' establishment 20 years in Vevey, Indiana, without never comin' to New York an' ain't never comin' again. If I ever took back th' fashions I seen here to Vevey, I'd lose every customer I've got an' probably git put out of the church. New York ain't nothin' but a regular swindle anyway, from end to end an' from before breakfast to lockin' up time. I was supposed to git a 'quiet room' in a convenient neighborhood. When I got there it was over a shootin' gallery, an' th' things that neighborhood was convenient for ain't nothin' for you an' me to speak of. I moved quick an' they wouldn't give me back the deposit I sent when I wrote to engage th' room. But I ain't gonna undertake to tell ye about all th' little things like that that happened to me. That's New York. But I want to tell ye one thing: When I git back to Vevey—and I'm a-goin' today—I'm gonna put a sign right in my window that people that wait New York fashions kin go to New York an' git 'em. Vevey's good enough for me."

BAD EFFECT OF SMOKY AIR

Neither Animals Nor Vegetation Flourish in the Vicinity of Large Manufacturing Plants.

Whether live stock is likely to suffer when living in the neighborhood of railroad yards, industrial plants and large manufacturing centers, was the question that the Leeds (Eng.) university proposed to Yorkshire farmers, and the answers showed the affirmative not only for animals but also as concerns grass and other plants. It appears that the growth of young stock is kept back under such conditions, and in the case of old stock or horses these are seen to require much more care and food than those which live in a pure air. Such effects on animals are due partly to the direct action of the vitiated air when taken into the lungs and on the other hand by the very poor quality of grass that grows here, as it cannot develop under good conditions. Sheep raising is found to be especially difficult in these places, even impossible. Near Leeds, this had to be discontinued, for the wool was of very poor quality, besides being full of impurities of various kinds. Thus it appears that the same general rules apply to animals as to human beings under such circumstances.—Scientific American.

Japan's Paper Underclothing.

The Japanese are now making underclothing of finely crimped or grained paper, the New York Weekly states.

After the paper has been cut to a pattern, the different parts are sewn together and hemmed, and the places where the buttonholes are, to be formed are strengthened with calico or linen. The paper is very strong and at the same time very flexible. After a garment has been worn a few hours it will interfere with the perspiration of the body no more than do garments made of cotton fabric.

The paper is not sized, nor is it impermeable. After becoming wet the paper is difficult to tear. When an endeavor is made to tear it by hand it presents almost as much resistance as the thick skin used for making gloves.

Fault in Education.

One regrettable fact about the advanced education of many young persons is that they have been alienated from their homes and families and the "old-fashioned" ways of the latter. The fragility of this gulf which school and college have created between students and their parents is known only to the mothers and fathers who have endured it. Usually, also, the explanation is that the children have not won to even the beginnings of wisdom, else they would value the real worth of the parents whose greatness of loyalty and service and sacrifice is beyond the power of the schools to bestow. Any education which makes a boy ashamed of his mother and father is a bad education.

Napoleon's Pen-Wiper.

According to the biographers of Napoleon, his breeches were always of two cashmere. It often happened that white hours after leaving his chamber the breeches were spotted with ink by reason of the Corsican's habit of wiping his pen on them and of shaking ink all around him. It was a favorite trick of his to strike his pen against the edge of a table and, of course, the breeches suffered.

Furthermore, it appears that, however the great man dressed in the morning, that was his dress for the whole day, since he would not change his toilet until nightfall. The inside of his boots was lined with white fustian.

STOVES! STOVES!

We have a fine assortment of heaters and stoves at prices that are attractive to anyone.

Heaters any price from \$1.35 up.

Cook Stoves any price from \$8.00 up.

The Princess Range at \$40.00.

Range Eternal at \$65.00.

When in Need of a Heater or a Stove, Give Us a call and be Convinced.

A. Wichman & Son

Walterboro, South Carolina.

POSITIVELY MASTERS CROUP

Foley's Honey and Tar Compound cuts the thick choking mucus, and clears away the phlegm. Opens up the air passages and stops the hoarse cough. The gasping, straggling fight for breath gives way to quiet breathing and peaceful sleep. Harold Berg, Mass., Mich., writes: "We give Foley's Honey and Tar to our children for croup and it always acts quickly." For Sale by all Dealers.

RUB-MY-TISM

Will cure your Rheumatism, Neuralgia, Headaches, Cramps, Colic, Sprains, Bruises, Cuts and Burns, Old Sores, Stings of Insects Etc. Antiseptic Anodyne, used internally and externally. Price 25c.

It Really Does Relieve Rheumatism.

Everybody who is afflicted with rheumatism in any form should buy all means keep a bottle of Sloan's Liniment on hand. The minute you feel pain or soreness in a joint of muscle, bathe it with Sloan's Liniment. Do not rub it. Sloan's penetrates almost immediately right to the seat of pain, relieving the hot, tender, swollen feeling and making the part easy and comfortable. Bowman, and made in the above cause, all land singular the creditors of Annie Mary Connelly, deceased, are hereby required by Dec. 24th, 1914, to file their claims, if any they have, with the undersigned Master, and against the creditors will take due notice hereof and govern themselves accordingly. H. L. O'BANNON, Master for Barnwell County. Master's Office, Dec. 3rd, 1914.

SAVES DAUGHTER

Advice of Mother no Doubt Prevents Daughter's Untimely End.

Ready, Ky.—"I was not able to do anything for nearly six months," writes Mrs. Laura Bratcher, of this place, "and was down in bed for three months."

I cannot tell you how I suffered with my head, and with nervousness and womanly troubles.

Our family doctor told my husband he could not do me any good, and he had to give it up. We tried another doctor, but he did not help me.

At last, my mother advised me to take Cardui, the woman's tonic. I thought it was no use for I was nearly dead and nothing seemed to do me any good. But I took eleven bottles, and now I am able to do all of my work and my own washing.

I think Cardui is the best medicine in the world. My weight has increased, and I look the picture of health."

If you suffer from any of the ailments peculiar to women, get a bottle of Cardui today. Delay is dangerous. We know it will help you, for it has helped so many thousands of other weak women in the past 50 years.

At all druggists.

Write to: Chattanooga Medicine Co., Ladies' Advisory Dept., Chattanooga, Tenn., for Special Instructions on your case and 64-page book, "Home Treatment for Women," in plain wrapper. N.C. 187

How To Give Quinine To Children.

FEBRILINE is the trademark name given to an improved Quinine. It is Tasteless Syrup, pleasant to take and does not disturb the stomach. Children take it and never know it is Quinine. Also especially adapted to adults who cannot take ordinary Quinine. Does not nauseate nor cause nervousness nor ringing in the head. Try it the next time you need Quinine for any purpose. Ask for correct original package. The name FEBRILINE is blown in bottle. 15 cents.

Best for Kidneys—says Doctor.

SCIATIC RHEUMATISM CURED

Five bottles of Mrs. Joe Person's Remedy cured T. H. Harrison, Clerk Superior Court, Yanceyville, N. C., of sciatic rheumatism. The blood is purified, the body built back to health and strength and all the ills resulting from impoverished or poisoned blood, such as rheumatism, nervous dyspepsia, gastritis indigestion, eczema, scrofula, etc., are completely overcome by Mrs. Joe Person's Remedy. This remedy has been successfully used for forty years, and hundreds of testimonials declare its superiority as a blood medicine. It is scientifically compounded of vegetable ingredients of the highest purity. When you suffer these ills, you need Mrs. Joe Person's Remedy for your blood.

Your druggist should have it; if he hasn't we will supply you. Large size bottle, one dollar. Remedy Sales Corporation, Charlotte, N. C.

Mrs. Joe Person's Wash should be used in connection with the Remedy for the cure of sores and the relief of inflamed and congested surfaces. It is especially valuable for women, and should always be used for ulcerations.

Sick headache is nearly always caused by disorders of the stomach. Correct them and the periodic attacks of sick headache will disappear.

Mrs. John Bishop of Roseville, Ohio, writes: "About a year ago I was troubled with indigestion and had sick headache that lasted for two or three days at a time. I doctored and tried a number of remedies but nothing helped me until during one of those sick spells a friend advised me to take Chamberlain's Tablets. This medicine relieved me in a short time." For sale by all dealers.

Sick Two Years With Indigestion. "Two years ago I was greatly bothered through using two or three bottles of Chamberlain's Tablets," writes Mrs. S. A. Keyler, Elida, O. "Before taking them I was sick for two years with indigestion." So all dealers.
